# Select Staging Concepts

At Select Staging Concepts, we design and manufacture Australian-made staging systems to suit every staging solution.

Born out of generations of furniture building artisans, we are a trusted family-owned Australian company, delivering staging systems to businesses, schools, churches and organisations across the country.

For over two decades we've been manufacturing quality staging systems and products, made to order in our Melbourne workshop.

From small beginnings, we've grown to become market leaders in the design, production and installation of permanent and portable staging systems, choir risers, tiered seating, access ramps and a wide range

of associated stage products. We offer a huge range of staging options – choose from our bespoke products, or customise a design specifically to suit your purpose and location.

# QUATTRO

Our QUATTRO Stage System is the preferred portable or permanent stage solution across multiple industries. It is currently used in more than 400 venues nation-wide – a testament to its strength, quality and adaptability.

Designed and manufactured in Australia, the system is backed with a full 10-year manufacturer's warranty on parts and labour for peace of mind.

All-weather QUATTRO podiums easily assemble outside for those special outdoor performances, giving you even more event flexibility.

## Features and Specs

	QUATTRO
Standard Podium Dimensions (mm)	2000 x 1000 1000 x 1000
Podium weight (kg)	35kg (2000 x 1000) 22kg (1000 x 1000)
Design load (kg/m <sup>2</sup> )	765 evenly distributed
Leg Dimensions (mm)	40 x 40
Materials	Aluminium Timber plywood
Australian Made	✓
Warranty	10 year
Standard Leg Heights (mm)	200 / 400 / 600 800 / 1000
Custom Leg Heights (mm)	200–2000
Add Adjustable Height Legs (mm)	400/600mm, 600/1000mm or 1100/1300mm
Podium Insert	22mm Structural Radiata Ply with Timber Stain or 18mm Structural Radiata Ply with 4mm Marine Grade Carpet

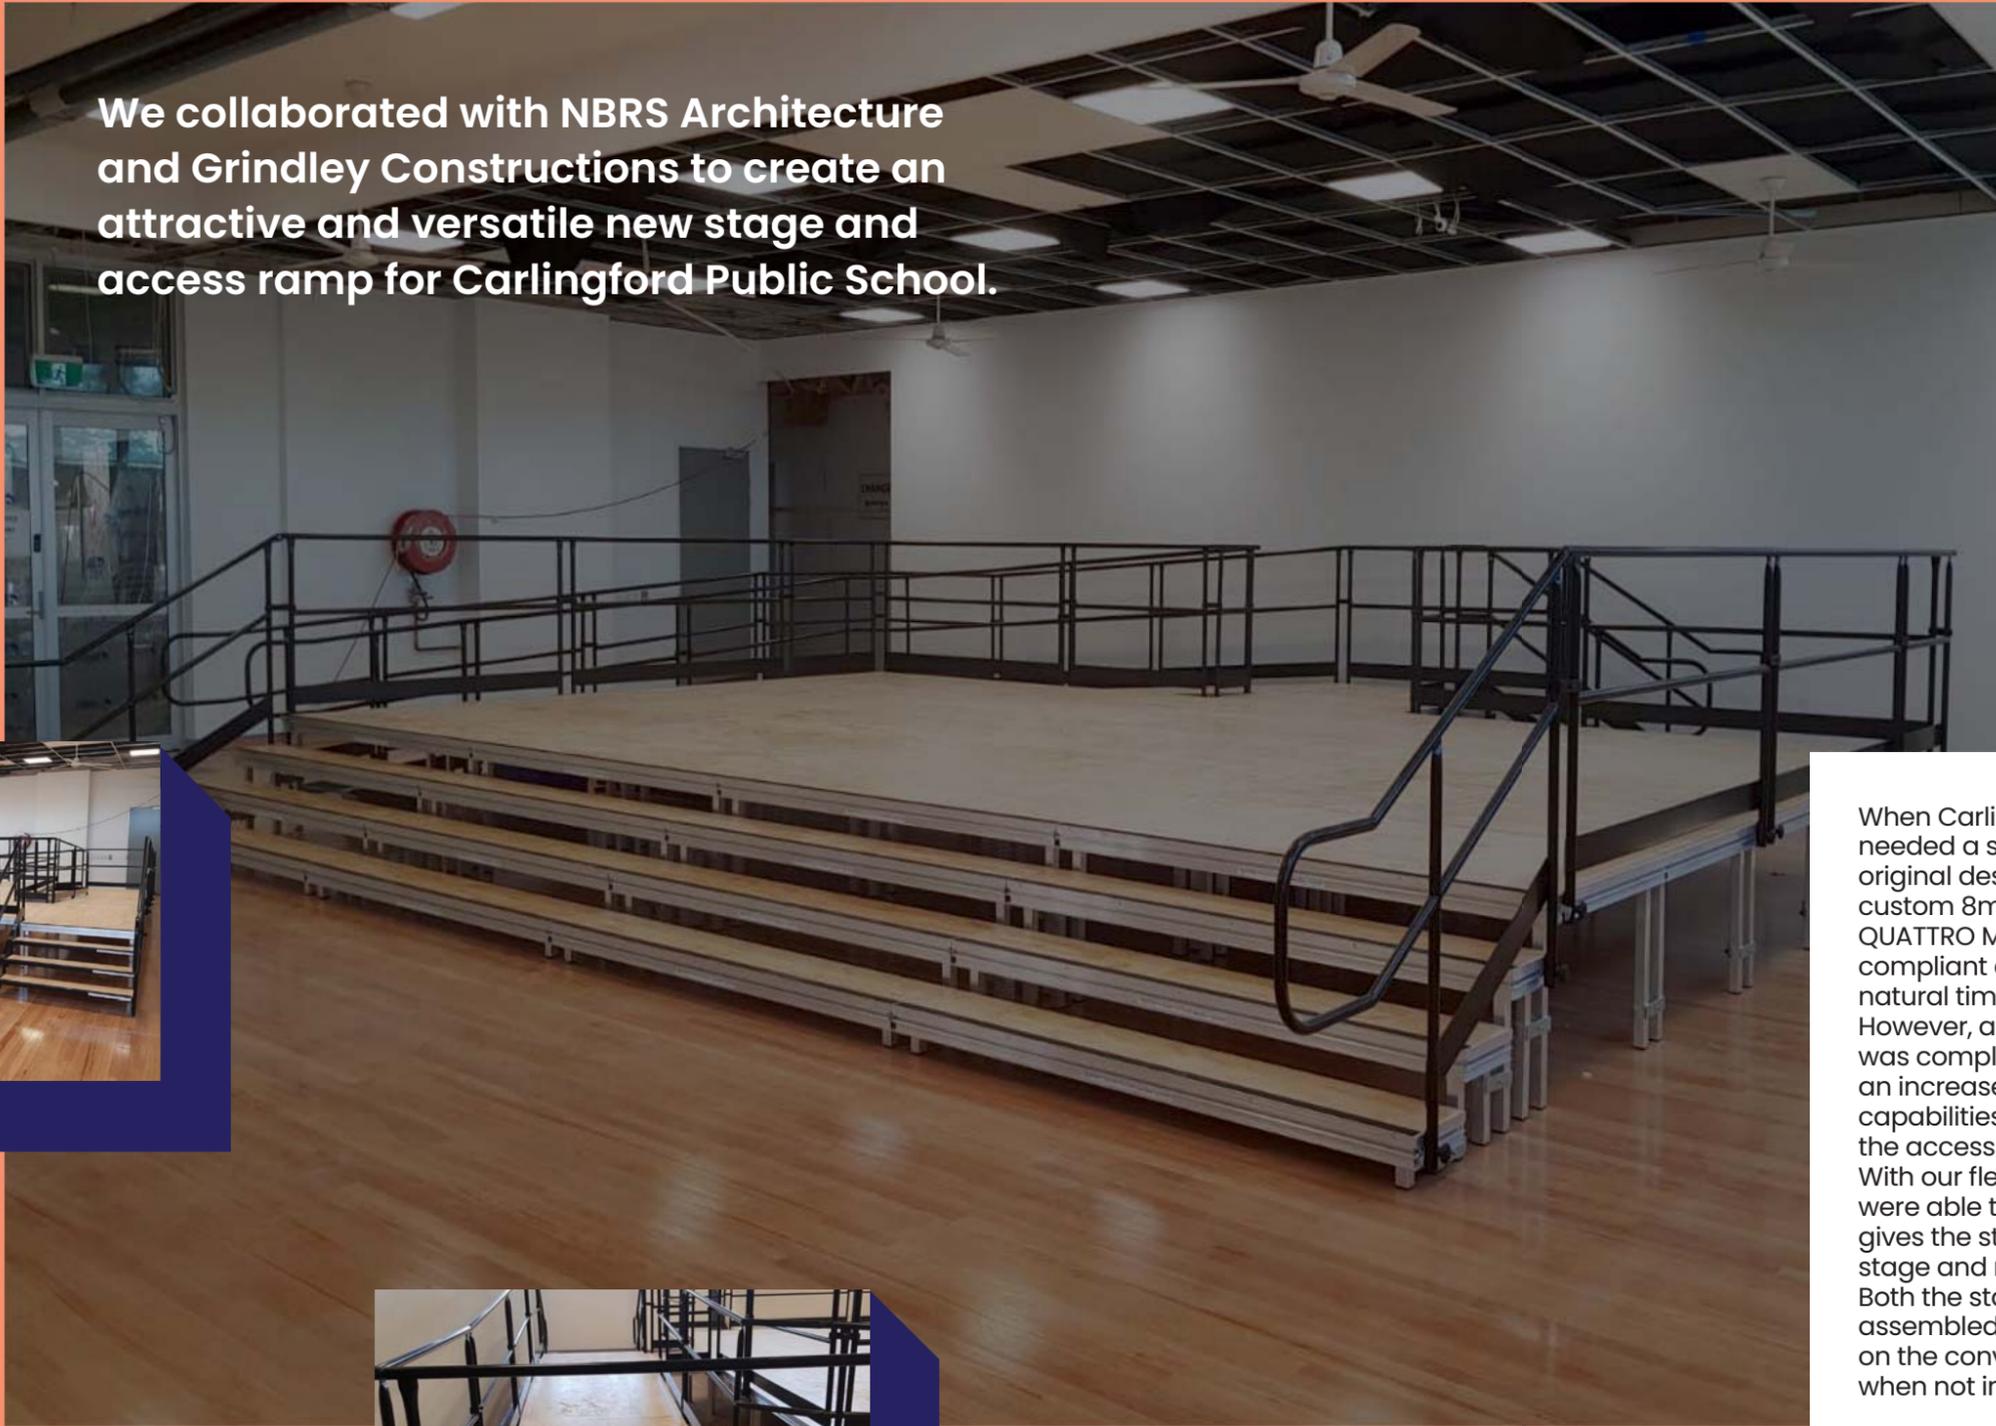

The QUATTRO Modular Stage System is our most popular solution due to its flexibility and ease of use. Available in a variety of podium shapes and dimensions, the entire stage can be quickly and easily assembled and removed by one or two people. Customise your stage with accessories from our comprehensive range and select your choice of colour and finish to complete the look.

Finish options: Maxi Hex non-slip plywood, marine grade carpet and timber stain in a variety of colours.

**Storage:** The QUATTRO Storage Trolley Kit contains four wheels and a handle which are added to a podium, allowing for up to 20 podiums to be stacked on top (that's 40m<sup>2</sup> of staging stored in 2m<sup>2</sup>).

**Operation:** Place aluminium legs in the corner brackets and tighten wing nuts by hand, then secure the leg by sliding in the T piece. Podiums are attached with a hand tightened Klemm-fix connector, accessories are attached to the podium aluminium extrusion using T bolts, and hand wheels are finger tightened.

We collaborated with NBRs Architecture and Grindley Constructions to create an attractive and versatile new stage and access ramp for Carlingford Public School.

SELECT

When Carlingford Public School needed a stage for their hall, the original design requested was a custom 8m x 5m@600mm high QUATTRO Modular Stage with AS1428.1 compliant access ramp finished in a natural timber stain finish. However, a few months after the stage was complete, the principal requested an increase to the stage floor area capabilities to extend the space when the access ramp was packed away. With our flexible modular system, we were able to design a solution that gives the students a much larger stage and more performance options. Both the stage and ramp may be left assembled, or can be packed away on the convenient storage trolley kits when not in use.

# DIVA F&R

Because we only use quality podium finishes, DIVA Fold & Roll may be used in both interior and temporary exterior event settings

Portable staging solutions

The ultimate no-fuss staging solution, the DIVA Fold & Roll is designed with efficiency and simplicity front of mind. The complete unit is wheeled along on its easy glide castor wheels into position, the wheels are locked and the stage podium is lowered. The gas-struts make lowering and raising the podium a smooth process every time. Our unique Australian design eliminates pinch points and heavy lifting, and it can easily be set up and taken down by one person. Each podium may be used singularly, or you can join multiple Fold & Roll units together to create a variety of size and shape configurations. Once the stage is no longer required, the stage podium units store upright slotted compactly together making storage a breeze, even when space is limited.

Customisations: Marine grade carpet is the standard finish, or alternatively, you can opt for a timber stain finish. Black is the standard colour for stage valances or ask about alternative colour options to suit your branding. You can also add your school or company logo as we embroider to order.

## Features and Specs

	DIVA F&R
Standard Podium Dimensions (mm)	2400 x 1200 Custom Podium Size available
Podium weight (kg)	55 (2400 x 1200)
Design load (kg/m <sup>2</sup> )	765 evenly distributed
Materials	Aluminium Timber plywood
Australian Made	✓
Warranty	10 year
Standard Leg Heights (mm)	300/ 400/ 600
Stage Podium	22mm Structural Radiata Ply with Timber Stain or 18mm Structural Radiata Ply with 4mm Marine Grade Carpet
Storage Space	Multiple Stage Units slot simply into each other for compact storage

If you need a stage that is fast and easy to erect and store, the DIVA Fold & Roll is the proven solution.

# PILOT

## Portable staging solutions

**Operation:** Aluminium legs are placed in the corner brackets and wing nuts tightened by hand. The leg is securely held in the corner with a sliding T piece. Podiums are attached together with a hand tightened Klemm-fix connector. Accessories are attached to the podium aluminium extrusion using T bolts, and hand wheels are finger tightened.

**Storage:** The QUATTRO Storage Trolley Kit is compatible. It contains four wheels and a handle which are added to a podium, allowing for up to 20 podiums to be stacked on top.

**Customisations:** If adding an access ramp, you can choose to have it with or without a ramp landing. In addition, there are tiered stage configurations available for seating or performances.

Safety Modular Steps

Stage Curtains

The PILOT Modular Staging System is closely based on the QUATTRO design, providing a versatile and economical choice for a portable staging solution.

An attractive and viable stage solution for all performance and event requirements, our PILOT Stage is manufactured in-house, so we can customise a system to your exact requirements. Compatible with the QUATTRO range of accessories, the standard PILOT design features a black timber stain podium finish, or alternative timber stain colours are available.

# MELBA F&R

The MELBA Fold & Roll Choir Riser is a popular addition to our range of portable stage systems. It is an ingenious and simple solution for the theatrical, musical, hospitality event and educational industries.

One person may easily set this up. You can perform in every weather as MELBA's non-slip Podium finish may be used in both indoor and outdoor event settings.

Conductors Podiums

## Features and Specs

	MELBA F&R
4 generously proportioned riser podiums <sup>(mm)</sup>	2400 x 400
Riser Podiums <sup>mm</sup>	200/ 400/ 600/ 800
Riser Podiums	Maxi Hex 18mm Ply with Anti-Slip film surface
Storage	2.4x0.8m of floor space
Materials	Aluminium Timber plywood
Australian Made	✓
Weight (kg)	150
Warranty	10 years

Approximately up to 6 performers per level X4 approx. 24 performers- plus another row of performers on ground level if required

Building on the proven design strength of our DIVA Fold & Roll, the MELBA Fold & Roll is simply wheeled along on its easy glide castor wheels. Once in place, the wheels are locked and the riser podiums are lowered into the horizontal position.

Our unique in-house design eliminates dangerous pinch points and the need for heavy lifting, which makes the MELBA Fold & Roll Choir Riser extremely user friendly and able to be operated by one person.

The main body of the risers and framework are constructed into one complete unit. The only removable components are the safety handrails which are quickly and easily affixed finger tight to the main choir riser body using our T bolt. The detachable handrails are then stored on the rear of the MELBA Fold & Roll when not in use.

# BLOCKA

The Revolution in Drama Block Design. Designed and manufactured in Australia, BLOCKA is the innovative answer to the limitations of the traditional drama box.

Portable staging solutions

BLOCKA is ideal for schools and early childhood centres, as well as drama and dance schools where storage can be an issue. Easy to assemble and pack down (with no tools required) the interlocking slot design is simply packed up and stored or you can purchase its own purpose-built storage trolley unit.

Made from sustainably sourced and FSC Certified 18mm Maxi Hex Birch plywood with a non-slip phenolic film surface, BLOCKA is a safe and durable drama block option. The unique modular system allows for endless set-up possibilities and creative ideas. Rigid, stable and attractive BLOCKA is the ideal choice for your portable event platform.

Sizes available -  
1200mmL x 600mmW x 300mmH  
600mmL x 600mmW x 300mmH

# Tiered Stage, Choir Riser and Seating Systems

Our modular podium systems adapt easily from single to multi-level by changing the leg lengths in the corner castings. The unique Klemm-fix connector joins each level securely, and leg clamps secure the multiple levels to one other. We can design a tiered stage to suit your requirements, and as the entire system is free standing, it will accommodate unusual wall shapes and obstacles.

Safety Chair Border Rails

## Accessories

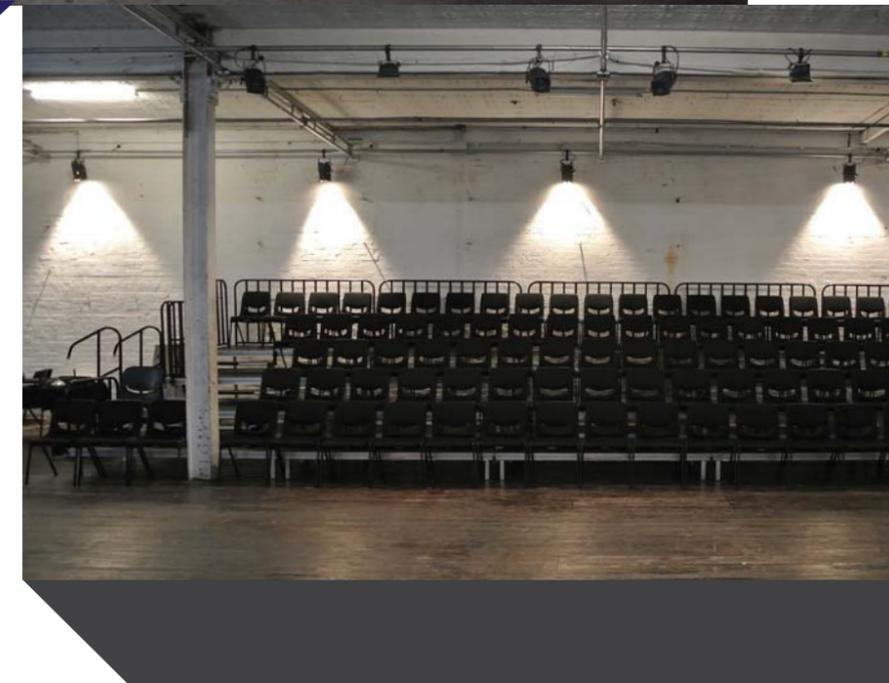

We've taken the unique design elements of our hugely successful portable staging systems and modified them to create versatile alternatives. Tiered stage, choir riser and seating configurations allow for an impressive multi-level floor system to suit elevated seating, performance and choral options.

## QUATTRO Tiered Seating, Choir Riser and Stage Podium

	QUATTRO
Standard Podium Dimensions (mm)	2000 x 1000 2000 x 500
Podium weight (kg)	35 (2000 x 1000)
Design load (kg/m <sup>2</sup> )	765 evenly distributed
Leg Dimensions (mm)	40 x 40
Materials	Aluminium Timber plywood
Australian Made	✓
Warranty	10 year
Standard Leg Heights (mm)	200 / 400 / 600 / 800 / 1000
Custom Leg Heights (mm)	200–2000
Add Adjustable Height Legs (mm)	400/600mm, 600/1000mm or 1100/1300mm
Standard Heights for Choir Riser Tiers (mm)	200 / 400 / 600

Decking: 22mm structural radiata plywood with timber stain or 18mm structural radiata plywood with 4mm marine grade carpet.

Storage: The QUATTRO Storage Trolley Kit contains four wheels and a handle which are added to a podium, allowing for up to 20 podiums to be stacked on top.

Operation: Aluminium legs are placed in the corner brackets, wing nuts tightened by hand and the leg is securely held in the corner by a sliding T piece. Accessories are attached to the podium aluminium extrusion with T bolts.

### Customised Options for both QUATTRO & PILOT-

The modular podium system adapts easily from single to multi-level by simply changing the leg lengths. Add steps and half-podiums to vary the levels and create easy access between levels. For a curved stage system or choir riser, add custom sized curve inserts. Secure multiple level podiums together at the legs with two-way or four-way leg clamps. You can add safety hand-rails or safety chair rails to stop chair legs from slipping off the back of the podiums. Custom podium dimensions and shapes are available on request.

## PILOT Tiered Seating, Choir Riser and Stage Podium

	PILOT
Standard Podium Dimensions (mm)	2000 x 1000 2000 x 500
Podium weight (kg)	31 (2000 x 1000)
Design load (kg/m <sup>2</sup> )	500 evenly distributed
Leg Dimensions (mm)	40 x 40
Materials	Aluminium Timber plywood
Australian Made	✓
Warranty	2 year
Standard Leg Heights (mm)	200 / 400 / 600 / 800 / 1000
Custom Leg Heights (mm)	200–2000
Add Adjustable Height Legs (mm)	400/600mm, 600/1000mm or 1100/1300mm
Standard Heights for Choir Riser Tiers (mm)	200 / 400 / 600

Decking: 18mm structural radiata plywood deck available in a variety of popular timber stain finishes.

Storage: The PILOT Storage Trolley Kit contains four wheels and a handle which are added to a podium, allowing for up to 20 Podiums to be stacked on top.

Operation: Aluminium legs are placed in the corner brackets, wing nuts tightened by hand and the leg is securely held in the corner by a sliding T piece. Accessories are attached to the podium aluminium extrusion with T bolts.

# TITAN

The TITAN Heavy Duty Stage System is designed specifically for both large and heavy display and event requirements. Each TITAN Stage Deck is constructed with superior quality nonslip Maxi Hex decks creating endless event and display opportunities indoors and out.

The TITAN system is the ideal staging option for events where weight or size calls for a heavy-duty solution. This includes rock concerts, orchestral performances, art exhibitions, events, expos, field days, auto industry shows or furniture displays.

Portable staging solutions

## Standard Features:

- Fast & Easy Setup & Dismantle
- Podiums 2400 x 1200mm
- Maxi Hex Non-slip surface
- Six legs per podium

## Options Available:

- Loading Ramp
- Stage Legs in a variety of heights
- Storage Trolley
- Carpet Decks
- Valance Curtains
- Corporate Logo on Valance
- Timber Fascia
- Safety Accessories
- Custom size Podiums

# STAGE CURTAIN AND VALANCE SYSTEMS

Dress your stage to a professional level with our stage curtain and valance systems.

Each of our stage curtain and valance systems are individually designed and made to suit a range of purposes including front of house, upstage, midstage, downstage, cycloramas, backdrops, blackout, scrims and more.

There is a system to suit all our permanent and portable stages, and we can also work with you to design and create a unique system for your existing stage, even if it was sourced elsewhere. There is a wide range of fabrics and colours to choose from, plus, we can embroider your school or company logo onto the valance centre panel. Curtains and valances can be purchased separately or supplied as a complete package with your stage system.

## Portable Stage Curtains

- Modular QUATTRO theatre curtain system, complete with portable curtain frames and curtains
- Cost effective, easy to use solution for smaller stage applications
- Designed to fit onto any of our QUATTRO, PILOT, DIVA and TITAN stage systems.

## Retractable Stage Curtains

- May be installed on our permanent or portable stage systems
- Options for backstage and side stage curtains
- Retractable front of house curtains require either an overhead support system or to be attached to the stage subframe.

## Portable Telescopic Curtain Support System

- Telescopic upright and vertical arm support framework system
- Lightweight, easy to assemble and comes with its own carry bag
- Each system includes double back wall hangers, spigots and base plates
- Suits a variety of applications including change room, small performance area, cubicle, backdrop/side curtains, room divider or concealment curtain
- Available in three sizes: small (1-1.5m high x 1-1.5m wide), medium (2.4-4m high x 1.8-3m wide) and large (2.4-6m high x 2.5-4m wide).

## Valance Stage Curtains

- Provides decorative finish to the front and side of portable and permanent stages
- Discreet, attractive covering for sub frame electrical/construction views
- Features genuine VELCRO® Brand Hook & Loop to attach the valance to our stage podiums.

# FREE STANDING STEP UNITS

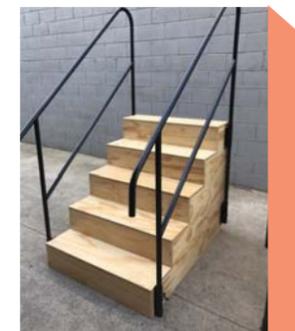

## Frame Style Portable Step Units

- Modular portable step unit with powder coated steel frame
- Height and number of steps can be customised to suit
- Single step units can be joined to create wider steps if needed
- Space between step treads is open, with a standard step size of 950mm wide x 250mm deep
- Recessed wheels for ease of transport with an option of removable safety handrails for one or both sides
- Three step tread finishes available: MAXI Hex non-slip, timber stain with non-slip edge strip or marine grade carpet (suitable for indoor and outdoor use).

## Box Style Portable Step Units

- Enclosed step and frame in box style
- Plywood frame encasing complete step unit
- Suitable for interior use only
- Height and number of steps can be customised to suit
- Single step units can be joined to create wider steps if needed
- Standard step tread 950mm wide x 250mm deep
- Step unit can be finished in marine grade carpet or timber stain with non-slip edge strip
- Recessed wheels for ease of transport with an option of removable safety handrails for one or both sides.

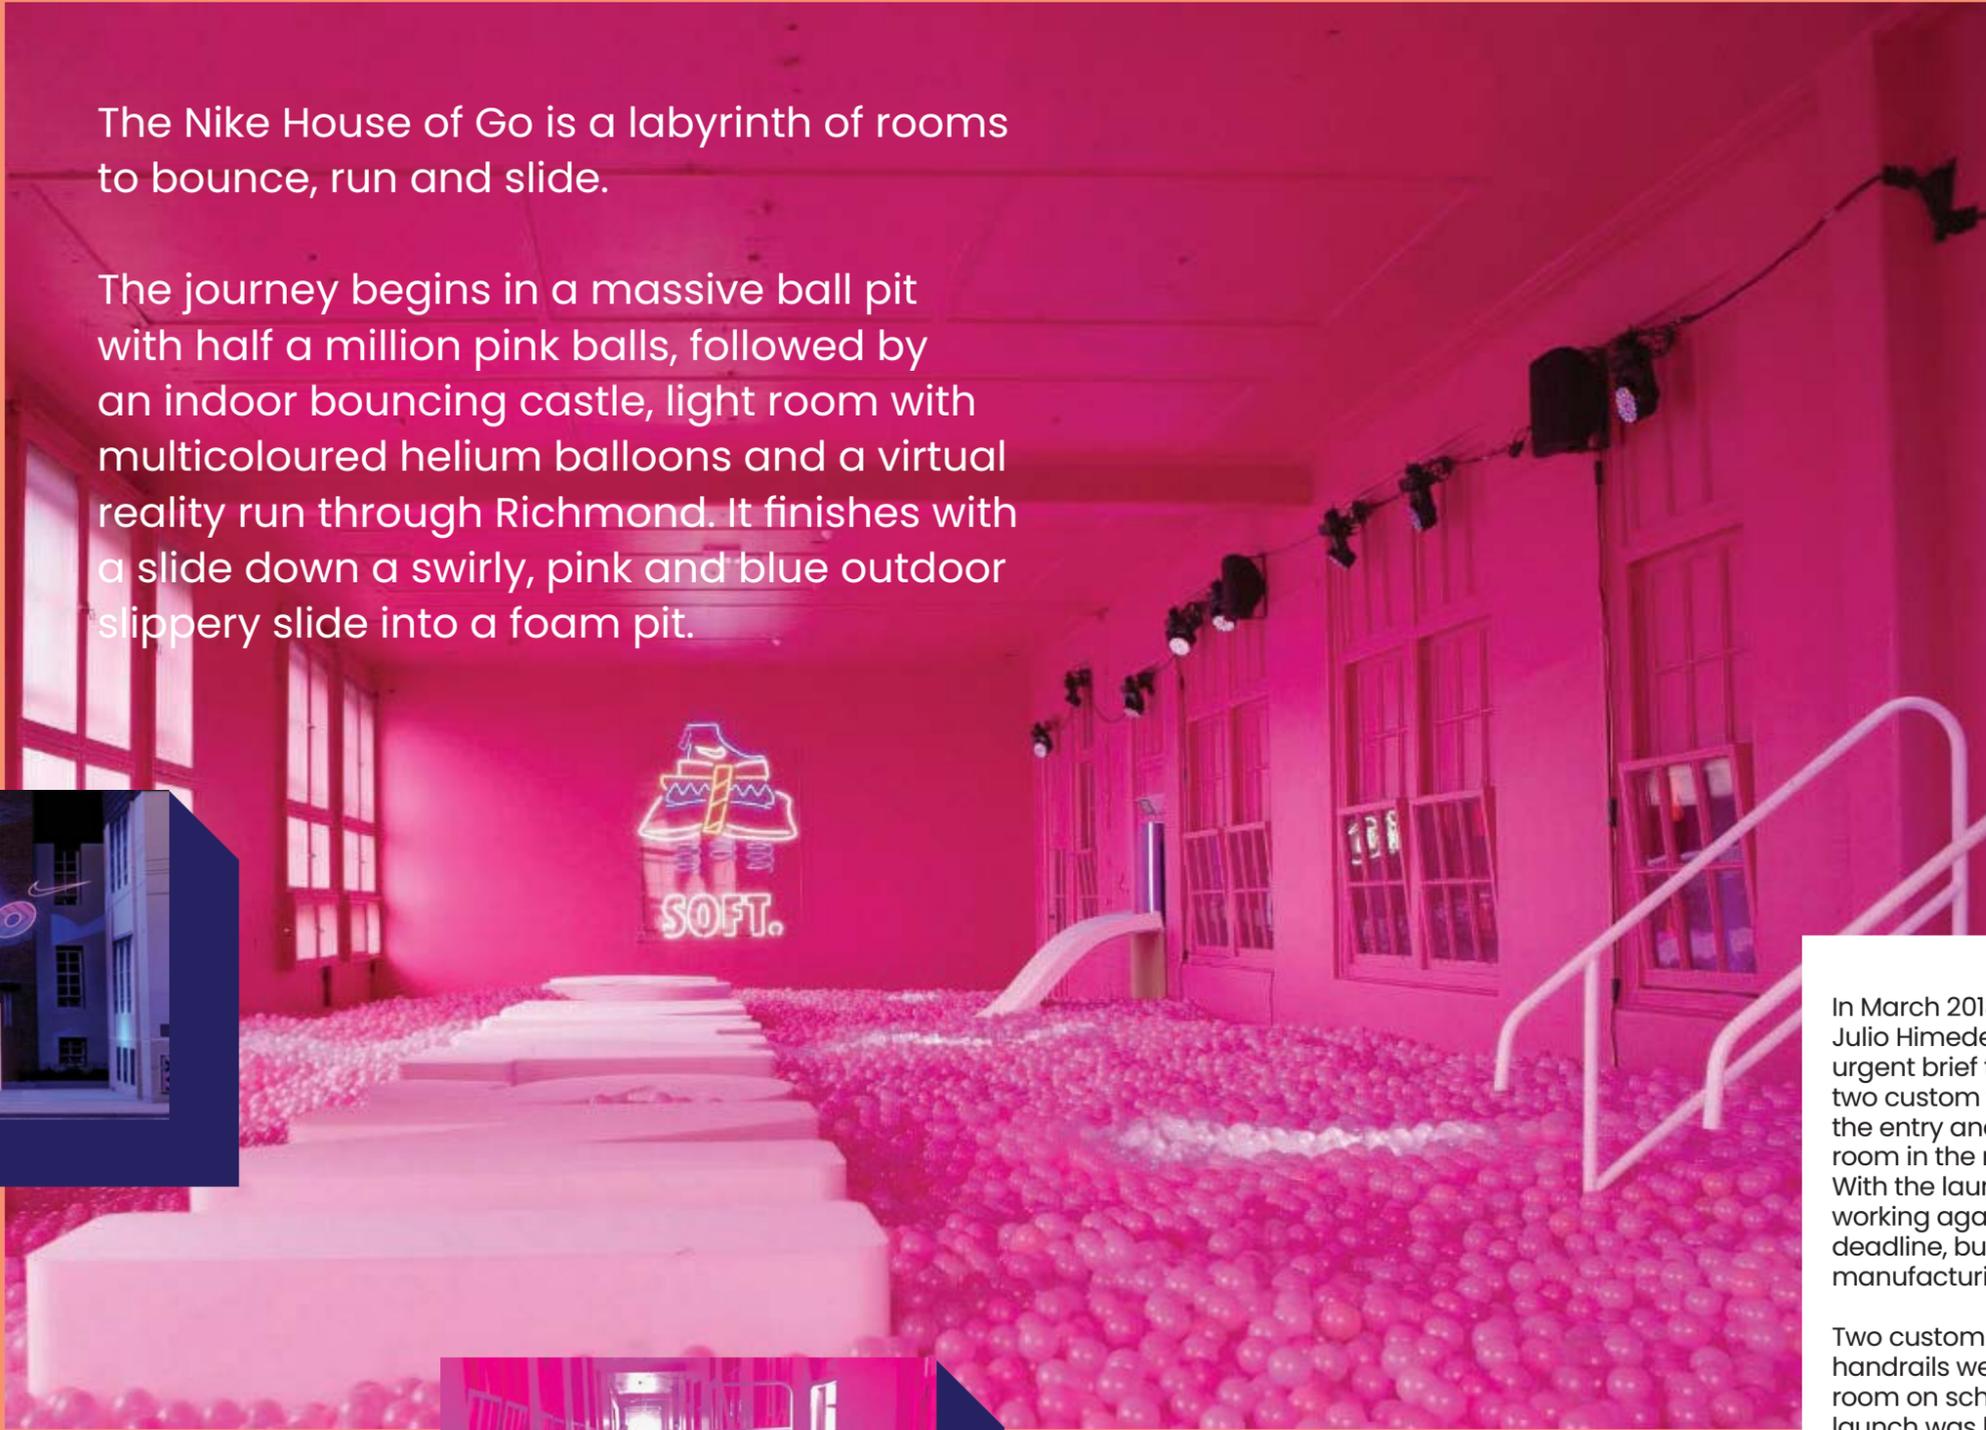

Our custom-made freestanding step units are available in two styles, to suit your existing stage systems or unique stand-alone step requirements.

Simple, safe and versatile, our portable standalone step solutions are used for many purposes across a multitude of industries including:

- Shopping centres
- Council Buildings
- Town Halls
- Schools
- Universities
- Hotels
- Clubs & Pubs
- Theatres
- Film/ Movie Crews
- Community Groups

The Nike House of Go is a labyrinth of rooms to bounce, run and slide.

The journey begins in a massive ball pit with half a million pink balls, followed by an indoor bouncing castle, light room with multicoloured helium balloons and a virtual reality run through Richmond. It finishes with a slide down a swirly, pink and blue outdoor slippery slide into a foam pit.

In March 2018, we were contacted by Julio Himede Production Design with an urgent brief to design and manufacture two custom freestanding step units for the entry and exit points of the ball pit room in the newly built Nike House of Go. With the launch day looming, we were working against the clock with a four-day deadline, but our experienced design and manufacturing team got the job done.

Two custom white step units with safety handrails were installed in the ball pit room on schedule, ensuring a successful launch was held in the newly developed Collingwood Arts Precinct. Each of the two units allowed access in or out of the room, before the designers added a slippery slide to the entry step, so participants can now make a fast and exciting sliding entry into the pit.

# CUSTOM STAGES

Our portable and permanent custom stages are strong, durable and versatile –designed and made to your specific requirements and exact specifications.

Our highly experienced team will work with you to custom design a staging system that is purpose-built for your needs and ticks every box. We have created bespoke designs for a huge range of organisations, events and industries.

There are endless design options available, so you can custom design a stage that suits your needs exactly. Our modular designs allow each stage system to be reconfigured as needed and you can create multi-level performance areas. We can adapt your design to work with any challenges relating to walls, pillars and floors, and can build around problem areas if needed. Each stage includes safety features such as stage rails, strengthened sub-frames and stage legs with lockable wheels, and access ramps can also be added for ease of access.

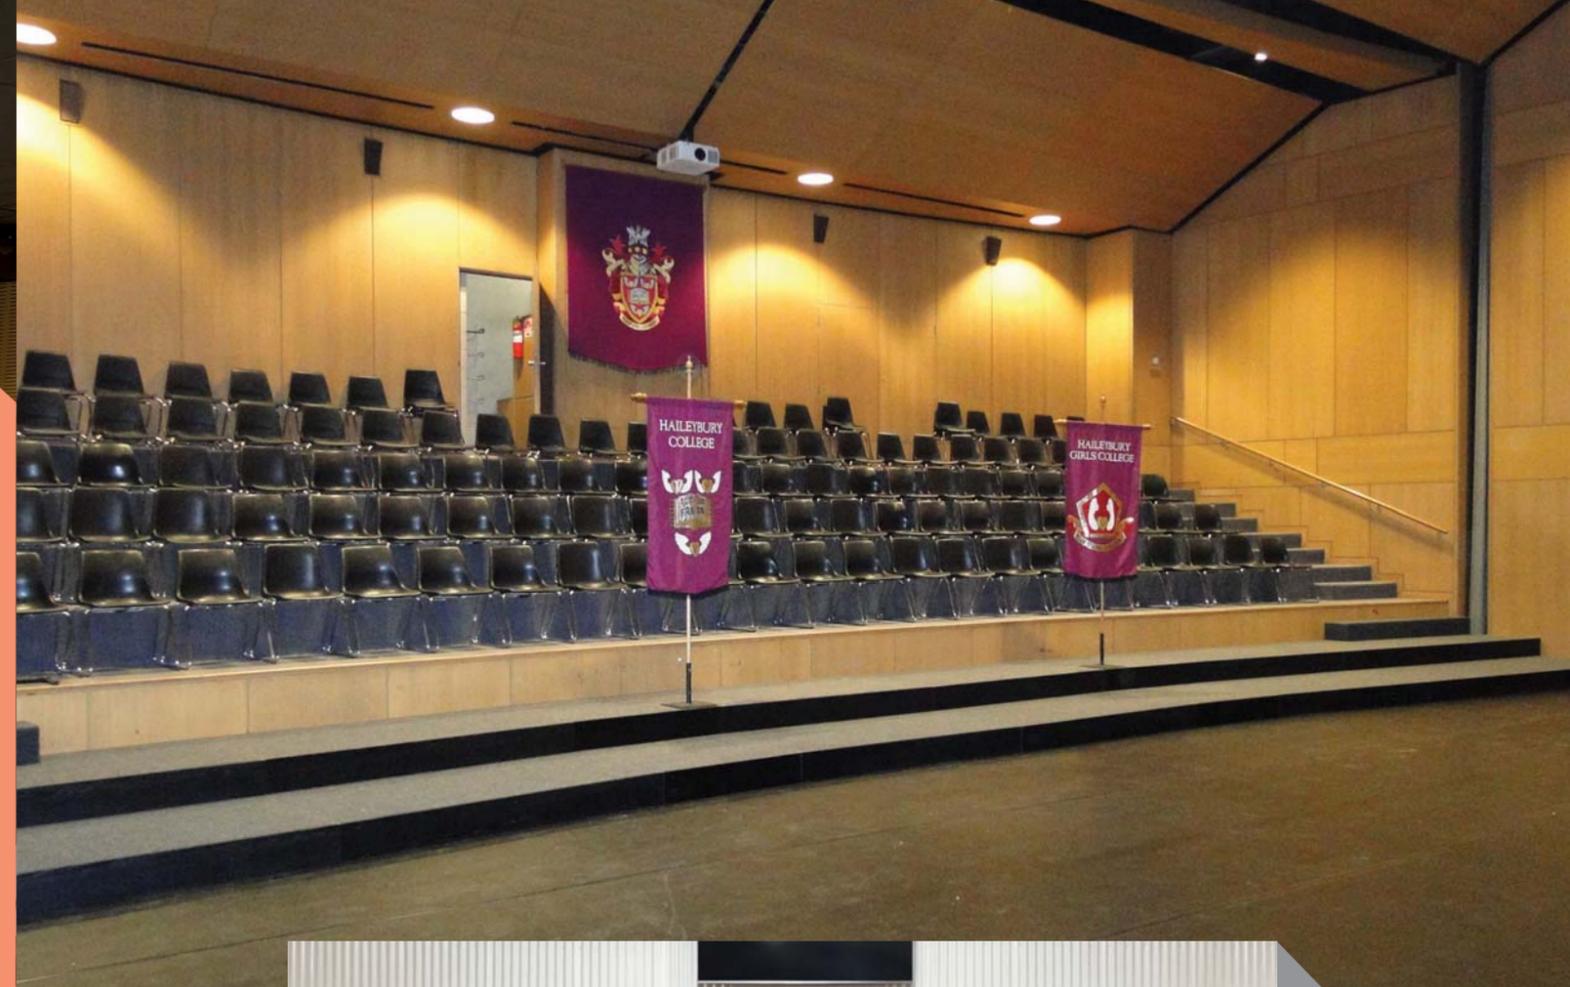

## When designing your customised stage, you have the option of:

- Curved, rectangle, triangle or square podium, with sizes up to 2400mm x 1200mm
- Stage curtain and valance systems in your chosen colour with optional logo
- Stage scenery panels, backstage change rooms and greenroom options
- Podium trolleys that make it easy to transport and store your stage
- Lecterns in various designs, from timber to high tech, all with logo options available
- Multiple height configurations, catwalk podium combinations, tiered seating and choir risers
- Exterior and interior podium surface options: timber stain, marine grade carpet and non-slip Maxi Hex
- Customised leg heights (standard 200–2000mm, adjustable 400/600mm, 600/1000mm or 1100/1300mm).

# PERMANENT STAGING SYSTEMS

We specialise in creating fully fixed permanent stage structures that are carefully planned to understand the structures which are carefully designed to maximise the available space, and optimise the enjoyment of the performance by the cast and audience alike.

Utilising our premier quality QUATTRO stage components, our experienced designers and qualified joinery team can design a new solution, or repair or refurbish an existing stage to your specifications.

We'll consult closely with you throughout the design and construction process to ensure the stage meets your every specification. Resurface, rebuild, extend, or custom design and construct – it's all possible with our skilled team.

# ACCESS RAMPS

All venues and facilities are required by law to provide patrons with a safe and compliant access ramp system. This includes schools, universities, retirement villages, hospitality venues, corporate workplaces, shopping centres, theatres, museums and more.

The core strength of the Select Staging Concepts access ramp is the premium plywood podium coupled with the unique aluminium extrusion, which ensures that all custom-built access ramps are safe, strong and secure. Every ramp is specially designed to deliver a tailored solution for each client and comply with the stringent Australian Standards AS 1428.1 requirements for access ramps and landings in a 1:14 gradient.

Our modular access ramp system provides all the requisite safety features including:

- Safety handrails on both sides of the ramp
- Kick plates, mid-point, corner and top landings if required
- A strong ramp starter with non-slip fixings
- A choice of non-slip marine grade carpet or timber stain finishes
- AS1428.1 compliant rail and podium joiners.

The modular access ramp system can be installed as a permanent fixture, or as a versatile portable solution which can be assembled and dismantled by only two people and safely stored on our storage trolley kit when not in use.

Today, new and existing stages and platforms are required to provide safe and compliant facility access for those with a disability or reduced mobility. All our access ramps are made in Australia and comply with the Australian Standards AS1428.1.

Our innovative modular access ramp solution can be paired with any of our staging systems, or we can retrofit our compliant access ramps to any existing stage or platform.

# STAGE ACCESSORIES

Enhance the safety and aesthetic appeal of your stage system by adding accessories from our extensive range.

Our range of Accessories include Modular Steps; Hand Rails; Safety Chair Border Rails; Timber Edge Fascias; Stage Storage & Transport Trolleys; Transport Trailers; Stage Curtain Systems; Stage Access Ramps; Drama Boxes; BLOCKA; Winners Podiums; Mobile Scenery Panels; Adjustable Height Legs; Lecterns; Stage Podium Finishes; and a selection of Clamp and Sway Braces to enhance your Portable or Permanent Stage System.

Safety Hand Rails

## Safety Hand Rails

- Custom sized handrails available
- Join standard safety handrails with rail clamps
- Safe sturdy rail system for both stage stairs and perimeters
- Standard handrails are available in 1m, 2m and 2.4m sizes
- Standard handrails are 27mm tubular steel with black powder coating
- Handrails with custom vertical infill rails available
- QUATTRO, DIVA & PILOT stage podium and step handrails are hand tightened with T bolts and hand wheels.

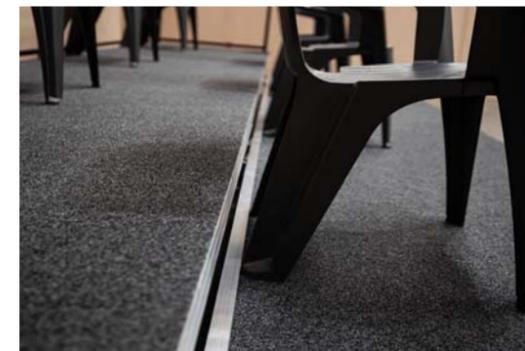

Step Hand Rail

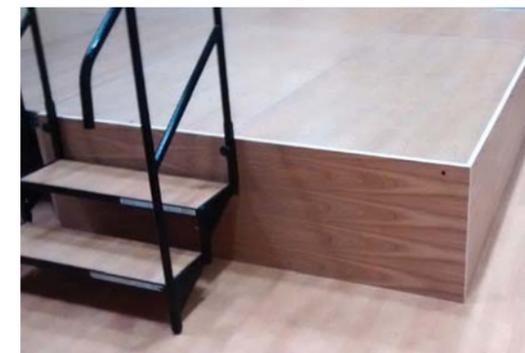

## Modular Stage Steps

- Metal framed step with a timber surface
- Steps interlock to create a variety of treads to suit any stage height
- Fixed into accessory extrusion simply and safely
- Standard modular steps are 950mm wide x 250mm deep
- Choice of timber stain or marine grade (indoor/outdoor) carpet finish
- All portable and permanent stage systems with a podium height 300mm and above always require a suitable stage step unit.

## Chair Border Rails

- Prevent chair legs slipping off the podium, reducing the risk of accidents
- Recommended safety option for the tiered seating stage systems
- Aluminium extrusion 50mm x 25mm
- Rails come in standard lengths 1m, 2m and 2.4m
- Easily attaches to the rear of QUATTRO, DIVA or PILOT podium aluminium extrusion.

## Timber Edge Fascia

- Timber fascia is an alternative to valance curtains
- Solid timber edging and interlocking corners
- Creates a stage unit without under stage gaps
- Timber stain finish or marine grade carpet finish.

Storage Trolley Kit

## Stage Storage Trolley

Our trolley kit is an innovative solution for quickly and easily storing your portable stage podiums. With the kit, you use one of the stage podiums as the trolley floor, then simply attach the supplied castor wheels and trolley handle and stack the remaining stage podiums on top. It can hold up to 20 podiums per trolley, which allows you to store 40m<sup>2</sup> of staging in just 2m<sup>2</sup> of floor space.

Doorway Access Trolley

Another transport option is the vertical doorway access trolley. They fit through a standard doorway, allowing ease of movement from one venue to the next. Vertical doorway trolleys are constructed with a side safety rail to securely lean stage podiums against. They are ideal for smaller stages with 8-10 podiums.

Transport trolley kits are space efficient, as stairs and railings stack on top of the podiums and there is no bulky trolley to store while stage system is in use.

PILOT Winners Podiums

## Winners Podiums

Our PILOT and drama box winners' podiums can be customised to suit any presentation requirements. For the PILOT winners' podium, you can choose from a selection of timber stain colours, while the drama box podiums give you a choice of timber stains or marine grade carpet. Winners' podiums are used in schools, churches, sporting clubs and social clubs, for award presentations, displays and presentation events.

Drama Box Winners Podiums

## Dust Covers

Not everyone has a secure dust free space to store their Portable Staging components. We now have a simple solution! Dust Covers!

A simple throw over to keep dust, dirt and animals off your Stage.

The Dust Covers are water resistant too! Brilliant! These images show the Dust Cover on a stack of 8 of our QUATTRO Podiums 2m x 1m.

And the covers are manufactured here in Melbourne too (just like our stages)!

Dust Cover

Drama Boxes

## Drama Boxes

- Drama boxes can be customised and made to order in a variety of sizes and finishes to fit every niche
- Manufactured from radiata plywood as standard, which is strong, durable and visually pleasing
- Includes convenient hand holds at each end of the drama box which makes it completely portable
- Manufactured in a variety of heights and sizes which may be used singularly or as a set
- Optional podium finish of

marine grade carpet which is suitable for both indoor and outdoor activities

- Optional podium finish of timber stain (in a selection of colours) which is suited to interior use only
- Versatile, portable, light to transport and easy to stack and display in multiple configurations
- Suitable for educational facilities, sporting clubs, council events, expo events, shopping centre displays and more.

### Standard Sizes Currently Available

- 600 x 600 x 300mm
- 600 x 600 x 450mm
- 1200 x 600 x 300mm
- 1200 x 600 x 450mm
- 1500 x 900 x 300mm
- 1500 x 900 x 450mm

4 Way Leg Clamps

## Connectors, Clamps & Sway Braces

- Connectors slot into aluminium extrusion on all podiums, and are quickly and easily tightened by hand with tightening tool to secure all podiums together
- Leg clamps are used for joining different stage, tiered seating or choir riser levels together. Two-way and four-way leg clamps tighten around the adjacent legs for stability
- Sway brace brackets are used on larger tiered stage systems to provide stability. A system of tubes and clamps ensure long-term strength and support.

2 Way Leg Clamps

Connector and Tool

Adjustable Legs

## Podium Legs

The performance requirements of stages vary greatly. Whether for dance, drama, music or speeches, the design of each stage area needs to be the optimum height for the purpose and the capacity of the venue. With QUATTRO and PILOT stages, you don't need a new podium to achieve different height performing spaces – you can simply add adjustable height legs, or purchase standard stage legs in a variety of lengths.

- Standard height legs available in sets of 4 or 6 in heights ranging 200mm–2000mm max
- Adjustable height legs available in sets of 4 or 6 in three sizes – 400mm/600mm,

- 600mm/1000mm and 1100/1300mm
- Lockable wheel leg units custom sized to individual podium height requirements
- All legs lock into the podium corner castings with finger tight wing nuts
- Adjustable leg system utilises a large plastic foot with a screw-thread for fine adjustments
- Each adjustable leg has a spring-loaded locking pin offering secure height fixing with holes every 50mm
- All standard height and adjustable height legs can be stored in the podium cavity on our storage trolley kit.

Standard Legs

Sway Braces and Clamps

Stage Scenery Panels

## Stage Scenery Panels

Portable reusable scenery panels are custom made to order for a multitude of performance and event requirements. Versatile for almost anything requiring a backdrop or visual presentation, you can transform your stage quickly and easily between scenes or events by simply rearranging the scenery panels.

The standard size panels are 2.4m x 1.2m, and you can opt for feet brackets to free-stand or mobile panels that come

complete with wheels. Our lightweight plywood scenery panels are covered in carpet making them ideal for pin or VELCRO® Hook and Loop fastener tape\*. The carpet is available in a variety of colours giving you plenty of scope for design. Scenery panels can also be used for notice boards or dividers at expos or industry events.

\*VELCRO® Brand is a registered trademark of Velcro BVBA®

Timber Post Lectern

## Lecterns

Accessorise every meeting room, church, school hall, lecture hall, board room, auditorium and conference centre with a lectern, to add instant emphasis and importance to the spoken word. Lecterns are an effective presentation tool for many industries including hotels, corporate business, government, workforce training, churches, sporting associations and educational facilities. You

can customise your lecterns with your choice of timber stain finish and have the option to add your company or school logo too. Available in three style options:

- Timber post lectern: a simple post upright with lectern shelf
- Timber cabinet lectern: includes a drawer and shelf
- Electronic lectern: modern modular design with optional electronic accessories.

Electronic Lectern

Timber Cabinet Lectern

Timber Stains

## Colours & Finishes

You can customise your stage podium, lectern, drama box, winners' podium, access ramp and step unit utilising the variety of colours and finishes outlined below.

MAXI Hex non-slip surface:

- MAXI Hex Birch 18mm non-slip raised hexagonal phenolic film, all weather strengthened quality ply, ideal for podiums where a heavy-duty finish is required
- MAXI Wire 18mm non-slip plywood is ideally used for MELBA Fold & Roll choir riser
- MAXI Hex Birch plywood sheets are used in TITAN stage system and BLOCKA drama blocks.

Timber stain finish:

Drum Risers

## Drum Risers

Designed and made to order, our QUATTRO Drum Risers are specifically designed for even the most aggressive performance requirements. The risers are manufactured using heavy-duty swivel wheels so they can be rolled into place on the stage. Chair border rails are often used for the safety of the drummer.

These portable risers are currently in use around Australia at schools, universities, social clubs, churches, and many other facilities. Multiple sizes, colours and heights available.
