FLUSH FINISH DOOR JAMB SYSTEM

Producing a contemporary flush finish door jamb with clean lines and inconspicuous detail has never been easier for architects, interior designers and developers.

Creating a smooth transition from wall to door; EzyJamb® is a split-type jamb manufactured from cold rolled steel with a patented profile to produce a strong and secure assembly.

Developed with perforated sides for flush jointing, EzyJamb® gives doorways a clean line and modern appearance.

The system is complemented by a range of hardware to suit different applications.

The EzyJamb Range

EZYJamb Classic – EZC

The EZYJamb® Classic Adjust EZC, comes with perforated sides for flush finishing which produces a contemporary flush finish door jamb with clean lines and inconspicuous detail.

EZYJamb Single Rebate – SRC

The EZYJamb® Single Rebate SRC Trimless door frame is simple to install, and it requires no special maintenance.

EZYJamb Inswing – ISD

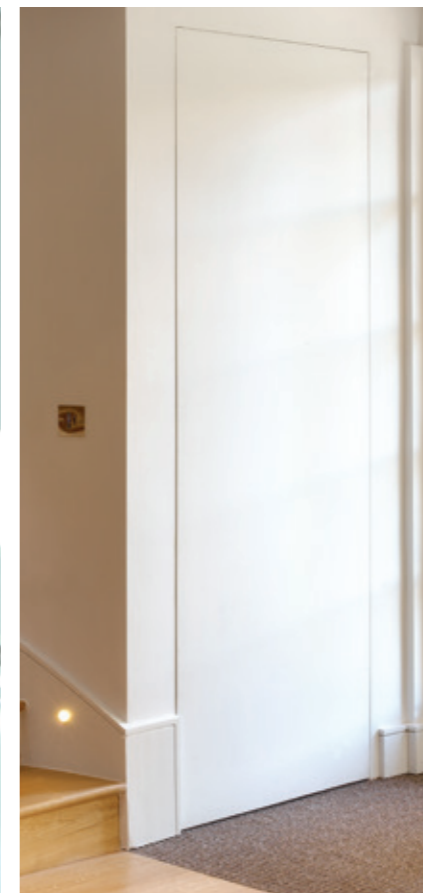

The EZYJamb® Inswing ISD is suitable in applications where you require the door to open inwardly. The unique design of EZYJamb® combines visual appeal, strength and versatility.

EZYJamb® Flush Finish Cavity Sliding System for premium architectural interiors

The EZYJamb® Flush Finish Cavity Sliding System is a specially designed, premium cavity sliding pocket that offers a totally square set finish around the perimeter of the frame giving you a seamless EZYJamb® look right throughout your project.

The unique design gives an absolute minimum of detail, allowing the door to be completely concealed and give the impression that the door does not exist when open. When the door is closed, complete privacy is ensured by using a subtle rebate feature. The EZYJamb® Flush Finish Cavity Sliding System uses a 'zero clearance' head track that eliminates the needs for removable pelmets at the top of the door.

EZYJamb® Flush Finish Cavity Sliding System is available in standard sizes that are suitable for any architectural interior including high rise apartments, domestic housing and modern offices. Custom sizes may be available upon request.

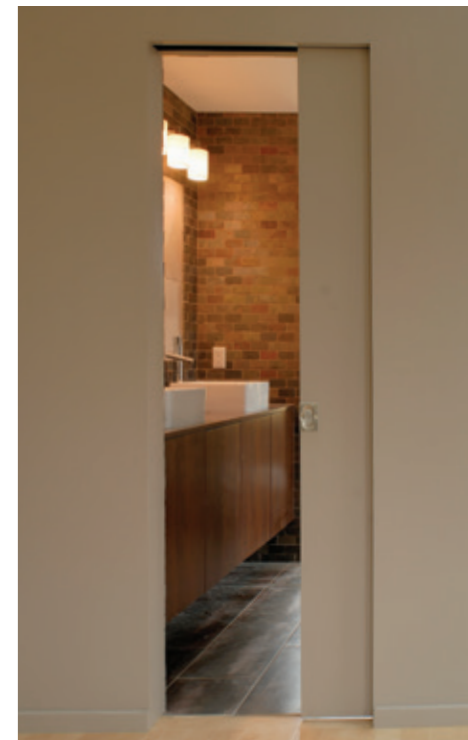

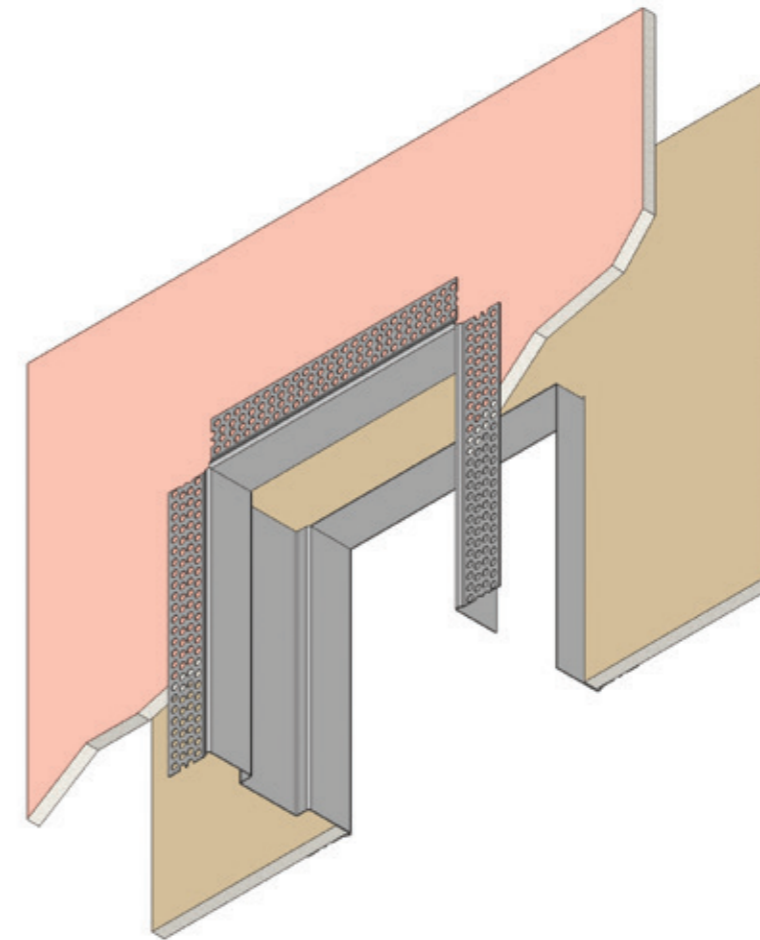

Door Height mm	Door Width mm

The Flush Finish Cavity Slider Kit for any sliding door

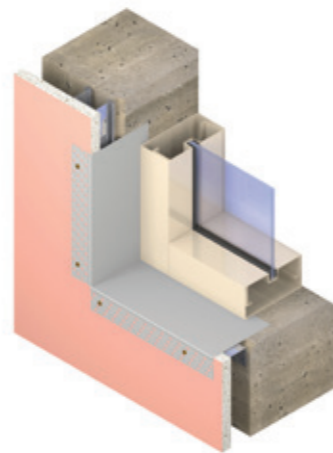

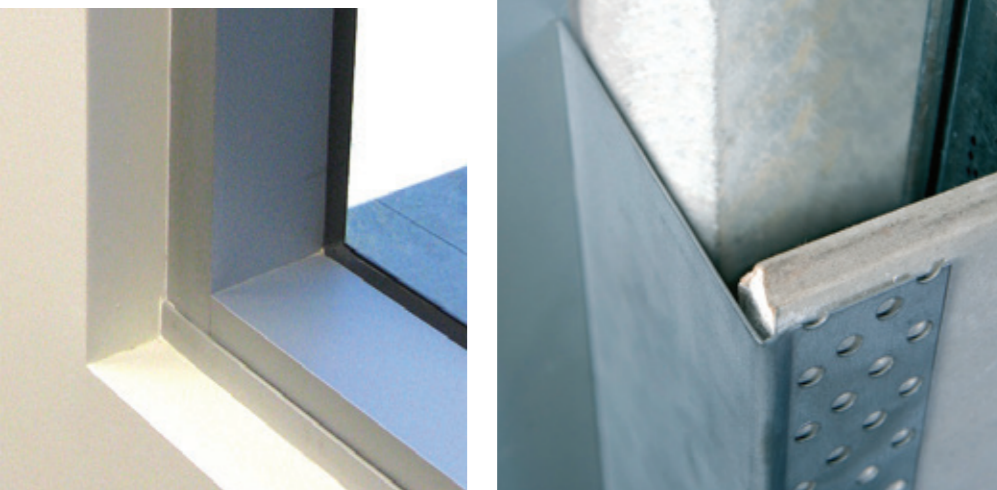

The EZYJamb® Cavkit is used to transform most standard cavity sliding units into architrave free, flush finish doors. A combination of special finishing sections made from premium quality steel encase the door opening to provide a durable, clean line finish that is consistent with other products from the EZYJamb® range.

The dimensions of the EZYJamb® Cavkit sections are designed to comfortably fit on a variety of common cavity sliding door systems from budget pocket doors to premium architectural sliders. Please refer to separate EZYJamb Cavkit datasheet and confirm exact fit prior to ordering.

EzyReveal

- Designed for quick and economical finishing of reveal from 20 to 250mm.
- Manufactured from cold rolled steel providing a strong and secure reveal eliminating warping, twisting, cracking and damage from UV Rays.
- Enquire for custom size reveal lengths (width)

Lift Off Hinge

EZYJamb® lift-off hinges allow for removal of a hinged door without having to unscrew the hinges. Lift-off EZYJamb® hinges are finished in brushed stainless steel for a look with class and style, are easy to fit and time saving. Lift-off Hinges are available in both left and right handing and are recommended for internal use along with Lift-off Channel for the header which creates a deep rebate that conceals the service gap above the door.

The Lift-off channel supplied is designed to fit over the header stop and affixed with construction adhesive.

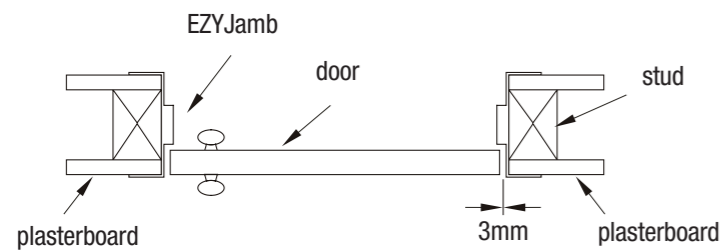

*Custom sizes to suit larger wall thicknesses available.

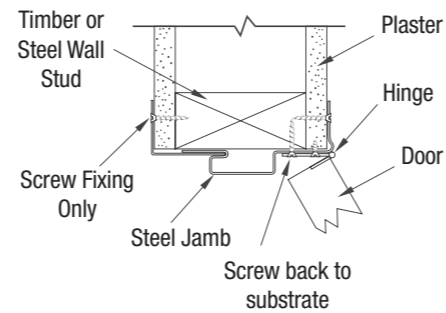

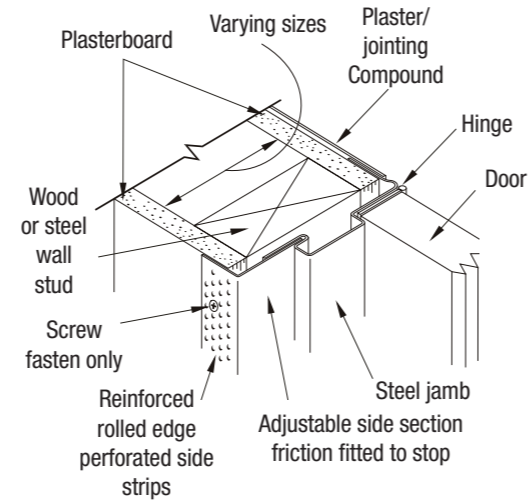

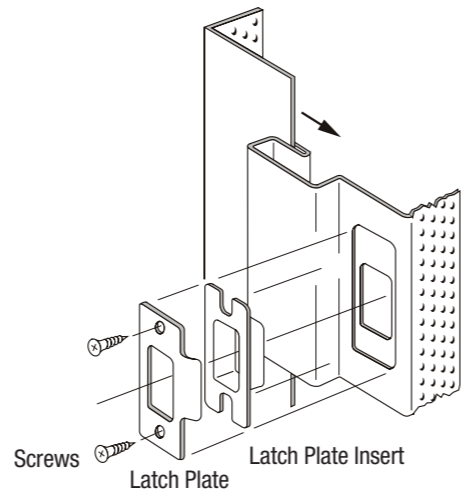

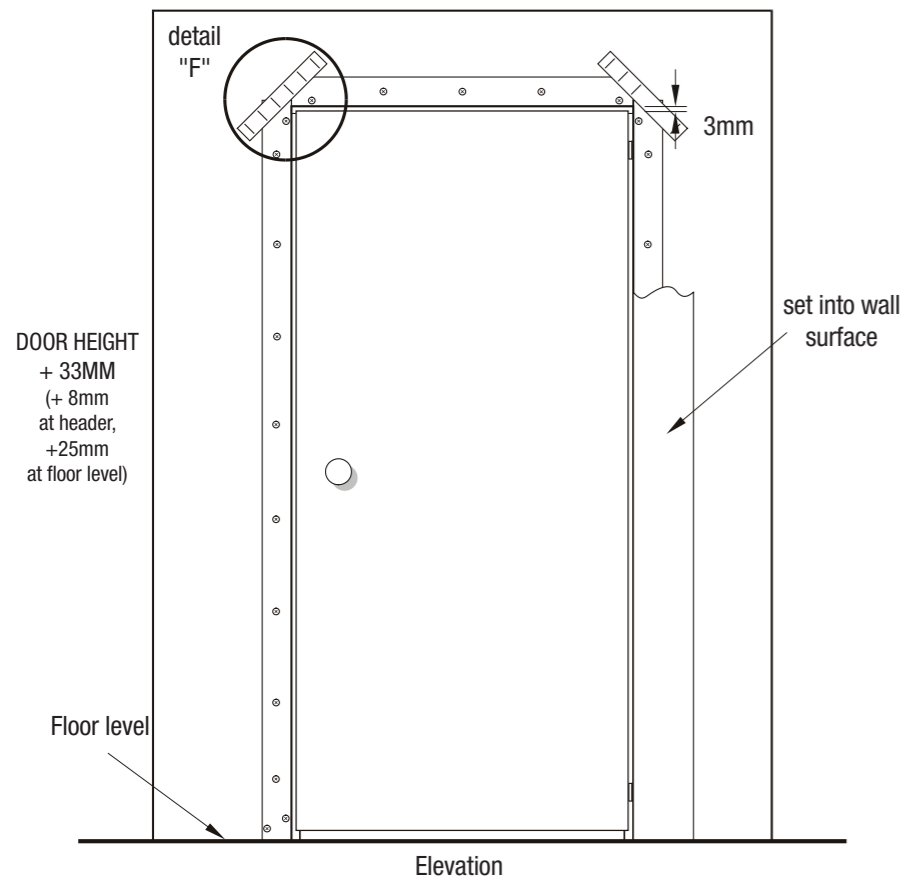

*LEAD TIMES APPLY

Installation Detail

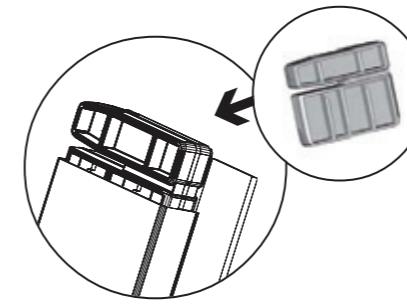

EZYJamb® Ezc steel door frame adjustable for wall thicknesses up to 220mm.

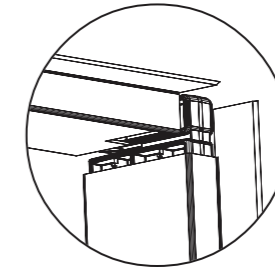

DOOR WIDTH + 15mm
PLASTERBOARD SURFACE

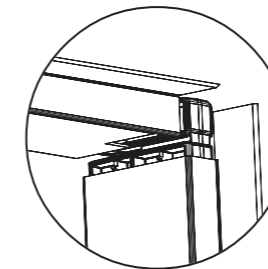

Head Installation

Head joiner as inserted in jamb.

Locate head into joiner and make flush with jamb so the head joiner is not seen.

Remove the remaining head joiner out of the strike jamb into the end of the head (as shown) to receive the strike jamb.

For 35mm, 38mm and 43mm Doors

EZYJamb Ezc trimless door frame

Section C
Standard strike plate height from base of jamb to centerline frame is 1020mm

Hinges available from manufacturer
1. Invisible Type ROCyork RY-45

2. EZYJamb standard Hinges
All standard hinges are surface applied
100mm Stainless Steel (SS)

*Non stock item. Lead time applies.
