

CLEGG MEDIA

Large Format Printers

Australia Wide

Clegg Media has been involved in many large speciality signage projects around Australia. Currently they are helping to re-brand over 300 Max Employment sites Nationwide. This re-brand includes cut vinyl lettering, backlit signage, large wall wraps and printed contra-vision window signage.

They were the number one choice for printing and installing the G20 signage throughout Brisbane City.

Clegg Media helped the Brisbane river foreshore at Southbank to come alive, printing and wrapping backlit letters on the BRISBANE sign.

They have also installed quirky and bold designs at several bus shelters showcasing several different products from Gold Lotto, BP and XXXX, just to name a few. These designs comprise of routed timber signage, printed paper posters, large printed self adhesive stickers and props from feathers, books, moulded plastics and timber shelves.

Clegg Media specialise in lenticular printing technology. This process uses lenses to give a printed image the ability to change or move as the image is viewed from different angles.

With specialised machines Clegg Media can print onto almost anything, using the best hard wearing UV inks suitable for outdoor solutions. The new Agfa Graphics Jeti Mira helps make Clegg Media stand out, with 6 colours plus white, high resolution printing and large quantity run capacity.
