Beautiful, durable and affordable. Kronotex combines the ingenuity of German engineering with the beauty of timber to deliver stunning, hard-wearing laminates that mirror the splendour of solid wood floors.

Designed and manufactured in Germany, Kronotex's cutting edge surface structures (see page 22) collide with authentic timber patterns to create strikingly realistic woodgrains. The breadth of these woodgrains and colours available across the MAMMUT, MAMMUT PLUS, EXQUISIT PLUS, EXQUISIT and DYNAMIC ranges intertwine the traditional with the latest European trends. This results in designs that are both timeless and alive with personality. From deep, dark and elegant to light and weathered.

From extra long boards to extra wide. There is a Kronotex design to elevate your interior style.

The enviable quality of German manufacturing means Kronotex Laminates are so robust they can be installed in both commercial and residential settings – making them perfect for busy Australian homes.

With Kronotex Laminate there is no limit to where your imagination can carry you!

MAMMUT

Luxury is the motto of MAMMUT. Boasting 12mm thick boards, MAMMUT feels and sounds so solid underfoot it is indistinguishable from hardwood floors. The authenticity of the range is amplified further by its impressive wood grains and warming colours. The registered emboss (see page 22) and matt finish is so captivatingly realistic it encourages tactile exploration. This luxuriousness is further enhanced by the range's extra-long boards which, combined with its micro-bevel edges, creates spaces characterized by elongated elegance. Boasting an AC5 abrasion rating and a Use Class of 33, MAMMUT is so sturdy it will maintain its beauty even in heavy-traffic commercial spaces.*

BOX 4 boards | 1.387 m²

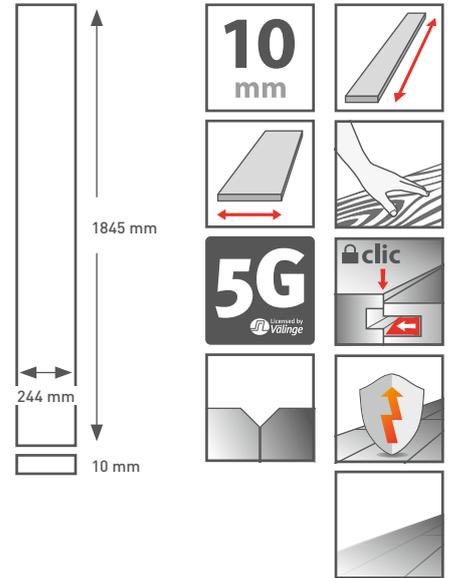

PALLET 56 boxes | 77.697 m²

MAMMUT PLUS

Dramatic dimensions define MAMMUT PLUS, an exciting and premium range of laminate flooring featuring boards that are both extra wide and extra-long. The width and length of MAMMUT PLUS boards create calming atmospheres that exude spaciousness. The impressive dimensions combined with the micro-bevel edge and authentic wood grains encourage the gaze to wander, while the registered emboss is so seductively realistic it encourages bare-foot exploration. Boasting an AC5 abrasion rating and a Use Class of 33, MAMMUT PLUS is so sturdy it will maintain its beauty even in heavy-traffic commercial spaces.*

STRUCTURES

MX / Matrix

An advanced technique which uses the contrast between matt and gloss finishes to create depth and mimic the deep grooves of wood grains.

MX / Matrix

AF / Authentic Floor

RE / Registered Emboss

A textured surface layer matches perfectly with the pattern of the grain beneath it to create a beautifully realistic surface that is difficult to distinguish from hard-wood floors.

RE / Registered Emboss

UL / Used Look

CP/Chrome Pore

A shine effect is added to the grain pattern to play with light and add depth to the floor's finish.

Shine Effect

CP/Chrome Pore

AF / Authentic Floor

A highly detailed finish that results in a vivid and natural wood texture.

UL / Used Look

A decorative finish that mimics the weathered look of well-loved hard-wood floors to create a beautifully realistic used look.

BOARD CONSTRUCTION

Kronotex laminates consist of a minimum of four stable layers which ensure the extraordinary durability and unique quality of Kronotex floors.

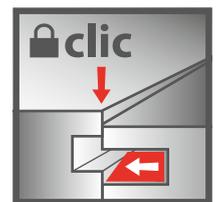

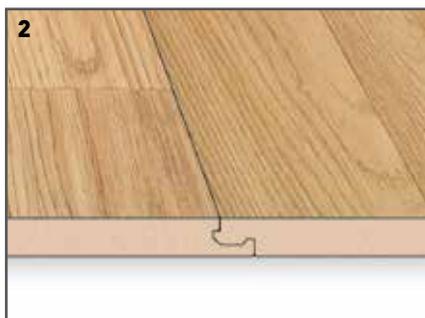

- A** The top surface of the flooring consists of a specially resistant protective overlay film. This is fused with an attractive resinated decorative film into a practically abrasion-proof, hardwearing surface.
- B** Extremely dense HDF fiberboard forms the supportive core (HDF, E1).
- C** On the undersurface of the core, a dampness impeding stabilization film ensures and preserves the high structural stability of Kronotex laminates.

THE CLIC-SYSTEM

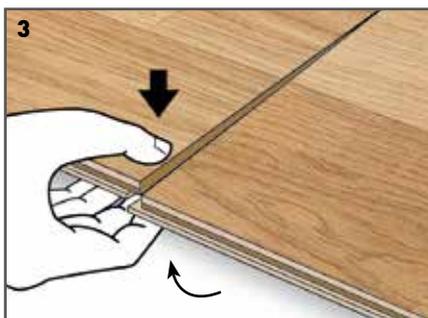

Installing a floor becomes child's play: Simply unpack, lay, snap together and done. No effort involved – your hammer and block can stay in the tool box.

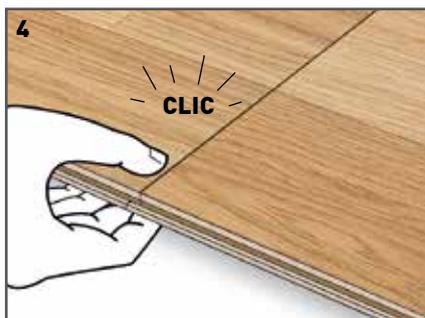

Long side

- Much easier to install.
- Up to 50% quicker to install.
- No hammer, tapping block and pulling bar required.
- Safe and stable.
- You can walk on the floor immediately after installation.

Short side
