# EKU- FRONTINO

TOP OR BOTTOM RUNNING  
EKU-FRONTINO 20 FB

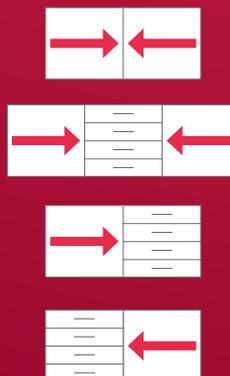

The EKU-FRONTINO 20 FB moves flush-mounted timber doors forward of the cabinet face and then gently slides them over the face of other doors. This ergonomic movement produces an elegant furniture front that is free of the traditional door offset that is found with standard sliding door systems. So now you can have all the advantages of sliding doors mixed with drawer fronts whilst still having all surfaces flush. Or kitchen overhead cabinets with complete access and no protruding doors. The fittings have a weight capacity of up to 20 kg per door and are installed easily, quickly and reliably with three dimensional adjustments. To top it all off, soft close has been built into the fittings to leave a lasting impression of quality and sophistication.

# EKU FRONTINO 40 H

EKU Frontino 40 H is the sliding solution for contemporary design-oriented tall cabinets with flush-mounted doors weighing up to 40 kg. The heart of this sophisticated sliding system consists of the meticulously developed and Interzum Award-winning technology that provides unrestricted access to the cabinet. This premium product is suitable for furniture in private rooms such as receptions, living rooms and bedrooms, and also in public areas, offices and commercial and industrial areas

## EKU FRONTAL 25

EKU-FRONTAL is the sliding solution for frameless and framed glass doors for furniture. Clever design allows the tracks to be mounted above and below the cabinet; allowing the forefront design to conceal them when the doors are in the closed position. These sliding doors therefore offer a particularly light and “floating” impression.

## EKU-CLIPO 16 GK

EKU-CLIPO 16 GK is the exciting new addition to the original and very extensive CLIPO family of fittings for timber, framed glass and frameless glass sliding doors weighing from 16kg to 35kg. EKU-CLIPO 16 GK uses the very best in design and craftsmanship to produce an elegant and seamless solution for frameless glass doors. The polished hardware components are adhered to the glass; resulting in no holes being required. Intelligent design means that the installation and adjustment of doors is fast and simple. And EKU's Self and Soft Closing function is integrated into the system to provide gentle, smooth and reliable closing at all times. Select EKU CLIPO 16 GK for your furniture to experience its superior qualities for yourself.

## EKU-CLIPO 16 GPK/GPPK

EKU-Clipo 16 GPK/GPPK is designed for two top-running glass doors weighing up to 16 kg with the Infront design. The running rail is groove mounted and there is no requirement for a groove in the base. The top edge of the glass is integrated in the fixing profile for a concealed installation, allowing the doors to be seen from both sides. The aluminium glass fixing profiles can be cut to size to suit the width of the doors and installed with ease.

## EKU-LIBRA 20H IF/FF

The EKU-LIBRA 20 H IF/FF sliding door fittings are designed for one or two vertically sliding doors that can move independently or synchronized with each other. The cleverly developed system allows Infront or Forefront designs without the need for different components or cabinet dimensions. Installation has been further simplified by allowing the use of the second door (synchronized design) or standard timber materials to be used as counterweights (independent design).

## HAWA- APERTO 40 F

HAWA Aperto 40 F provides a unique solution for multi-door cabinet fronts that can be stacked out of sight in a niche or cabinet compartment. When closed the cabinet front is flush with uniform gaps between the door panels, providing an aesthetically pleasing design to any room. When open, there is unrestricted access to the entire cabinet width. Suitable for all types of furniture with frequently opened doors such as media walls, storage cabinets, shop installations, counter-top to ceiling shutters, kitchenettes and anywhere that requires space saving door openings. With this sophisticated system, the same hardware kit may be used for left and right-hand stacking areas. The number and width of door panels is also flexible.

## SLIDO FOLD 40/70

Slido Fold 40/70 combines the best of all solutions. Do you require the doors to be flush when closed? Do you require the doors to one side? Do you require the doors to slide out of the way? Slido 40/70 provides all of the above. The functionality of the system is brilliant, for the folded doors can be moved from side to side as singular pairs or in grouped pairs. As a result, the interior cabinet space is not obstructed and access is therefore not restricted. Select Slido Fold 40/70 for your next project to experience maximum functionality for yourself.

## HAWA- CONCEPTA 25/30/50

The HAWA Concepta 25/30/50 pivot/ slide system is the ideal choice for those looking for a convenient, easy-to-fit solution for pivoting glass and timber doors weighing up to 50kg that slide away to save space. All the more so as HAWA Concepta can handle virtually any door dimensions. It smooths the path for creative ideas with various installation options, profiles and handles. It can even close a wall recess without any cabinet carcass.
