

## Newforma® Project Center

### Manage project information for more successful project delivery

Newforma® Project Center software is the engineering industry's most comprehensive way to manage all forms of project information, whether at your desk, from the web, or from mobile devices. It strengthens your company as it improves collaboration with your entire project team.

### Manage email, find information, respond more quickly

- File email with other project documents.
- Find project emails in seconds, even when they originate from people no longer with the firm.
- Search and find information in more than 200 industry file types, wherever it exists on your network, even when it's in a ZIP file attached to an email.
- Conduct searches in a single project; or in multiple active, archived, and off-line projects.
- Search for international language content.
- Access all project files via one convenient portal, no matter where those files reside on your network, even when managed by Bentley ProjectWise®, IBM FileNet®, or Microsoft SharePoint®.

### Share files as you enhance your brand

- Provide an easy-to-use Newforma website, branded with your logo, for transferring large files in and out of your company.
- Know who has (and has not) downloaded what, when.
- Coordinate distributed CAD or BIM datasets, streamline CA and design review workflows, and much more.
- Always be sure of working with the latest shared files.
- Integrate file transfers with cloud storage providers such as Box, Dropbox, and Google Drive.
- Give partners and remote workers easy web access to key info.
- When working with other companies using Newforma software, share project information seamlessly using Newforma-to-Newforma connectivity.

## Build your business:

**Manage risk.**

**Improve productivity.**

**Respond faster to clients and partners.**

**Deliver more successful projects.**

*"I'm down from 1,011 emails to approximately 35."*

*"We've invested in Newforma Project Center software to shorten response times and reduce the risk of mistakes."*

## The Newforma Difference

Many software products address different aspects of the project information management challenge. But they **silos information**, ask you to **give up applications** you use every day, **impose changes** on your IT infrastructure, or **raise the risk** of items slipping through the cracks. Newforma Project Center integrates with the infrastructure and applications you rely upon, such as email and document management systems, and replaces technology that falls short, such as FTP. As a result, Newforma's is the most effective solution to managing projects and project information.

## Improve profitability as you reduce risk

- Spend less time managing meeting minutes and action items as you improve team follow-through.
- Expedite final payment by creating self-contained, organized and distributable closeout files.
- Refer to emails and automatically generated audit trails to avoid disputes and support invoices.
- Review and compare documents on-screen.
- View and mark up files with easy-to-use annotation and drawing tools, whether on your desktop, on the web, or on mobile devices.
- Stamp drawings electronically.

## Bridge the office-field divide to improve productivity

- Download plans, email and other project information to tablets and smartphones using Newforma mobile apps.
- Upload field-captured data to the office (and the rest of your project team) from your mobile devices.

"Our business is more competitive than ever. To make sure clients continue to give us repeat business, we've invested in Newforma Project Center software to shorten response times and reduce the risk of mistakes."

– BergerABAM

"To be honest, I never believed Newforma when they said that we would clear up our inboxes, but they were right. I'm down from 1,011 emails to approximately 35."

– Environmental Systems Design

"At a time when lots of competitors are vying for our clients, I like the idea of providing the best service in the industry."

– PCS Structural Solutions
