

MASS COVERAGE

Commercial-grade hail protection net for any application, location or size requirement

MakMax is the market leader in the design, fabrication and installation of hail net protection structures in Australia.

Our fully engineered custom structures effectively protects your business from the elements.

Headquartered in Brisbane, with offices in Perth and Sydney, giving us the ability to ensure we are hands on, when it comes to the delivery and quality of your project. The advantages of having our own Fabrication Facility in Brisbane, means we can bring your design requirements to reality, right here in Australia.

We are also proud to be part of the Taiyo Membrane Corporation, ensuring our clients benefit from the global experience, knowledge and technology of the largest tensile membrane structure company in the world.

Our services include:

- In-house design, engineering & certification
- Full turn-key options available
- In-house fabrication facility
- Qualified team of project managers, site managers and installers
- Our reputation as the market leaders is a reflection of our demonstrated capability, dedicated client service and 35 years of design innovation and delivery excellence.

Our product is an ideal choice for:

- Vehicle mass storage
- Large long-term car parking facilities
- Airport parking shade structures
- Machinery and equipment storage

The advantages offered by MakMax hail protection structures include

- Weather protection for your product
- Reduced Insurance premiums
- Mass Storage provision
- Minimal column impact on storage space
- Cables are placed within the membrane – reducing space requirements
- Internal bracing bays providing additional structural redundancy, which also provides future opportunity to expand and modify your existing structure

We offer our clients, direct access to our in-house engineering, design and drafting team. This team boasts, Australian recognised qualifications and industry registered certification, guaranteeing our clients the best possible project outcomes, regardless of the size or project value.
