

## StreetPrint™

StreetPrint® is an Asphalt imprinting and coating process for realistic brick, slate, stone and other effects

StreetPrint® is the most innovative decorative paving system developed in the last 30 years. It is a patented proprietary technology and application process that produces realistic brick, slate, stone and other effects on an asphalt base.

StreetPrint® combines the flexibility and strength of the asphalt base with leading edge surfacing technologies.

This results in a cost effective, durable surface with low maintenance requirements, long lasting colour and chemical resistance.

From the unique heating equipment to the specialised coatings, our components are designed to work together to provide a superior surfacing system.

StreetPrint® provides unlimited creative freedom for hardscape and streetscape projects and at a cost advantage over alternatives like brick or stone.

Proven Technology

StreetPrint®; has been proven in the field and laboratory. It has been laid in all kinds of applications and conditions throughout the world since 1993 with outstanding results.

Specially designed testing facilities are used to monitor ongoing material quality through accelerated life testing under extreme weather and traffic conditions.

StreetPrint®; Key Benefits

Decorative Appeal A wide range of standard and customised patterns and colours can be combined to create unique and eye-catching designs.
