KEY
PROJECTS

ZINTL

Trust. Reliability. Integrity.

HVG Facades, an Australian-owned market leading supplier of premium external wall cladding systems for the construction industry.

As a strong and successful business with a history dating back more than 50 years, HVG Facades distributes trusted brands including MondoClad®, ZINTL®, ALUCOBOND® PLUS and Swisspearl®.

HVG Facades product warranties give you long-term peace of mind and our quality service is just a phone call away.

We stand behind our products and the quality underpinning them, our service, and our people.

OUR TRUSTED BRANDS

HVG Facades' products are used across a diverse range of exterior cladding, remedial and recladding applications across the residential, commercial, industrial, education, aged care, sporting, and healthcare sectors.

Whether it's a new commercial project or the recladding of an existing combustible construction, MondoClad®, HVG Facades' premium solid aluminium panel solution, can be applied to even the most complex designs. MondoClad® is manufactured with stringent specifications and quality control requirements, adhering to strict NCC Compliance.

The ZINTL® aluminium interlocking cladding system is a favourite with architects, property developers, designers and builders alike for residential and commercial projects. Timelessly elegant and stylish, ZINTL® is available in a broad spectrum of colour options and weatherboard profiles.

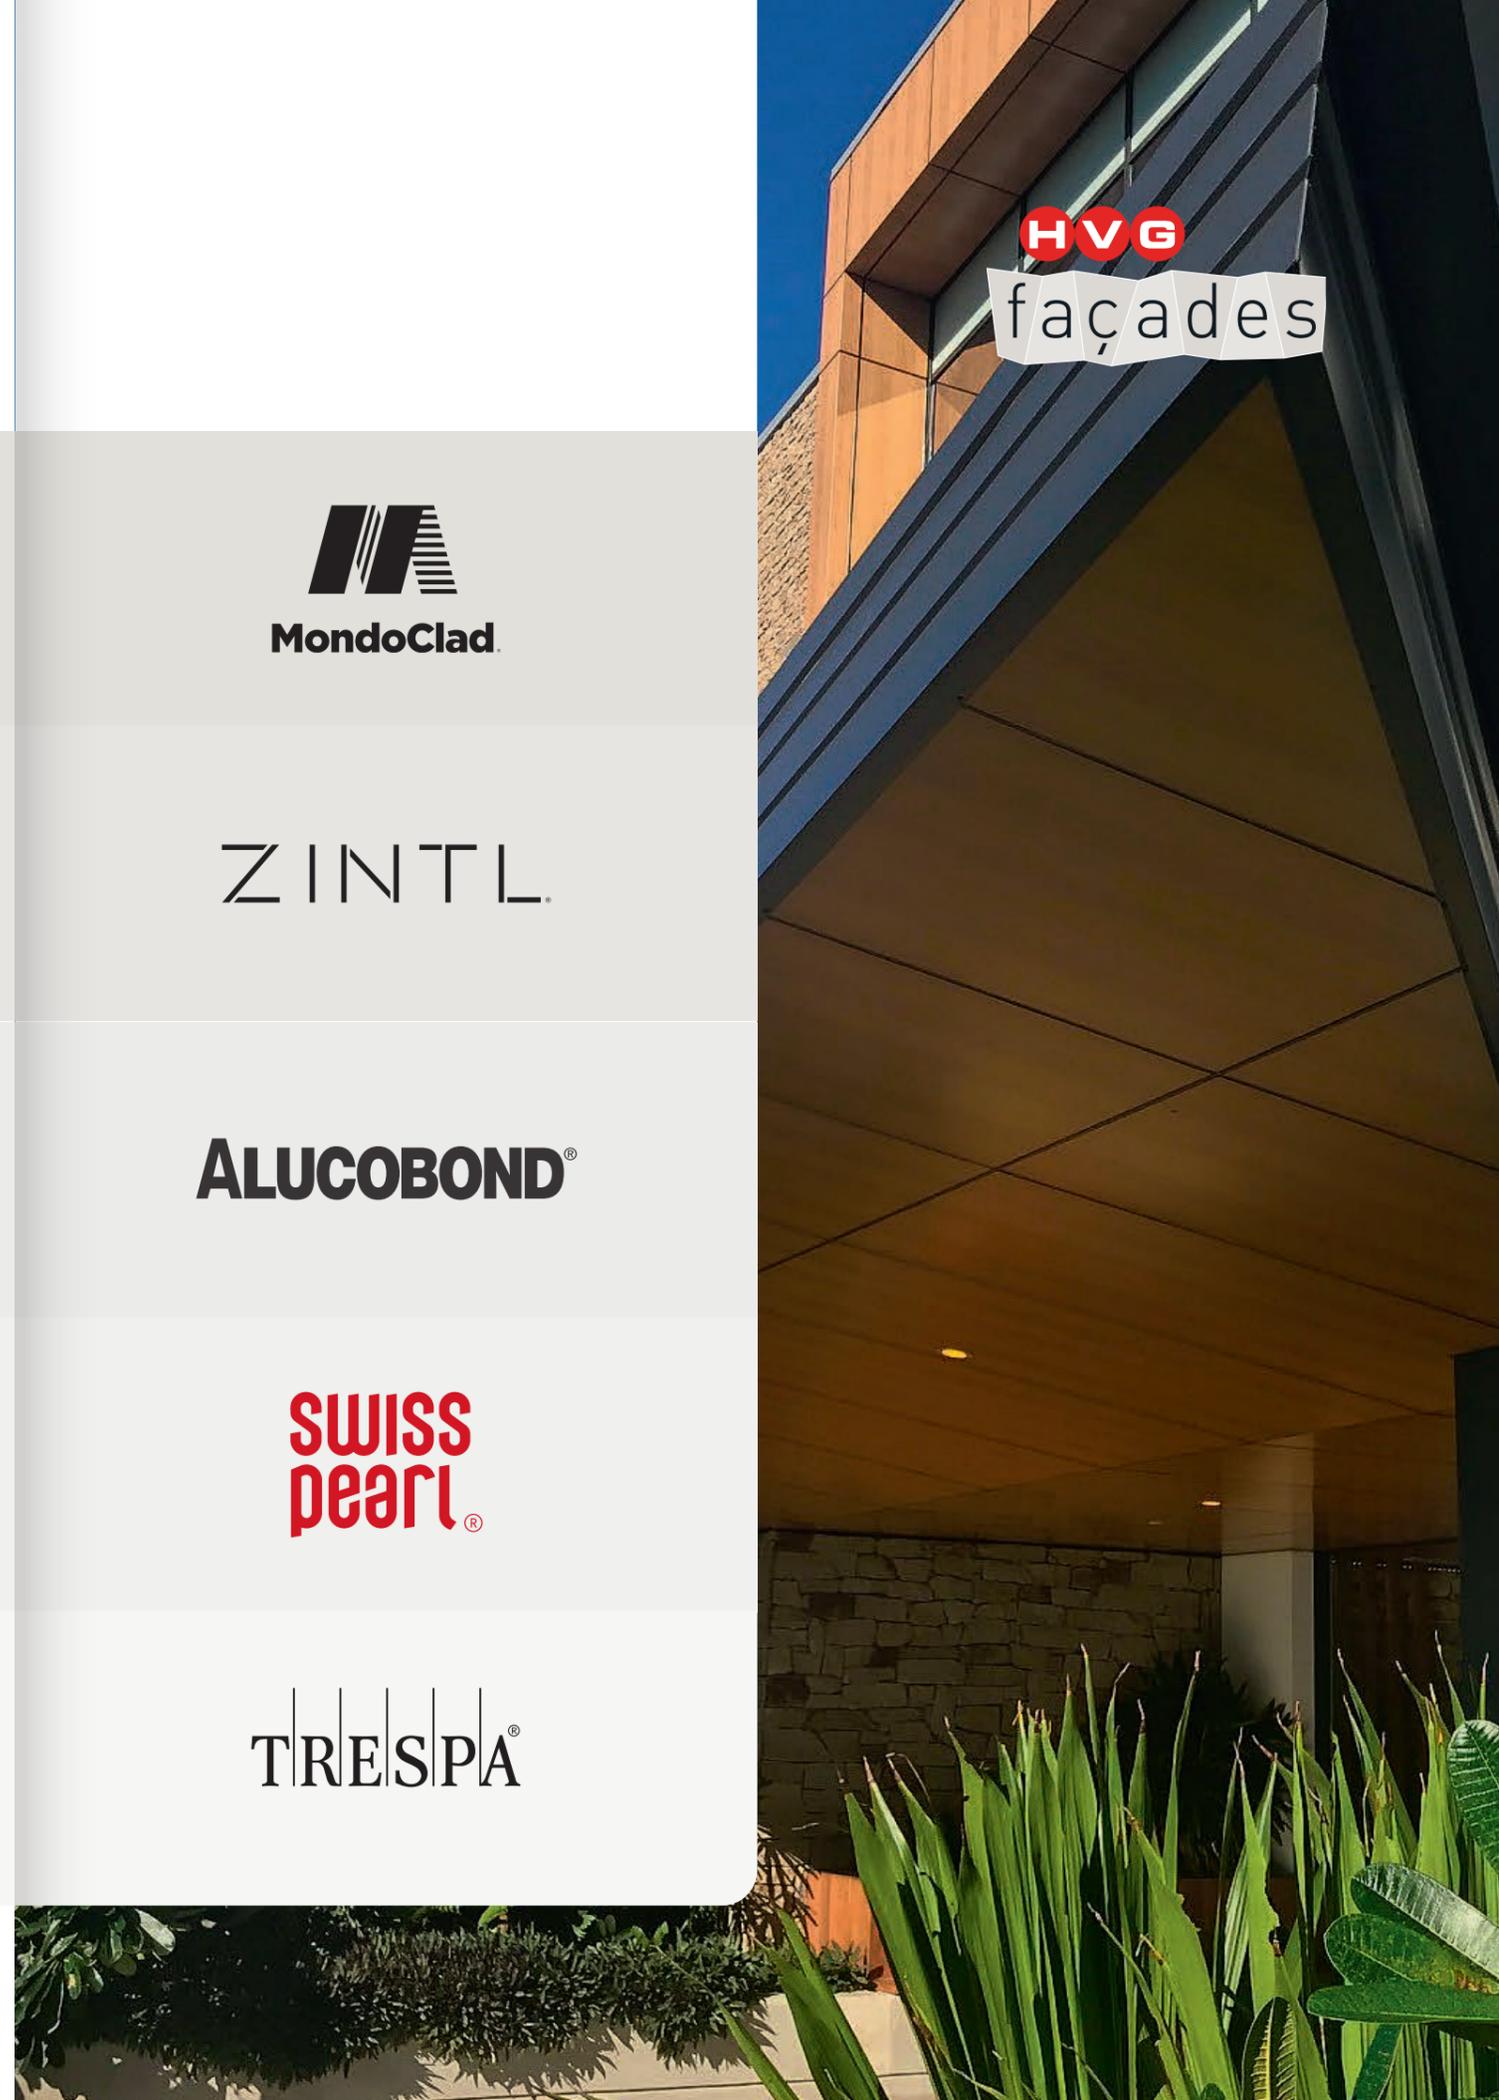

The ALUCOBOND® PLUS product range, manufactured in Germany by 3A Composites, is the most widely recognised aluminium composite material in the world. ALUCOBOND® PLUS is weather-resistant, highly durable and available in more than 50 colours, plus part of the range has the added ability to be bent, curved and shaped.

HVG Facades' Swisspearl® range of high-density fibre cement cladding brings a touch of European design to the Australian landscape. Swisspearl®'s versatile custom fabrication will suit every individual's needs. Coming in an extensive array of colours, textures and finishes, it's a premium product that offers endless design possibilities.

Trespa® Meteon® is manufactured using Trespa® in house technology composed of 70% wood and 30% resin. These unique materials provide stable, dense panels with outstanding strength to weight ratios, built for Australia's harsh climates and conditions.
