Avalon Aluminium Park Shelters

Quality Manufacturing | Low Maintenance | Versatile Design

Our aluminium park shelters are specifically engineered and manufactured for use in corrosive coastal environments. Based on our popular steel shelter designs with the added benefits of aluminium, they incorporate the best of both worlds in terms of aesthetics and design life in an asset that will stand the test of time.

The light weight materials of our Avalon aluminium park shelters makes them easier to handle and install than more traditional shelters. Aluminium is also an environmentally friendly option, containing a high percentage of recycled materials, and being 100% recyclable at the end of it's use.

www.landmarkpro.com.au | ph: 1300 768 230

K640 Series - Aluminium Park Shelters
