School Solutions

School environments play a crucial role in our education system and need to provide safe, inspiring spaces for children to gather, learn and play. These environments require linings which successfully reduce noise reverberation, are robust, easy to maintain and have longevity while simultaneously providing great aesthetic appeal.

With hundreds of successful school projects completed, Supawood can offer expert advice and multiple options to suit your client's project and budget. Our lining systems can meet the most stringent BCA requirements, come with a range of tried and tested acoustic solutions and inspiring creative finishes.

SUPACOUSTIC – Acoustic Panels. Our most popular product in education projects, combining class and the high acoustic performance required for buildings designed for the conveying of information.

SUPASLAT – Slatted Wall and Ceiling Panels. Great to transform an entrance, collaborative or circulation spaces.

Supaslat MAXI BEAMS – Lightweight Beam System. Entry and reception Feature Ceilings and Walls. Pre-finished and lightweight make it ideal for entry feature upgrades.

SUPATILE & SUPATILE SLAT – Accessible Ceiling Tiles. Combine class with easy access to services in high-tech flexible and collaborative learning spaces.

WAVE BLADES - Sculptured Features create free-flowing organic timber blade ceiling to enhance an entry or reception.

ALUCLICK – The Quick Click Beam. Ideal for exterior façade upgrades.

Supawood look forward to partnering with you to help you adapt a solution to meet the unique needs of your next school project.
