# Dare to Inspire

In a rapidly changing world, we collectively have an opportunity to rethink and reinvent the way we live and transform our indoor spaces to promote healthier living. We have imagined iD Inspiration for this new world. As our flagship modular vinyl collection, it builds on a ten-year journey to continuously improve the user experience. Through our Tarkett Human-Conscious Design™ approach, we develop flooring that helps people flourish in their every day without compromising on health and the environment. iD Inspiration exemplifies this approach, delivering enhanced modularity that enables agile transformation of space to meet the evolving demands of work and life. Meanwhile, its nature-inspired colours and themes – heightened by the ultra-realism of digital printing – help to achieve feel-good interiors.

# Harnessing the Power of Nature

The new iD Inspiration sets an unprecedented milestone in the design of modular vinyl collections. Our advanced digital printing technology enables us to reveal the most subtle details of wood and stone to make each plank or tile unique in grain, texture and colour. Most importantly, it enables specifiers to choose the best of natural designs embedded in the highest-performing vinyl materials.

## Capturing the beauty of wood and stone

*“With this collection, our passionate design team have sought to pay tribute to nature while creating a highly realistic look and feel, combining natural colours and a faithful reflection of every detail.”*

**Florian Bougault** - Art Director EMEA

Nature guides every aspect of our design journey. We have taken our design sourcing process to the next level, carefully making selections based on character, detail and natural diversity of expression. Every design in the Naturals collection is scanned directly from a chosen specimen of wood or stone, from oak to marble. By paying attention to the origins of these natural materials, we share with you the wonder of natural imperfections and nuances. The variety of our designs gives you the freedom to subtly match the style that best suits your space.

## Bringing the outdoors inside

Designing spaces has moved definitively towards connecting interiors with the outdoor world, echoing the beauty of nature to improve quality of life in urban spaces. By selecting the best natural tones of woods and expressive stones, we have sought to bring the outdoors in.

In this way, we aim to create positive emotions to help enhance learning, working and caring. iD Inspiration decors were selected to foster a feel-good atmosphere, and bring interior designs to life through the use of our exclusive digital printing technology.

From the calm and peaceful pureness of blond oaks to the expressive darkness of traditionally charred Japanese woods, or raw sun-weathered boards, we sought a range of tree species such as elm, hornbeam, and walnut, to propose alternative wood grain patterns and colour variations, as well as new exclusive subtle textures such as MDF and Terrazzo.

Meanwhile, we have continued to focus on modularity and flexibility, with the introduction of oversize formats. The end result is a palette of designs, echoing authentic building materials, that enables you to create people-friendly spaces.

# Human-Conscious Design

Tarkett Human-Conscious Design™ is our pledge to stand with present and future generations. To create flooring and sports surfaces that are good for people and for the planet. And to do it every day. Developing a circular economy, innovating with good materials and exceeding indoor air quality standards are essential parts of our commitment for today's and future generations.

## Indoor air quality

Our commitment to giving you healthier spaces to live and work is not just talk. By driving down VOC emissions, our products exceed the strictest industry standards for air quality by so much, we've had to set our own standards. Standards that we can prove with science, not just words.

### Ultra-low VOCs

With 90% of time spent indoors, clear air matters. Our iD Inspiration collection showcases ultra low VOC emissions, less than 10 µg/m<sup>3</sup>\*.

\*TVOC after 28 days.

### Water-based inks

At Tarkett, we use water-based printing inks with no organic solvents through all our printing processes. This contributes to iD Inspiration's ultra low VOCs emissions. We are the only flooring manufacturer to use water-based inks with our digital printer.

## Good materials

At Tarkett, we demand to know every detail about the materials we use. It's why we're obsessed with the health and sustainability standards of Cradle to Cradle® – a methodology that guides our good material choices. Complete transparency from us, peace of mind for you.

### Made in Europe

Our iD Inspiration collection is manufactured in-house at our European production sites in Clervaux (Luxembourg) and Jaslo (Poland).

### Phthalate-free

Our iD Inspiration collection is phthalate-free. It contributes to healthier spaces and helps you reach green building certifications like BREEAM, WELL and LEED.

### Radical transparency

**98%** of our materials are independently assessed by EPEA.

Unique in the market, our MHS (Material Health Statements) give you a clear view of the health profile of the materials used in our flooring. Our EPDs share information on the materials' environmental impacts.

## Climate and circular economy

We are passionate advocates of the circular economy. It's why we're working to maximise the recycled content in all our products and prioritise end-of-life recycling. Preserving natural resources, reducing waste and carbon emissions and helping make your sustainable choices hassle-free.

### Recycled content

**44.3%**

Our glue-down designs contain up to 44.3% recycled content.

### Our ReStart® take-back and recycling programme

iD Inspiration is ReStart-ready. All post-installation off-cuts are recyclable at our recycling centre at Clervaux (Luxembourg). Post-use recycling is possible for click designs. We collected more than 109,000 tonnes of flooring through ReStart® from 2010 to 2020\*.

\*All collections combined in Europe, Brazil and North America.

### Climate change

13% of the total volume of our purchased raw materials were recycled, avoiding 253,000 tonnes of CO<sub>2</sub> in 2020\*.

\*Estimation for part of scope 3.

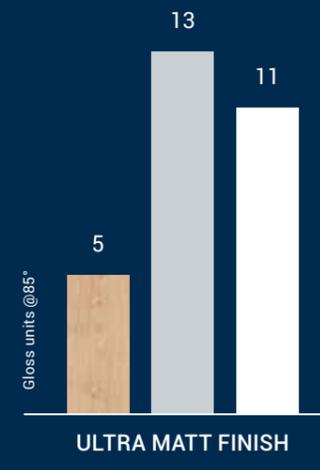

iD Inspiration  
 was elaborately  
 designed  
 to make your  
 flooring creation  
 process easy.

# Design

## TEKTANIUM™

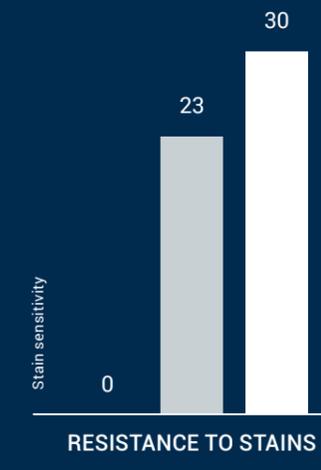

Best ultra matt  
 finish and unequalled  
 resistance

The iD Inspiration collection features our new TEKTANIUM™ PU coating which uses a proprietary polymer system - forming a naturally clear, verifiably stronger layer of protection that delivers unequalled resistance to scratches, abrasions, wear and stains. Moreover, it offers a pure ultra matt finish, which is consistently visible from all angles. By mixing ultra matt effect with excellent resistance and durability properties, the surface of your flooring appears more realistic and lasts longer. TEKTANIUM™ is the only PU coating to combine all these features, so there's no need for compromise.

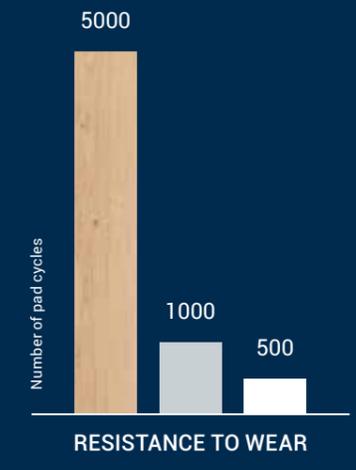

Gloss measurement at an 85° angle based on Tarkett's internal tests. (in compliance with ISO 2813)

< 6 = Ultra matt  
 > 10 = Satin

Stain resistance measurement based on Tarkett's internal tests (in compliance with ISO 26987).

0 = not affected (Best in class)  
 30 = very affected

Wear resistance measurement based on Tarkett's internal tests. (based on EN ISO 16094)

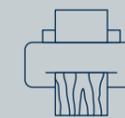

5000 = best in class

# Naturals

## Designing as nature intended

Our Naturals designs are scanned from nature through the meticulous sourcing of high quality raw materials such as wood and stone. Using a unique patent-protected digital printing technology, the only single-pass 2m wide printer for jetting water-based inks on vinyl in the world, we have reflected the best of nature's diverse features, from characterful wood grains to the subtle textures and nuances of stone. To convey the true diversity of the natural world in all its glory, our modular vinyl flooring displays a high definition with non-repeating motifs for up to 12m<sup>2</sup> (2x6m) and an ultra matt finish.

# Glue-down

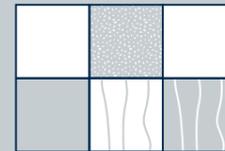

## Benefit from a worry-free and long-lasting installation

Our glue-down designs are suitable for residential and commercial areas ranging from moderate to very high traffic environments. Our new proprietary TEKANIUM™ coats to an attractive ultra matt finish, which allows maximum light on your flooring, brings warmth and enhances realism. Made in Europe, iD Inspiration carries a 10-year limited warranty for commercial use and 15-year limited warranty for residential use.

## Maximum durability

Vinyl has many qualities that make it a great choice for durable flooring, glue-down vinyl even more so. It is a great option in high traffic areas and busy homes. It is easy to take care of, requiring little maintenance and no regular renovation.

## Infinite layouts

From simple floor patterns to more elaborate compositions, you can easily mix and match multiple formats and colours to build your own iD Inspiration experience.

## Extreme resistance

iD Inspiration has been designed for the most intense traffic areas. It withstands heavy loads and indentation, enabling maximum resistance to both static and rolling heavy loads up to 800kg\*.

\*800kg refers to our 0.70 wear layer references.

# Customisation

The collection offers near endless combinations. Every aspect of the product is customisable with all decors.

## 1 PRE-DEFINED SERVICE

- Select an existing format
- Choose a bevel
- Select an embossing
- Select a colour from the library
- Pick a design from the library

## 2 À LA CARTE SERVICE

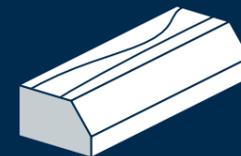

- Define a custom colour from NCS & RAL
- Request a new design

Customised designs are available on MTO (make to order). Please check with your sales representative for specific timing and customisation terms and conditions. All projects will have to be evaluated individually.
