# The Advantages of Kerlite Easy

## Shock Resistant

with superior durability because of Kerlite & Silent properties.

## Sound Absorbing

thanks to the combined action of the SILENT mat and Kerlite.

## Stable

by combining Kerlite Plus with the unique Soundproof Matting & Sealant Filler.

## Waterproof

and guaranteed by combining Kerlite and the FILLER sealant.

## Light Weight

being only 13Kg/m<sup>2</sup> there is less weight on existing structure.

## Easy To Install

using a new laying method for porcelain tiles that is simple.

## Antimicrobial

with PROTECT technology Kerlite guarantees a safe environment.

## Safe

and compliant with strict European and American standards for flooring.

## Environmentally Green

with the possibility to periodically replace the materials and re-use in other environments

## Removable

making it possible to create a beautiful floor solution for trade fairs and temporary shops.

## Fast Installation

that is straight forward and easy to prepare and install.

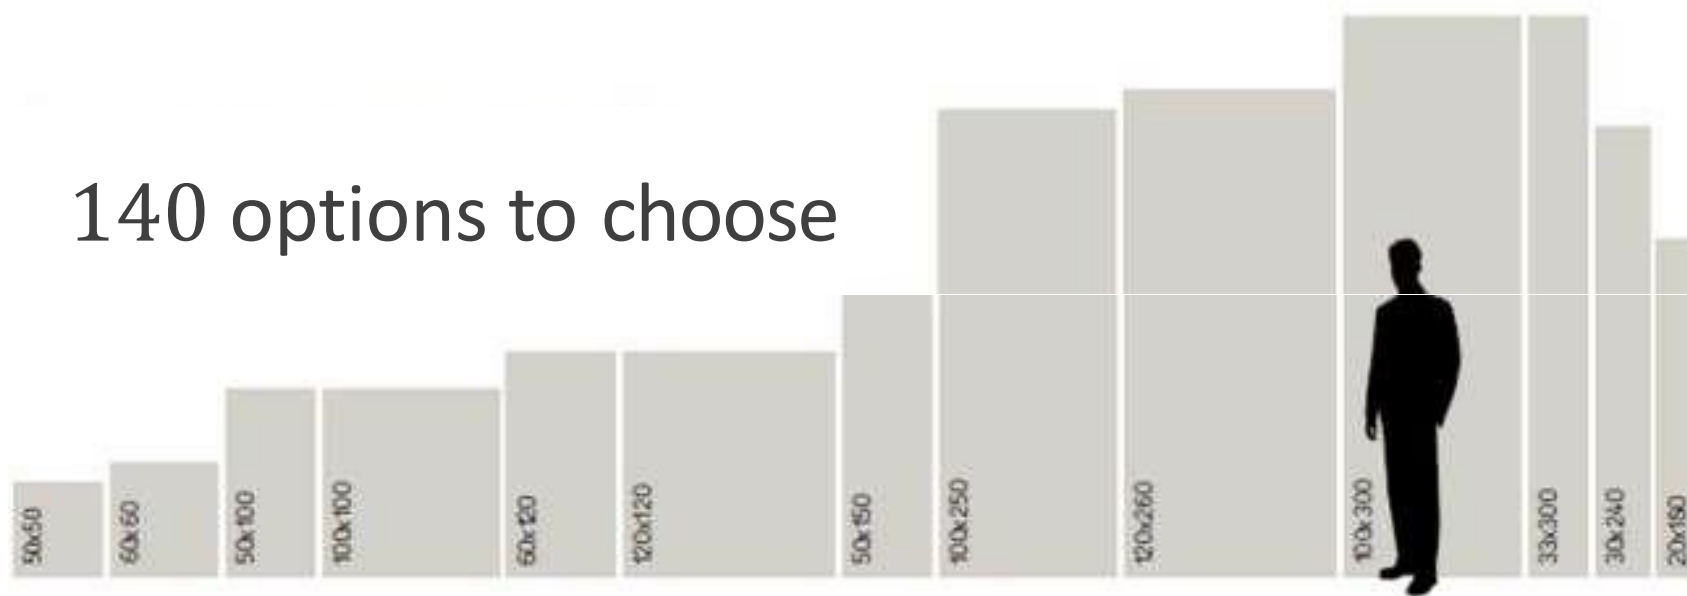

## Cost Effective

because of no demolition, no re-waterproofing and less time for installation.

# Kerlite 5plus and 6plus

140 options to choose

Porcelain slabs of the highest standards in quality & performance, with excellent aesthetics thanks to exclusive surface processing technologies.

# Assembling The System

1

**Silent**

SOUNDPROOFING  
MAT

## Unroll and extend the base matt

After ensuring the subfloor is clean and level, proceed with laying the SILENT soundproofing matt on the entire floor.

2

**Kerlite**

5plus  
6plus

## Lay the Kerlite slabs

Lay the chosen 5plus or 6plus colour Kerlite directly on the matt without the use of adhesives. Use 2mm spacers to maintain a constant space between the slabs.

3

**Filler**

FINISHING  
SEALANT

## Seal the grout joints

After laying the Kerlite floor, to seal the spaces between the slabs with FILLER. Once dry, this sealant guarantees a perfect walkable and waterproof surface.
