econoboard

Econoboard™ provides the perfect, insulated substrate for tile adhesive and underfloor heating and dramatically improves efficiency of underfloor heating.

- 100% Moisture and rot proof
- Excellent substrate for tiling
- High thermal insulation properties
- Lightweight and workable
- CFC and HCFC free
- Boosts efficiency of underfloor heating

THE ADVANTAGES

Econoboard[™] has a very high compressive strength coupled with minimal height build up making this unique board perfectly suited for use with our underfloor heating systems on concrete substrates.

Econoboard[™] has a specially prepared surface to provide an ultra strong bond to the substrate using a flexible tile adhesive.

FCONOBOARD & THE ENVIRONMENT

Econoboard[™] is manufactured without the use of CFC or HCFC blowing agents, has a zero Ozone Depletion Potential (ODP), is fully recyclable and will help to reduce your energy consumption.

INCLUDED IN THE RANGE

Econoboard $^{\text{TM}}$ Uncoated 10.5mm Econoboard $^{\text{TM}}$ Coated 6mm Econoboard $^{\text{TM}}$ Coated 10mm

FCONOBOARD™ & CONCRFTF FLOORS

Before fixing Econoboard[™] to any floor make sure it is free from dust or any loose materials.

Econoboard $^{\text{TM}}$ should be adhered using a single part flexible adhesive. If your adhesive manufacturer recommends it, treat the floor with a suitable primer to ensure good adhesion.

Solid concrete floors conduct heat and are also influenced by cold and damp from below. Econoboard™ should be used before tiling for its excellent thermal properties.

green energy

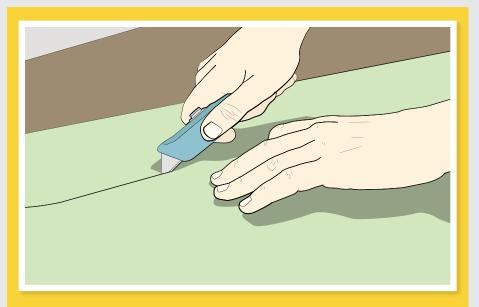

BOOST FFFICIENCY BY 50%

It is particularly beneficial when installing underfloor heating onto a concrete substrate and can boost efficiency by up to 50% by vastly reducing heat up times.

Econoboard [™] Accessories		
STOCK NO	DESCRIPTION	
6015	Reinforcing tape 50Lm	
6016	Zinc fixing washers	
6017	32mm fixing screws	

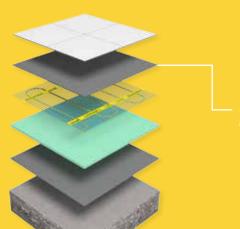

STOCK NO	DESCRIPTION	SIZE (M)
6014	Econoboard 10 5mm	13 x 0 6

Technical Data	
Compressive Strength	200 kPa
Thermal Conductivity	0.031 W/mk
Water Absorption	0.3% v/v
Temperature Range	-50°C to +75°C
Fire Performance	Class B1
Coefficient of Linear Expansion	0.07mm/mk
Shear Strength Mortar	200kPa
Tensile Strength	150 kPa

Why Econoboard[™]?

Econoboard[™] is designed to be a cost effective thermal insulation board used onto concrete and screed substrates to further improve insulation and reduce heat losses into the substrate. At only 10.5mm this board presents a minimal height increase and is ideally suited for refurble hearts.

FIX Econoboard (uncoated) with a layer of flexible tile adhesive

Econoboard™ and underfloor heating

When underfloor heating is being installed on a concrete substrate, 10.5mm Econoboard™ is recommended as a minimum insulation thickness for its superior thermal properties. The thermal properties of Econoboard™ minimise the amount of heat lost through the substrate making your underfloor heating system up to 50% more efficient and cheaper to run.
