

PLEATED/DUOPLEAT SYSTEMS

PLEATED/DUOPLEAT 3.1

EASYRISE 3.2

MOTORISED 3.3

VERTILUX PLEATED AND DUOPEAT SYSTEMS ARE INFINITELY ADAPTABLE, BOTH IN SCREEN DENSITY AND SHAPE, MEETING UNIQUE DESIGN REQUIREMENTS INCLUDING ARCHED, CIRCULAR, TRIANGULAR AND ASYMMETRIC APPLICATIONS. ADAPTABILITY AND THE ABILITY TO MOTORISE MAKE THESE BLINDS PARTICULARLY SUITED TO SKYLIGHTS AND DIFFICULT TO REACH PLACEMENTS.

Pleated Blind fabrics are a single layer of fabric whilst Duopleat Blinds are made using fabric that is honeycomb/cellular in shape giving superior heat reflection properties to assist in maintaining an energy efficient and comfortable living environment. Both are available in a wide range of colours and textures, including transparent, translucent and room darkening options and include colour coordinated extruded aluminium headrails, base rails and associated componentry such as control cords.

The Vertilux Easyrise Pleated/Duopleat System is operated by a single continuous loop chain instead of cords.

Our Day Nighter system allows a combination of fabrics to suit almost any light control or privacy requirement.

Each application can be lifted from either the bottom or the top so as to admit or block light whilst maintaining high levels of privacy.

The Vertilux Motorised Pleated/Duopleat System uses the latest in technology options, making their operation simple, reliable and durable.

TECHNICAL DATA

AVAILABLE SYSTEMS	MINIMUM WIDTH	MAXIMUM WIDTH	MAXIMUM DROP
Pleated 3.1	200mm	5800mm	6000mm
Duopleat 3.1	200mm	3000-4400mm	4000mm
Easyrise Pleated 3.2	200mm	4000mm	5000mm
Easyrise Duopleat 3.2	200mm	3000-4400mm	4000mm
Motorised Pleated 3.3	700mm	5800mm	6000mm
Motorised Duopleat 3.3	700mm	3000-4400mm	4000mm
