ABOUT ALUCITY

Alucity Architectural Product Supply is a licenced fabricator of the Darley Aluminium window and door systems, designed for residential and commercial applications. Based in Australia, Alucity in partnership with Darley Aluminium works with their extrusion factory in China to manufacture finished doors and windows using their Australian designed and tested systems.

Whether it is a large scale project supplying windows and doors for multi-level apartment buildings or a small scale operator, Alucity can manage your project from start to finish.

Alucity has access to Darley's infrastructure, resources and are able to access stock from local distribution centres.

Project: SOMA Wellness
Client: Red Eye Constructions
Builder: Red Eye Constructions
Site Address: 7 Gregory Hills Drive, Gregory Hills NSW
Sq: 750

THE ALUCITY SOLUTION

The Complete Solution

Unlike other overseas manufacturers Alucity offers the complete solution, looking after your project from the beginning to end. From the initial stages of assisting with drawings through to providing warranties at the completion of the project, Alucity works closely with you during the entire process, to fabricate and supply the finished product.

Australian Standards Compliant

Alucity fabricates the Darley ClassicView and CityView window and door systems in all their projects. These products have been designed and tested by a NATA approved laboratory and comply with Australian standard AS2047.

Alucity's customer orientated approach will ensure personalised service, global warranties and Australian hardware warranties.

Expertise

Based in Erskine Park (NSW) and Keysborough (VIC), the Alucity team have been managing large scale fabrication projects in Australia for more than 5 years. Their dedicated team comprises of Project Managers, Project Co-ordinators and Administration staff, who together have a combined knowledge and expertise within the aluminium industry.

Alucity is the licensed fabricator of Darley Aluminium, leading suppliers of aluminium extrusion products & components in Australia for over 22 years. Being part of the Darley group means that Alucity, can utilise Darley's infrastructure, resources and nationwide stock availability.

Relationship Management

Alucity and Darley Aluminium have a long standing and well-established relationship with Zhongya, one of the largest aluminium extrusion factories in Guangdong, China. Their close relationship with the extruders in China, means they have the flexibility and resources to modify and enhance the Darley system to meet your individual projects requirements.

Established Process

Alucity's comprehensive and well-established process will ensure that all product quality measures are monitored and adhered to.

PROJECT MANAGEMENT PROCESS

There are five easy steps in the Alucity project management process, we summarise these below:

1 Quotation

The process starts with connecting with the client and understanding their individual needs. Upon receiving the enquiry, the Alucity team requests a summary of information such as project drawings and specifications. Alucity then uses the information provided to input the relevant data into one of our software platforms (*V6* or *Logikal*).

2 Surface finishes and hardware

Samples of the paint finish, glass and hardware are provided to the client for approval prior to procurement of product for fabrication.

3

Production Schedule

Once the schedule has been established, the Alucity team liaise with the fabricator in China to book in the production. Once this has been finalised, a supply agreement is issued for signing and the fabrication process begins.

4

Delivery and shipping

National

Liaise with Darley Aluminium regarding delivery of aluminium and hardware supplied nationally.

International

Liaise with the fabricator and the shipping agents with regards to all shipping documentation required.

5

Warranties, Service/Completion

Upon completion of the project relevant documentation is provided.
