Mini Jet Dryer

The Mini Jet Dryer offers a great compact hand dryer solution, suitable for use in a number of locations, especially lighter use areas with limited space and is ideal for use in disabled toilets. Some features include:

- Reduced power consumption of only 880 Watts, up to 70% savings in power over conventional hand dryers
- With an air speed of 300 kph or approx. 83 m/s, it is up to 4 times faster than conventional hand dryers and providing a faster drying time
- Anti-bacterial air filtering and antibacterial coating, offering a cleaner, more hygienic hand dryer experience
- With a drying time of 10-20 seconds, hands are dried in less than ½ the time of conventional hand dryers
- Water collection of up to 250 hand dries, reduces mess and risk from wet floors
- Low noise level of approx. 75 Db

Eco Jet Dryer

The Eco Jet Dryer is a fantastic cost effective replacement for any conventional hand dryer, offering fast drying time without the high power consumption. Some features include:

- Reduced power consumption of only 900 Watts, up to 70% savings in power over conventional hand dryers
- With an air speed of 320 kph or approx. 88 m/s, it is up to 4 times faster than conventional hand dryers
- With a drying time of 10-20 seconds, it dries hands in less than ½ the time of conventional hand dryers
- Made from die-cast aluminium, offering a solid vandalism resistant covering
- Low noise level of approx. 70 Db
- Costs less than some other conventional hand dryers

JET DRYER HAS BEEN CHOSEN BY MANY CUSTOMERS, OVER ALL OTHER HAND DRYING METHODS!!

Here are the reasons why:

1. Cost Savings

Over 90% savings compared to paper towel and less than 1/3rd of the power consumption of conventional hand dryers. A Jet Dryer hand dryer can dry up to 20 people's hands for the price of 1 paper towel and up to 3 people's hands for 1 use of a conventional hand dryer.

2. Environmentally Friendly

Less dependence on natural resources and reduction of carbon foot print are two great advantages with our range.

3. Fast

Approx. 10-20 seconds complete drying using up to 540+ kph air blast.

4. Quiet

Less than half the noise of other hand dryers – approx. 65-75 Dba.
(every 5 dba represents a doubling of noise)

5. Hygienic

Most models have anti-bacterial coating with some units offering anti-bacterial air filtration removing up to 99.95% of the bacteria from the air.

6. Low Maintenance

Most models offer water collection tanks to save mess and potentially dangerous wet floors. All air filters are fast and easy to clean/replace.

7. Deodorising

Some units have air fragrance /sanitising options.

8. Reliable & Safe

3 year parts warranty, designed and built to last. All units have temperature and electrical safety sensors with burn resistant plastic and automatic cut off.

9. Easy Installation

All come with power leads and power plugs or they can be hardwired.

10. Stylish

No method of hand drying looks so good.
