

**CS ForDoors** is an innovative range of aluminium, glass and specialised door systems designed to compliment the entire range of CS GROUP products. All our doors are custom manufactured to suit modern design requirements and backed by our five year manufacturer's guarantee. All CS ForDoors are delivered pre-finished and CaviLock architectural door hardware can be factory fitted prior to delivery.

**CS NewYorker** doors are a stylish alternative to conventional timber door leaves.

The NewYorker can be glazed using a wide range of materials, glass being the most popular. The aluminium frame has no visible screws or fastenings and all components have been designed for strength and versatility.

*NewYorker 1-Lite doors with laminated glass.*

*Natural anodised NewYorker multi-lite doors with clear glass.*

## Standard NewYorker Features

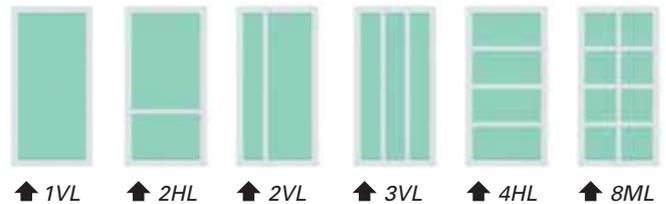

- ▮ The frame is constructed entirely of aluminium so it cannot rust or rot.
- ▮ Suitable for oversized doors.
- ▮ All fasteners used in manufacture are either zinc coated steel or aluminium.
- ▮ Fasteners are not visible on the finished product.
- ▮ Well suited to differentials in temperature (they won't bow or warp).
- ▮ Doors can be anodised or powder coated in the colour of your choice.
- ▮ **CaviLock** hardware can be factory fitted prior to delivery, ensuring a perfect fit every time.
- ▮ Easy to clean and maintain.
- ▮ Suitable for up to 10.38mm thick glazing materials.

## Colours & Finish Options

A range of powder coated and anodised colours are available. Please consult our customer service staff for up to date colour charts.

The NewYorker may be glazed with a variety of glass types and thicknesses, from 4mm through to a maximum of 10.38mm. Alternative materials such as aluminium sheet, panels, Perspex, and MDF can also be fitted to the NewYorker door on site.

## Common Lighting Configurations

## Applications

CS NewYorker doors are designed to complement the following CS GROUP products. For customised design requirements, contact our customer service staff.

**CavitySliders™**

**TrackSystems™**

**WardrobeSliders™**

**Pre-HungJamb™**

## Hardware

Our hardware division, CaviLock, manufactures a range of high-quality mortice locks and handles suitable for sliding doors. If you are considering a lock and handle it may be worth thinking about our factory fitting service, and have us fit the handle for you.

## Quality

Our aim at CS is to manufacture the most innovative door systems available. Every component used within our products is uniquely designed with this in mind and backed by our manufacturer's guarantee.

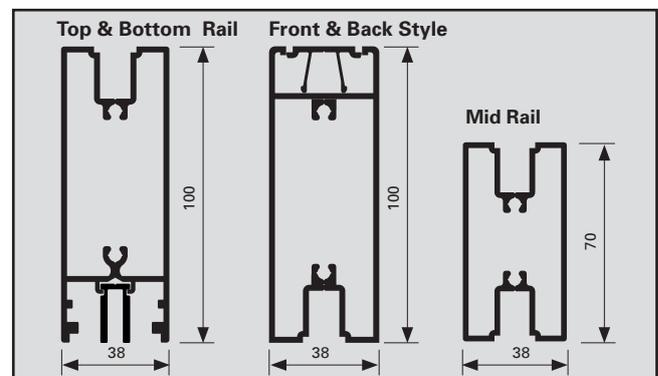

## Technology & Innovation

Our engineers focus on constantly developing new products and refining existing ones. Our products come with a number of unique features:

- 1 Front edge of NewYorker with CaviLock CL100 mortice lock fitted.
- 2 The perimeter frame has no visible screws or fastenings.
- 3 All styles and rails have been designed with thick wall sections. This allows doors to be manufactured to larger sizes.
- 4 Centrally glazed - no clip-on glazing beads.

## Profiles

Drawing is not to scale. All measurements in mm.
