

Case Study: Sebel Hotel Re-fit

Project: Sebel Hotel Wall Cladding re-fit and bar re-fit

Site: Melbourne CBD, Vic

Product: Akril 'Winter Storm'

Labour: 1 Installers

Akril an Australian owned product produced by Composite Materials Engineering has been specified and installed at Melbourne's Sebel Hotel.

Needing a face lift to hotel rooms and foyers, Sebel Hotels General Manager Mark Roberston specified Akril to give a face lift over the original painted glass panels in the hotel foyer.

With a wide range of up-to-the-minute colours and finishes available, Mark Robertson was able to pick from a variety of options to suit. Akril, in the Winter Storm gloss was selected as wall cladding in foyer of the reception, restaurant and bar areas.

The Sebel was able to operate as normal while Akril was installed during normal operating hours not interrupting patrons as they moved through the foyer. Akril we simply measured, cut in the maintenance room behind closed doors and them installed by maintenance at the Sebel Hotel.
