

**DT11**

## **Casement & Awning Window Lock**

Sterling Series Window Lock Range

# DT11 Window Lock

The DT11 is a non-handed key lockable sash lock suitable for use on both casement and awning timber windows.

## Features

Key locking and removable cylinder housing allows the insect screen to be removed for cleaning purposes without the use of tools.

## Benefits

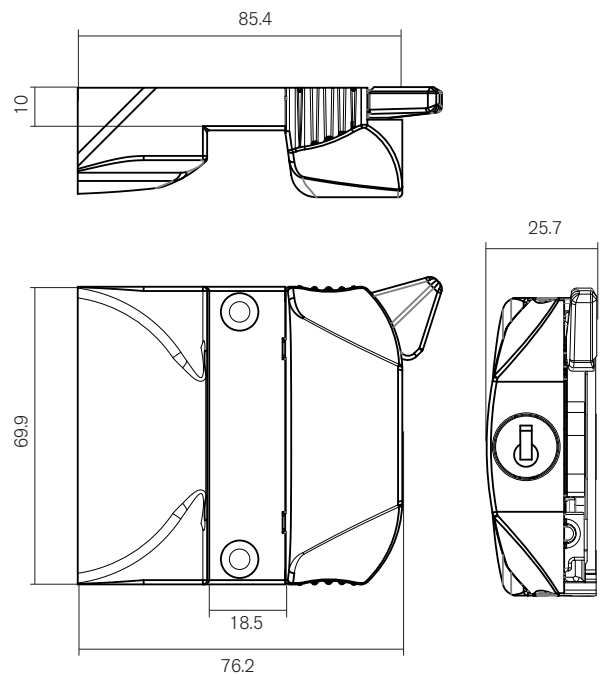

- In addition to key locking, this product can be used individually or in multiples to improve window performance.
- Key number 92611 compliments other Sterling Series Window Locks. Includes DT1 Double Hung Lock, DT2 sash lifts, DT3 keyed casement lock & DT4 Sliding Window Lock.
- Compliments casement and awning windows operated by arm winder or chain driven products (e.g. DS177 Chainwinder).
- Dimensions complimentary to existing latches.
- Tested to provide secure fixing in excess of 1000 newtons of negative pressure.

## Additional Information

- Includes 4 x Stainless steel screws and left and right handed stainless steel keepers.
- Silver Pearl is standard. Other Doric standard powdercoat finishes available.

## Installation

- Can be retro fitted to existing timber windows.
