

SpeedWalk

Eco-friendly rubber walkway system,
protect your roof membrane

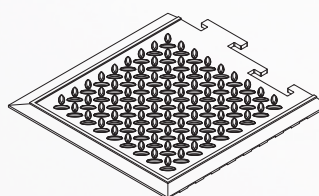

Affordable Flexibility

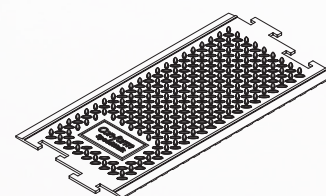

- Modular walkway system with fast & simple installation
- Protect your roof membrane and insulation products from damage
- Made from durable, high density, high quality recycled rubber
- High coefficient of friction, for a safe non-slip surface, even in wet weather
- System design allows water drainage & flow, eliminating pooling & run-off problems
- Engineered interlocking system, quick & easy to install

Versatile

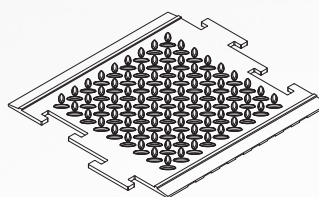

SpeedWalk is available in modular 600mm building blocks to suit your project's needs, turn and continue in any desired direction. Quickly span distances with the SpeedWalk 1200. Speedwalk will **protect your expensive roof membrane and insulation products from damage.**
