WASTENOT
WANTNOT™

VERTILUX HAVE HOME AUTOMATION SOLUTIONS FOR CONTROLLING YOUR BLINDS, AWNINGS AND SHUTTERS FROM ONE SMART DEVICE.

THESE SYSTEMS NOT ONLY IMPROVE YOUR HOME ENERGY USAGE BUT MAKE THE CONTROL OF YOUR BLINDS, SHUTTERS AND AWNINGS A BREEZE.

SMART PHONES, TABLETS AND SMART WATCHES ARE NOW YOUR NEW REMOTE CONTROLS.

ENERGY CONTROL

Home Automation Systems control the amount of energy that your home uses.

Connected blinds, awnings or shutters are controlled by the clever 'Weather Tracker' to open and close your appliances according to the weather.

Ultimately, offering a high level of comfort, convenience, security and energy savings – without breaking your budget!

SYNERGY

Designed to be simple and functional, these systems can be easily integrated with multiple smart home technologies and customised to suit your lifestyle.

Using the power of smart devices and clever technology, you will never have to worry about finding your remote control again.

Just pick up your smart device and connect!

HOME ALERTS

Notifications are sent to your smart device when your blinds have been opened or closed.

You will know what is going on in your home even when you are not there.

REMOTE CONTROLLED HOME AUTOMATION

Your home appliance family will know when you arrive home so you don't need to worry about making sure everything is to your liking and comfort.

Finally a smart device that gives you true remote control, where you can open or close your blinds on the way home from work.

To find out more about our Home Automation Systems, please contact us on 1800 837 845 to speak with one of our friendly representatives.
