

PERMANENT STAGING SYSTEMS

We specialise in creating fully fixed permanent stage structures that are carefully planned to understand the structures which are carefully designed to maximise the available space, and optimise the enjoyment of the performance by the cast and audience alike.

Utilising our premier quality QUATTRO stage components, our experienced designers and qualified joinery team can design a new solution, or repair or refurbish an existing stage to your specifications.

We'll consult closely with you throughout the design and construction process to ensure the stage meets your every specification. Resurface, rebuild, extend, or custom design and construct – it's all possible with our skilled team.
