## BELGENNY OVAL

**SAB601 Channel**

- Heel Guard Type Grate
- Class A & B
- 150mm x 150mm x 1000mm
- Anti-Theft Lockdown

Camden Falcons FC recently received an upgrade to their own clubhouse at Belgenny Oval. The owners transformed the clubhouse with the SAB600.

The benefits of a 'heel guard' type grate with flexibility and durability of a polypropylene drainage channel unit achieved the requirements that is ideal for football boots and heavy foot traffic.

With a 2 point security fixing, to keep it rattle free from vehicular movements and secure it from unauthorized access, the back entry of Belgenny Oval is ready for all the foot traffic of everyone who comes to support the Camden Falcons at their home games.

## LYNE PARK- ROSE BAY

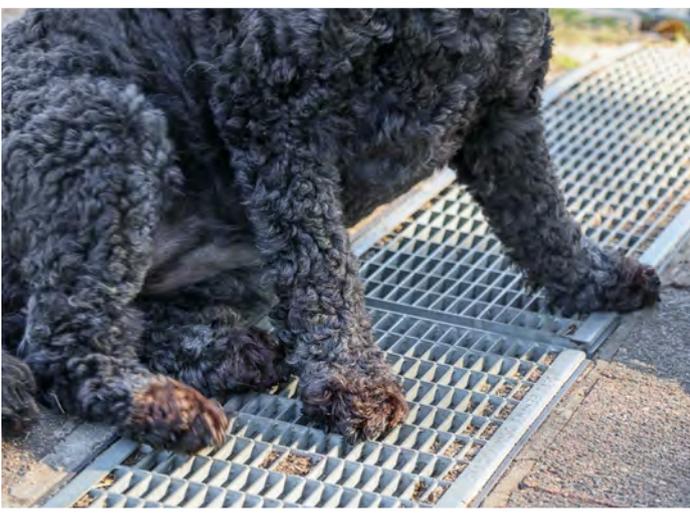

**SAB601 Channel**

- Heel Guard Grate
- Anti Theft
- 150mmx150mmx1m

Lyne Park is a large Sydney Harbour foreshore park with a diverse range of recreation opportunities including a basketball court and public tennis courts. The park has large grassed areas, shady trees for picnics and a café. It provides access to Rose Bay boat ramp, a commercial seaplane base, and public and commercial ferry services.

The pathway around the popular park required drainage to stop the accumulation of water which created a slip hazard around/on the heavily trafficked pathway. SABDrain 601 grate & channel was installed in sections along the pathway to aid in quick & efficient drainage of water. The 601 Class B rated channel and grate has been designed to offer maximum versatility while delivering a lifetime of low maintenance service. Each galvanized gate comes with a 2 point security fixing, to keep it rattle free from vehicular movements and secure it from unauthorized access. Easily removed with a key, the 601 grates can be taken off for cleaning. This is a heel guard type grate, preventing heeled shoes, bike/pram wheels, dog paws and other objects from becoming stuck in the grate.

## GIZO MARKET - SOLOMAN ISLANDS

**SAB601 Channel**

- Heel Guard Grate
- Anti Theft
- 200mm x 300mm x 1m

SABDrain was so proud to see 140 meters of our 601 installed at an amazing new community market facility in Gizo, an island located in the west of the Soloman Islands.

The aim of the redevelopment of the Gizo Market is to provide secure facilities for women to sell their market produce, enabling them to engage in the economy and improve the livelihoods and health of their families. The impacts of severe cyclones, flooding & more are threatening the integrity of these facilities. Gizo Market has ensured it is designed to withstand wind speeds of a Category 5 cyclone and resist sea level rises.

Working closely with the women producers, the architects were provided specifications to meet women's needs, as well as current climate projections developed under Australia's Pacific climate science and information services. SABDrain's 601 fit perfectly with the brief with its lockdown, heel guard grate. As the grates are in 1M pieces, it is an easy process to remove the grates to clean the inside of the channel. Smooth internal surfaces of the SABDrain channels ensures surface water is drained quickly & efficiently.

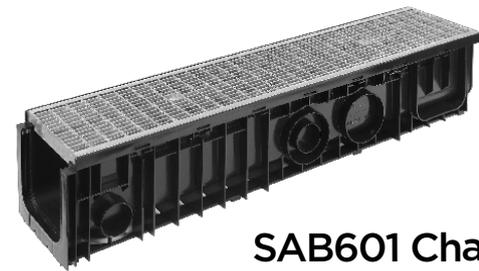

Supplied by Reece Plumbing, South Melbourne and installed by Reeves International, SAB was happy to be a part of such an amazing project.

## DARLING HARBOUR

**SAB601 Channel**

- Heel Guard Grate
- Anti Theft
- 150mm x 150mm x 1000mm
- 2 point lockdown

Darling Harbour is one of Sydney's CBD's buzz places. The former dockside area and small harbour has gradually been transformed into one of the biggest urban redevelopments Sydney has seen. This proud 22 hectare precinct is home to a lot: the new International Convention Centre, Exhibition Centre, Hotels, Bars, the Chinese Gardens, just to name a few. The aim of the amazing landscape design (designed by HASSELL) was to 'wow' first time visitors to the space, as well as delight regular visitors to the precinct.

Opposite the International Convention centre amongst the gardens lies a synchronised misting surprise. SABDrains channel and metal grate was needed to provide a channel and grate for the carrying of electrical cables and as part of the amazing landscape design at. Synchronised uplights custom built within the grate come on with misting fog jets giving the 601 channel and grate its own light show, as well as keeping the gardens nourished. The grate is kept secure by a 2 point lockdown system, ensuring the grate is locked from unauthorised access.

## MANLY PRECINCT

**SAB601 Channel**

- Heel Guard Grate
- Anti Theft
- 150mmx150mmx1m

A short 3 minute walk from the beautiful Manly Beach is Manly Plaza with a friendly relaxed vibe, and nestled on the edge of the pathway is a long straight run of SABDrain popular 601 drain. Fitting perfectly into the Sydney scene with a no fuss galvanised grate & polypropylene channel. The Northern Beaches Manly Council upgraded to create a modern spacious, pedestrian and bike friendly boulevard.

The revitalization of Short Street included new seating, paving, lighting, signs and bike racks. A large lawn provides a place for families to relax and enjoy the entertainment that now takes place in the Plaza. The installation of our 601 drainage system paved boulevard has seamlessly fitted into this new scene. The job requirements of being a class B load rated for pedestrians and light commercial vehicles was easily attained to by using our 601 series. The use of the 150mm x 150mm channel ensures the grate intakes a large amount of water. A 2-point security locking keeps it rattle free from vehicular movements and secures it from unauthorized access. The Heel Guard type grate was specifically designed to keep the public safe by providing a grate with holes less than 8mm no heels are caught inside the grate.
