Note: A general reference point for a child's ability to activate a push button on a drinking fountain or water cooler is the Australian disabled standard AS1428.2. This standard states a maximum force of 19.5Nm

Blueline Bubbler Range

Enware is excited to announce a new range of bubblers that brings a fresh and clean new look to the playground. The Blueline range is made with the same trusted engineering and performance you've come to expect, but with an updated design incorporating a bright blue, soft rubber guard to protect teeth and designed with UV protection so it will last and last.

We've even made sure the littlest hands in the playground can get a drink, by making the handles the lightest and easiest to use, and with 5 different models we've got the playground, the parks and footy fields covered.

Easy to Use

Easy to use handles, levers and buttons require a low amount of force to operate so children can easily use all models

Safety

Bright blue mouth guard protects teeth and is UV protected for longevity

Flow

All bubblers have a regulator allowing the water flow to be easily set

Durable and Reliable

Mechanisms are the same heavy duty design as used on all our spring action products. Spare parts available

Quality heavy duty assemblies, tubing and chrome plating

Service and Support

Our national technical service team of accredited plumbers can assist with onsite training and support.

applications

- Schools
- Universities
- Municipal areas
- General public areas
- Sporting fields
- Railway and Bus Stations

Enware has been designing and manufacturing spring-action tapware and bubblers since 1937. Made to last and designed to save water and reduce ongoing maintenance in challenging environments such as schools and local public areas, with barrier free models also available for wheel chair users. Go to www.enware.com.au for our full range.
