Board and Batten. Navurban™ Albany Oak

Walls - Arc. Navurban™ White Mountain Oak.  
Linear Batten Acoustic Ceiling. Navurban™ Ravenswood

## Architectural & acoustic wall & ceiling finishes.

Made in Australia by Screenwood, Modulo Panel is a high quality, simple and cost effective linear solution for wall and ceiling applications.

The tongue and groove internal lining boards are finished in Navurban™ premium timber alternative. The sculpted profiles of Modulo Panel pre-finished boards have been designed to achieve a unique architectural finish for wall and ceiling linings in commercial, retail, education, hospitality and residential projects.

With seven different profiles the Modulo Panel range comes in 14 standard finishes sourced exclusively from NAV Designer Surfaces from the Navurban™ range. Navurban™ is engineered using Japanese non-PVC Olefin surface technology and 3D-embossed to create varied textures including fine and embossed-textured woodgrains with key features of being pre-finished, UV stable and stain and water resistant.

The MR MDF used in the production of Modulo Panel (Group 3) is E0 and sourced only from PEFC Certified Australian mills. There are also FR (Group 2) options available.

Modulo Panel products have been VOC tested and exceed GBCA requirements for commercial fit outs as well as having fire certification to AS5637.1 valid to NCC Vol 1 BCA 2019.
