

A GUIDE TO CHOOSING
THE RIGHT WINDOW FILM
FOR YOUR SPACE

Licensed installer of 3M window film. Delivering the 3M advantage.

WHAT WINDOW FILMS CAN DO FOR YOU

There are many uses and endless benefits to window film that can both solve problems and enhance levels of comfort and appearance. We invite you to transform your home.

IMPROVES SAFETY & SECURITY IN YOUR HOME

BLOCKS HEAT & UV + SAVES ON ENERGY BILLS

HELPS PREVENT FURNITURE FROM FADING

REDUCES GLARE

ADDS PRIVACY OR A DECORATIVE TOUCH

3M Science.
Applied to Life.

1

Solar window films are an affordable solution to reducing UV and heat. They'll also help reduce your household's energy bills.

2

UV reduction will prevent your furniture, carpets and floorboards from fading.

3

Up to 7 times thicker, safety and security window films helps keep intruders out and holds shattered glass together, keeping you and your family safer.

4

Enjoy the most private of spaces in your home with privacy window films. Ideal for bathrooms & glass panels next to front doors.

5

Build on the style and character of your space with decorative film. Ask us about customised designs.

6

Reduced glare means there will be less reflection on your TV and computer screens.

FAQ's

WHY TINT FOR YOUR HOME?

There are so many reasons to tint your home or office! Reduce heat and provide insulation, reduce glare while watching TV or at the computer, provide daytime privacy without having to keep your blinds closed and it can even be used as a safety and a security feature as it holds shattered glass together in the event of an accident. And for the inner interior decorator in you, you can even use window film as a decorative touch!

WILL WINDOW FILM MAKE MY HOME DARK?

Film has a minimal impact on the look and feel of your home. In fact, the view is better because you're cutting out the glare and just leaving the view to admire!

WARRANTY INFORMATION

3M provides one of the most comprehensive and exclusion free warranties of any film manufacturer. Dependent on the choice of film, for residential application there are some films that come with a lifetime warranty.

HOW LONG DOES IT TAKE?

Installation time is dependent on a few factors: how many windows are being tinted, the film type being used and the glass that the film is being applied to, however the average home can be completed in less than a day.

WHAT'S THE PROCESS?

The in-home measure and quote process is the first step and is obligation-free. It's at this point that you'll be taken through the options and shown film samples. On installation day, we'll be sure to prepare and clean the area/s being tinted both before and after application and leave you with nothing but beautiful tinted windows to enjoy.

SUNSCREEN MAKE CHOOSING WINDOW FILM A BREEZE.

Contact us to talk through what a difference it can make and just how affordable window film for your home can be.
