

Strata Selection

OFFICEPACE

The ideal choice for today's workplace.

The Strata Selection

The much-loved look of the Strata Electric desk is now available in a range of workstation options.

Known as the Strata Selection, this range lets you create a truly flexible and agile workspace with the confidence of Strata quality that customers have come to expect.

Strata Electric

10

Ever-popular and exclusive to OfficePace, this electronic sit/stand workstation can adjust to an individual's needs with the flick of a switch.

Strata MK2

14

An electronic sit/stand workstation pairing all the features you love in the Strata Electric with the latest technology.

Strata Technician Adjust

18

Future-proof the office with the flexibility to adjust. Technician adjusted to different heights, depending on individual needs.

Strata Standard

22

Boasting the modern, slimline look of the Strata Selection, the Standard is supplied at the fixed, standard height of 720mm with the worktop.

Configurations

38

Flexible configurations. One team.

The Strata Selection makes it easy to create dynamic offices that work better for individuals and groups, and for different roles and functions, while still offering the cohesive look of one team. With height-adjustment options and a number of desk types in matching styles, you can choose complementary pieces for a professional, coordinated look.

Our in-house manufacturing capability offers a wide range of configurations, colours, and finishes. This allows you to customise your workspace to suit your vision, accommodate different work styles, and match your desired look and feel.

Cater for flexible work teams, increased mobility, and 'hot-desking'.

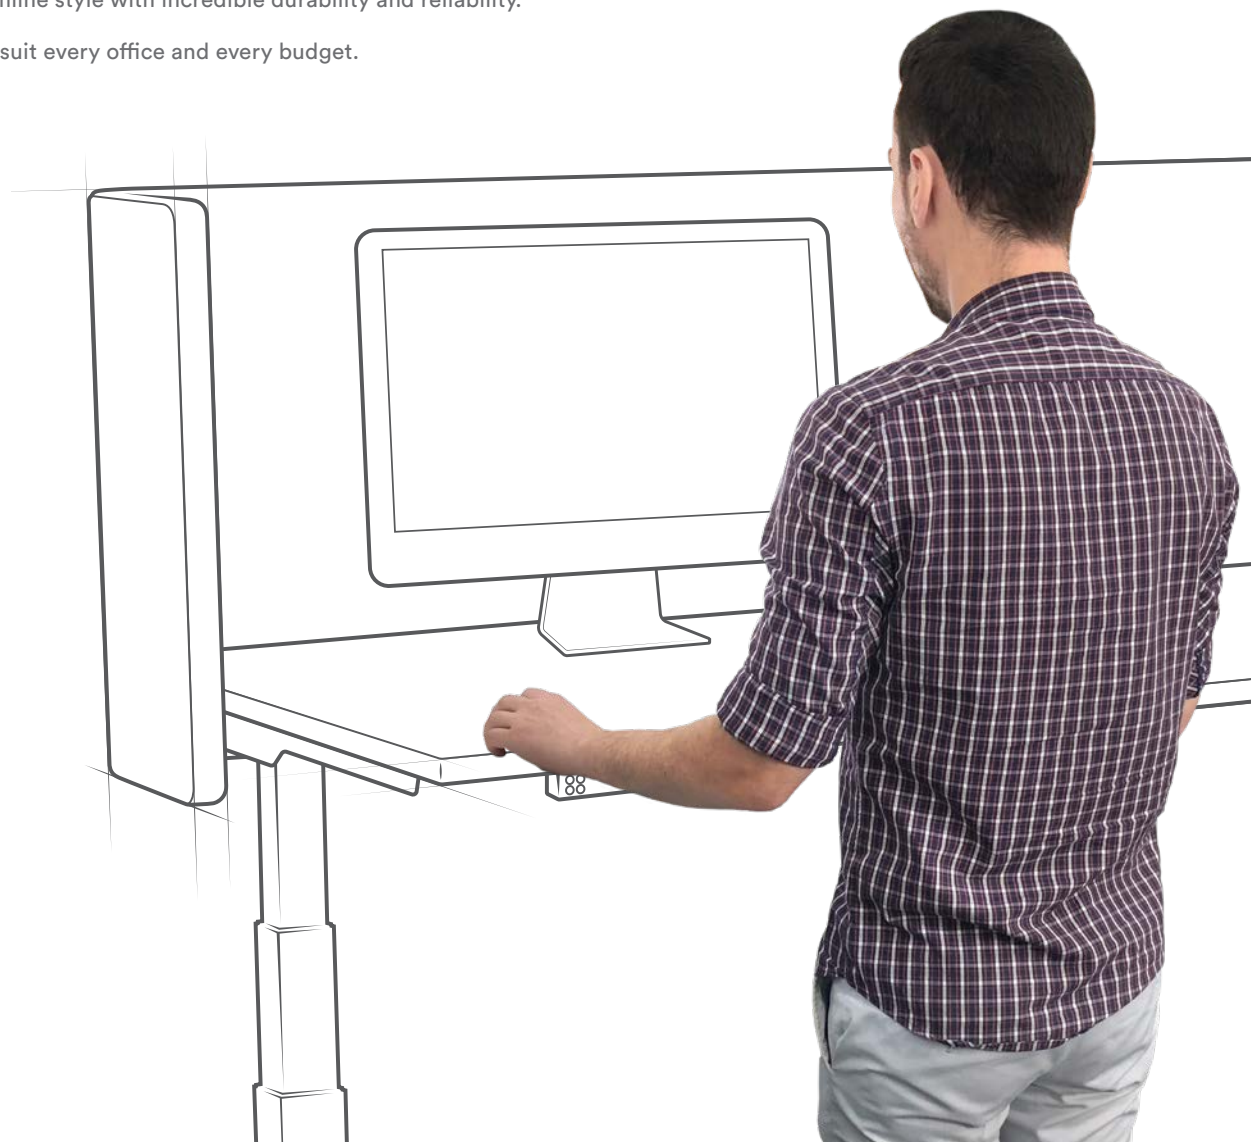

Set up different work areas for diverse departments.

Encourage easier interaction, collaboration and innovation.

Choose from a range of configurations and white or black powdercoat.

Mix modern slimline style with incredible durability and reliability.

Find options to suit every office and every budget.

Workstations that work

The average adult spends more than half of their day sitting down, but such a seemingly safe activity can be bad for your health. International research has recently focused on sedentary behaviour and the risks of sitting or lying down for prolonged periods. In fact, studies warn that sedentary lifestyles are likely to cause as many deaths as smoking. It's surprisingly easy to sit for 15 hours each day, but emerging evidence links prolonged sitting with chronic diseases like heart disease, type 2 diabetes, and stroke, as well as obesity, and poor mental health.

The good news is that installing sit/stand workstations, can have a positive impact on employee's health and wellbeing. In a recent Heart Foundation study, the installation of sit/stand workstations reduced participants' sitting time by almost 20% during work hours. These workstations encourage movement and mobility, and those who sit less and stand more:

Are at a lower risk of early death, especially from heart disease.

Feel more productive while standing.

Experience less stress and fatigue.

Are less likely to experience weight gain or obesity.

Report less back pain.

Benefit from fewer and shorter periods of prolonged sitting. This simple change alone can lead to better heart health.

Have more energy and focus, especially during that mid-afternoon lull.

Quality backed by comprehensive warranties and stringent standards

With the Strata Selection, you can have the utmost confidence in the quality of our products. Not only are they backed by a 10-year warranty on both frame and motor, but they're certified to Australian Standards for health and safety, and International Standards for environment and quality.

Our products are designed to meet the ergonomic needs of the user and are built to stand up to constant use – day in, day out.

Our certifications include:

Products built to last. Good for you, good for our planet.

We take our environmental responsibility seriously. Not only are we committed to delivering quality, but we build and design our products in an environmentally sustainable way:

Our ISO 14001 certification ensures we legally comply with all environmental regulations and are committed to making ongoing improvements.

We have implemented a full solar energy scheme to run our production during daylight hours.

Our products are designed and built to last. In each stage of their manufacture, use, and disposal, we embody the environmental principles of Reduce, Reuse and Recycle.

We work with suppliers who are committed to environmentally friendly products and services.

We manufacture in Australia, and offer the local community our offcut materials free of charge. This way, we're benefitting our local community as well as ensuring we don't contribute to landfill.

Workstation Screens with more privacy and flexibility

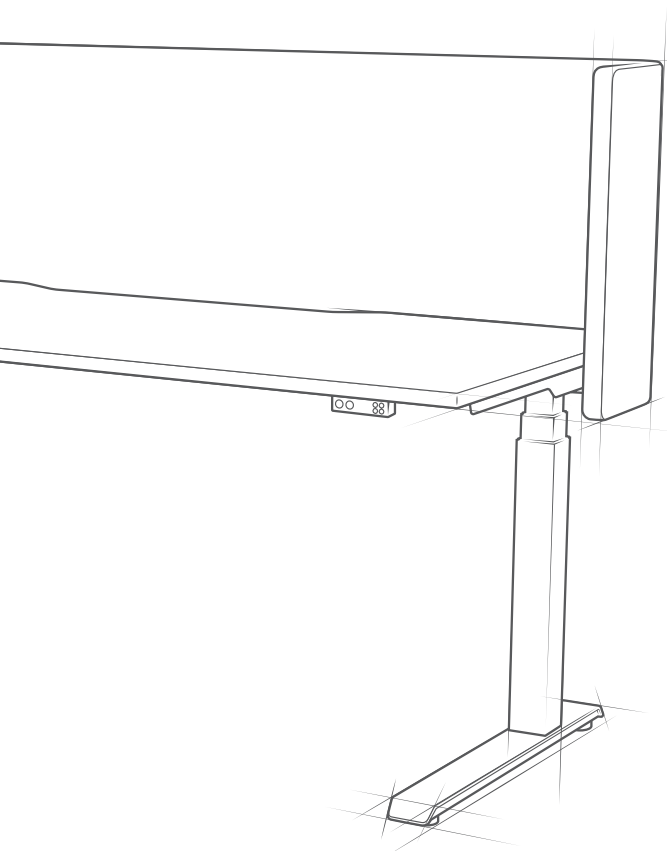

After choosing the most suitable desk and configuration, you can even customise your workstation screen. This flexibility allows you to adjust the placement of your screen and cater for different individuals and work styles. So, depending on what's required, you can prioritise collaboration between team members or individual privacy.

Choose from a screen that's mounted on the floor, desk, or centred between two back-to-back desks.

Select between ducted and non-ducted options.

A range of powdercoat finishes, with the added benefit of cable trays that keep unsightly cords hidden.

Made from E0 board, an environmentally-friendly material, your screen can even help to mute noise for additional privacy.

Screen Options

1. 50mm Ducted Screen

Option 1 Frame Mounted - Back to Back

Option 2 Floor Mounted - Single Sided
