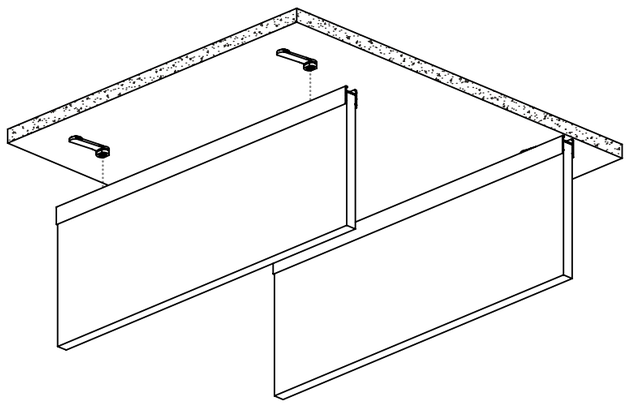
FRONTIER™ INSTALLATION OPTIONS
METHOD SELECTION

AUTEX

THE FIRST CONSIDERATION TO MAKE WHEN SPECIFYING A FRONTIER SYSTEM IS THE INSTALLATION METHOD.

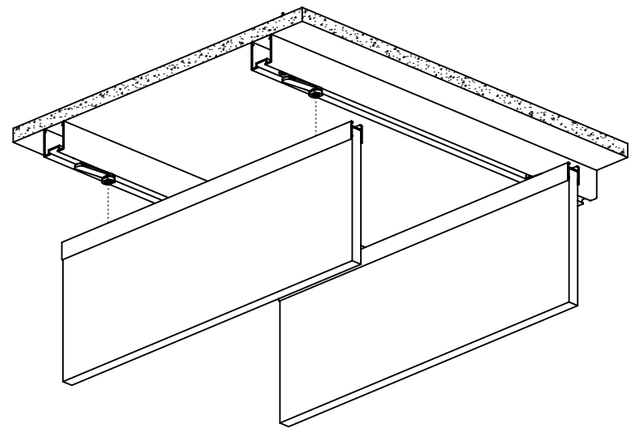
1. DIRECT FIXED TO CEILING
SEE PAGE 2



PACK INCLUDES
Autex Mounting Clips
Autex Frontier Extrusions
Autex Frontier Fins/Rafts

NOT SUPPLIED
Fasteners (to substrate)

2. DIRECT FIXED TO RAILS
SEE PAGE 3

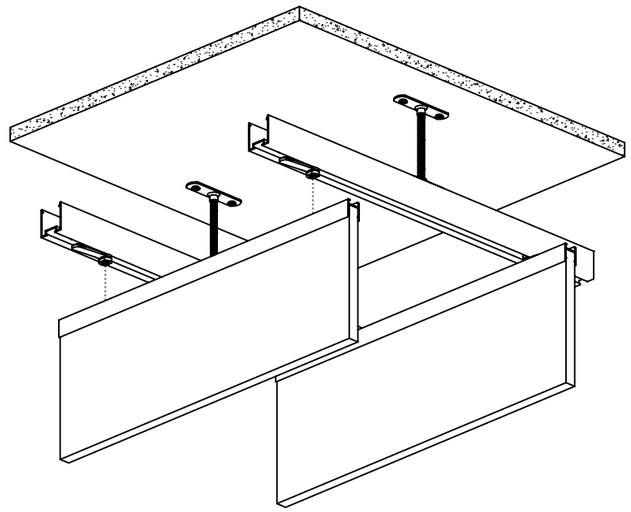


PACK INCLUDES
Autex Mounting Clips
Autex Frontier Extrusions
Autex Frontier Fins/Rafts

ADDITIONAL COMPONENTS REQUIRED
Autex Frontier Cross Rails x2

NOT SUPPLIED
Fasteners (to substrate)

3. SUSPENDED FROM RAILS
SEE PAGE 4



PACK INCLUDES
Autex Mounting Clips
Autex Frontier Extrusions
Autex Frontier Fins/Rafts

ADDITIONAL COMPONENTS REQUIRED
Autex Frontier Cross Rails x2
Autex W-Clips

NOT SUPPLIED
Fasteners (to substrate)
M6 Threaded Rod
M6 Back Plates to ceiling

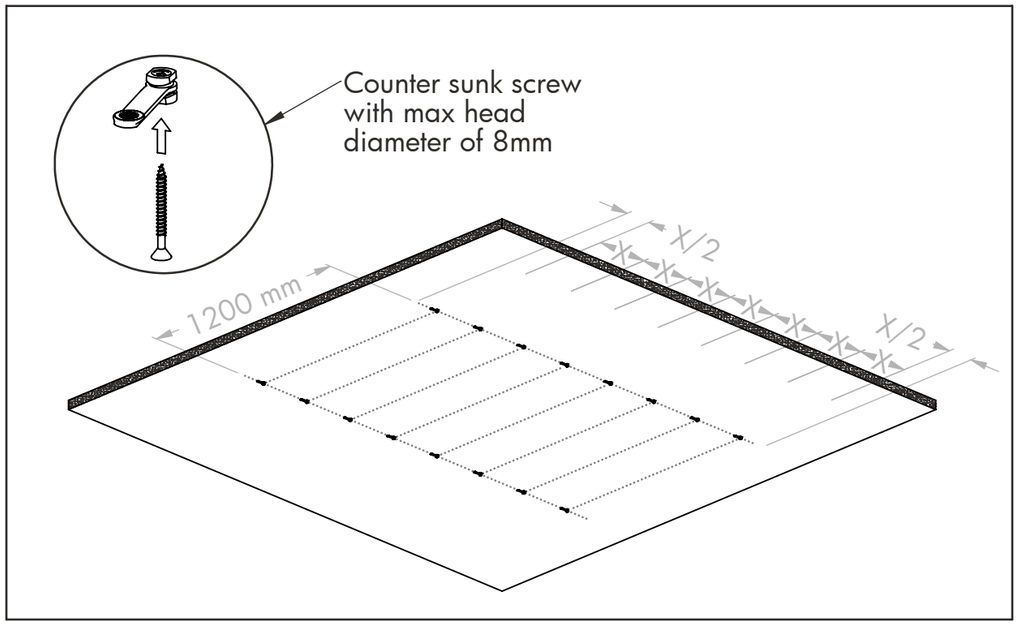
For suspended installations it is strongly recommended to consult a building engineer for seismic considerations. See Pages 23-29 for suggested details.

For all installations in sprinklered buildings, consult a fire engineer to ensure the intended position of the Frontier Fins/Rafts meet sprinkler and alarm standards.
Further detail on the fire standards can be found in the supplemental document **"Fire Considerations for Autex Frontier Acoustic Fins"**.

FRONTIER™ INSTALLATION METHOD 1
DIRECT FIX TO CEILING

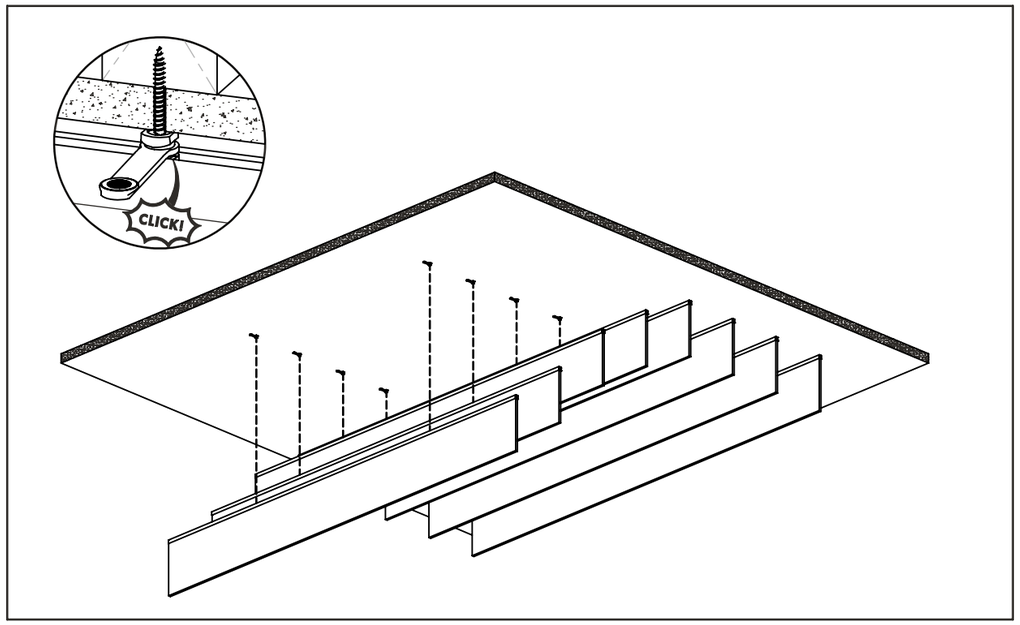
AUTEX

1.



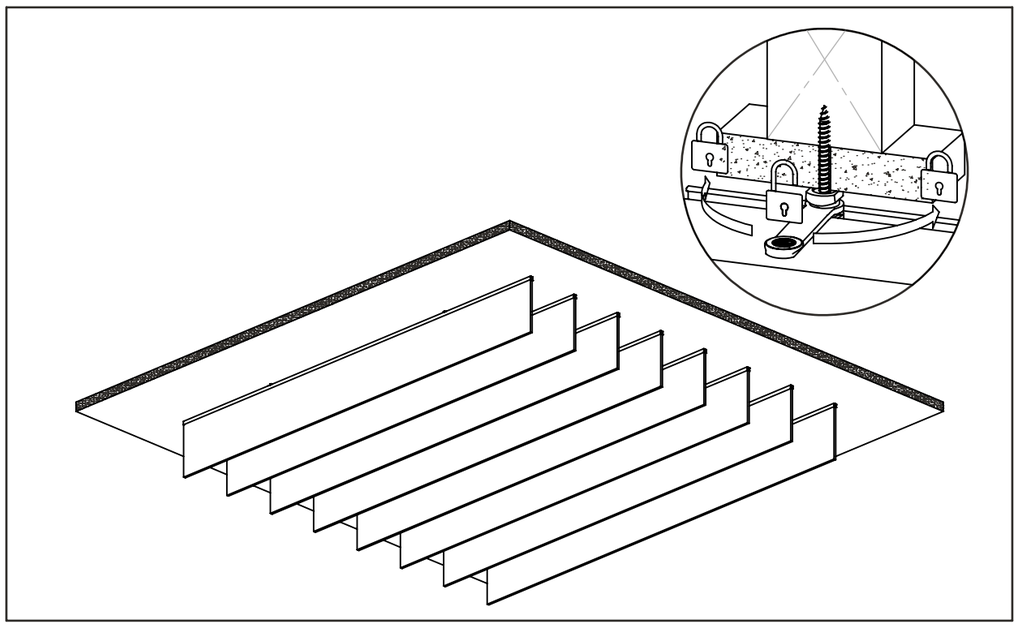
Mark out your ceiling at the recommended spacing for your chosen product **(refer to table on page 5 for details)**. Screw the Autex Mounting Clips into the ceiling using screws suitable for the substrate (not supplied).

2.

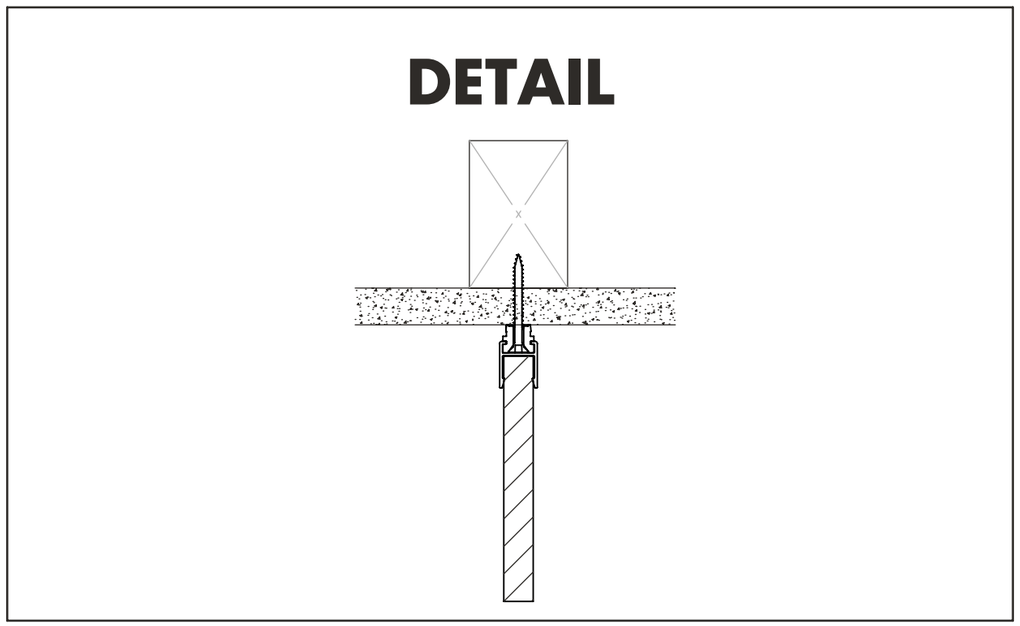


Lift the assembled Fins/Rafts into place and click them onto the Autex Mounting Clips. Turn the clips 45 Deg to temporarily hold the Fin/Raft in place while allowing adjustment along the length.

3.



When you are satisfied with the alignment of the Fins/Rafts turn the clips 90 degrees so they clip into the channel and lock in place.

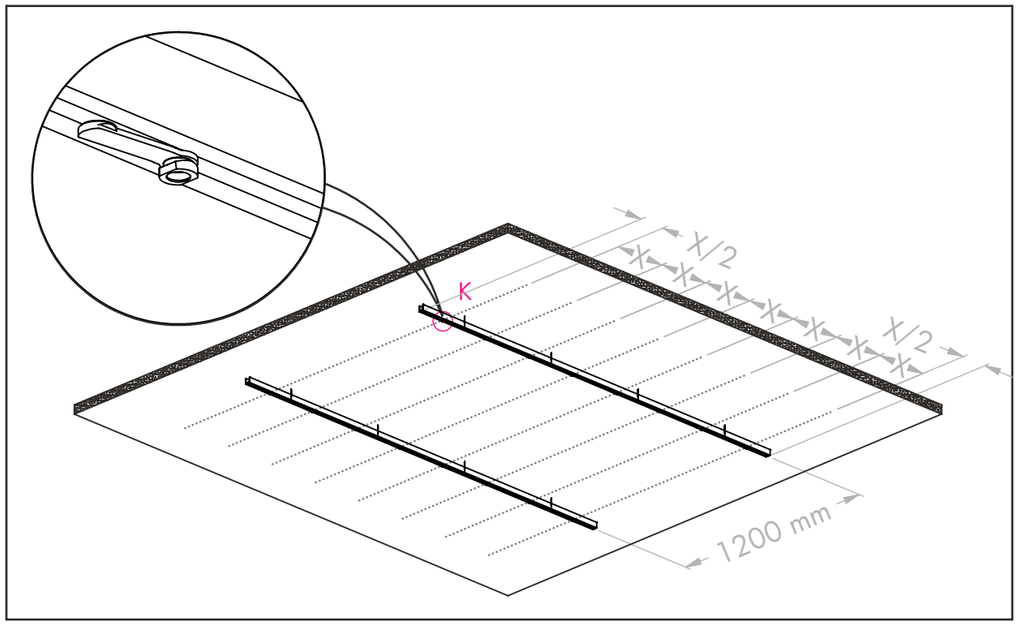


Ensure suitable fastener for the clip and substrate is used (not supplied).

FRONTIER™ INSTALLATION METHOD 2
DIRECT FIX TO RAIL

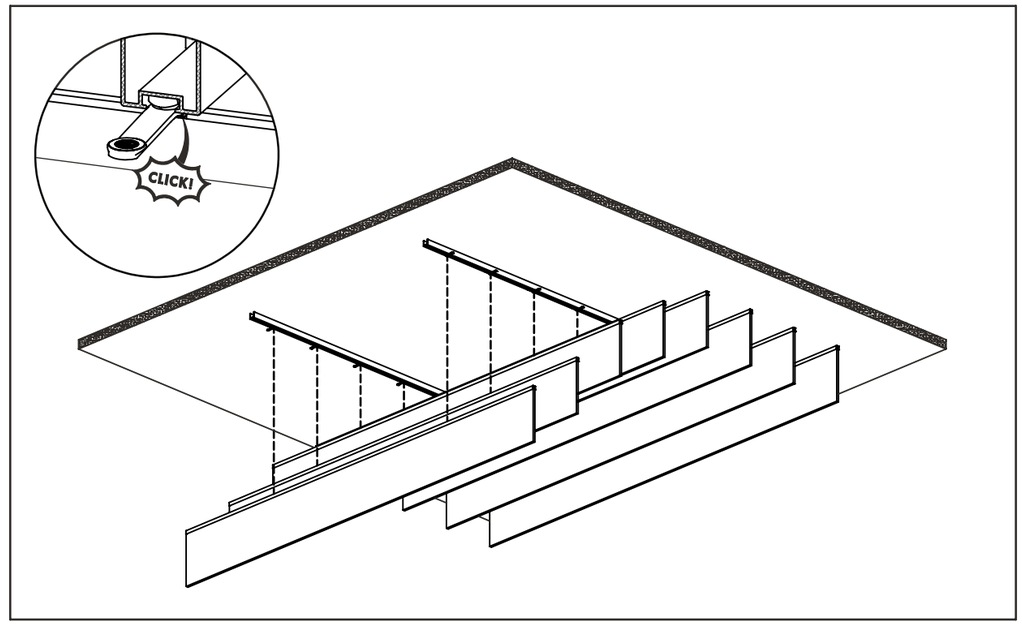
AUTEX

1.



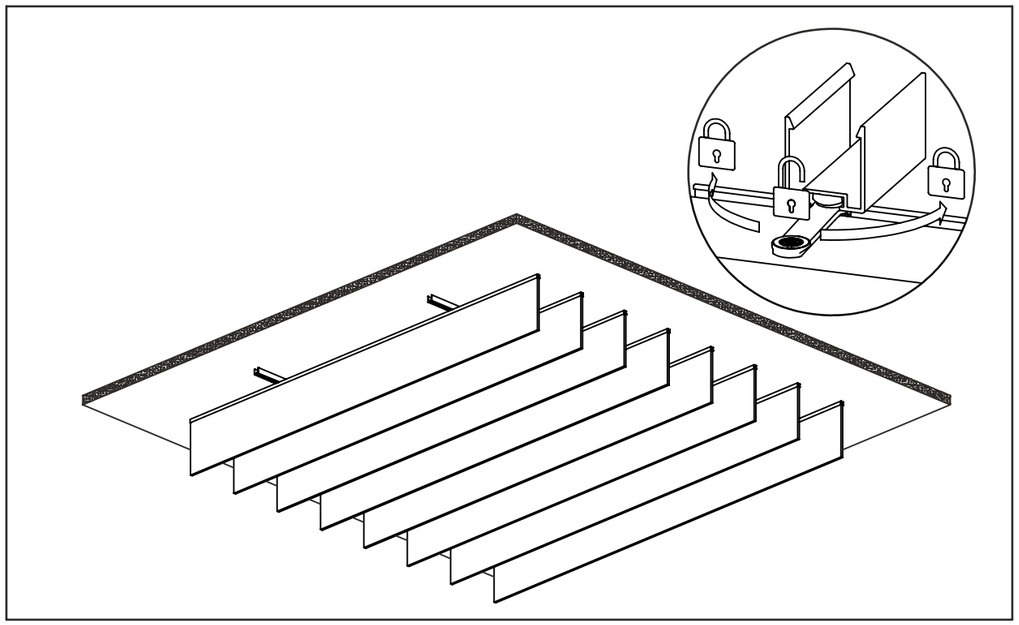
Mark out the ceiling and screw in 2x cross rails at 1200 mm centres using screws suitable for the substrate (not supplied) at max centres of 600 mm. Insert the Autex Mounting Clips at the desired fin spacing. Fin spacing can be marked on the cross rails prior to installation. **(Refer to table on page 5 for details).**

2.



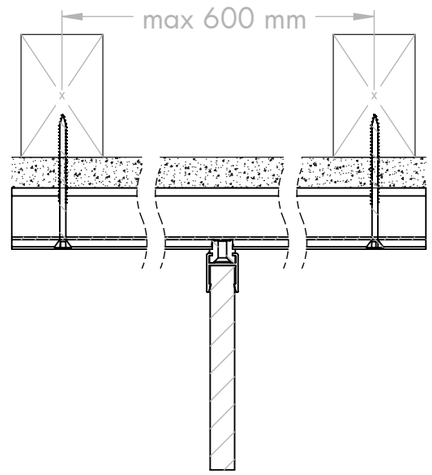
Lift the assembled Fins/Rafts into place and click them onto the Autex Mounting Clips. Turn the clips 45 Deg to temporarily hold the Fin/Raft in place while allowing adjustment along the length.

3.



When you are satisfied with the alignment of the Fins/Rafts turn the clips 90 degrees so they clip into the channel and lock in place.

DETAIL

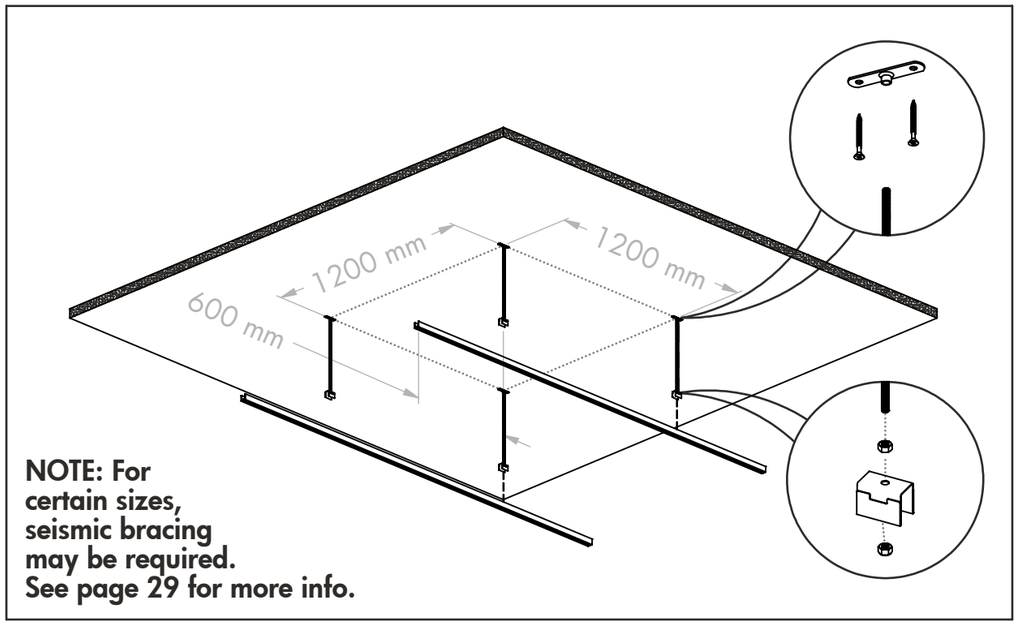


Ensure suitable fastener for the clip, rail and substrate is used. For additional security, the Autex Mounting Clips can be screwed into the cross rail.

FRONTIER™ INSTALLATION METHOD 3
SUSPENDED FROM RAIL

AUTEX

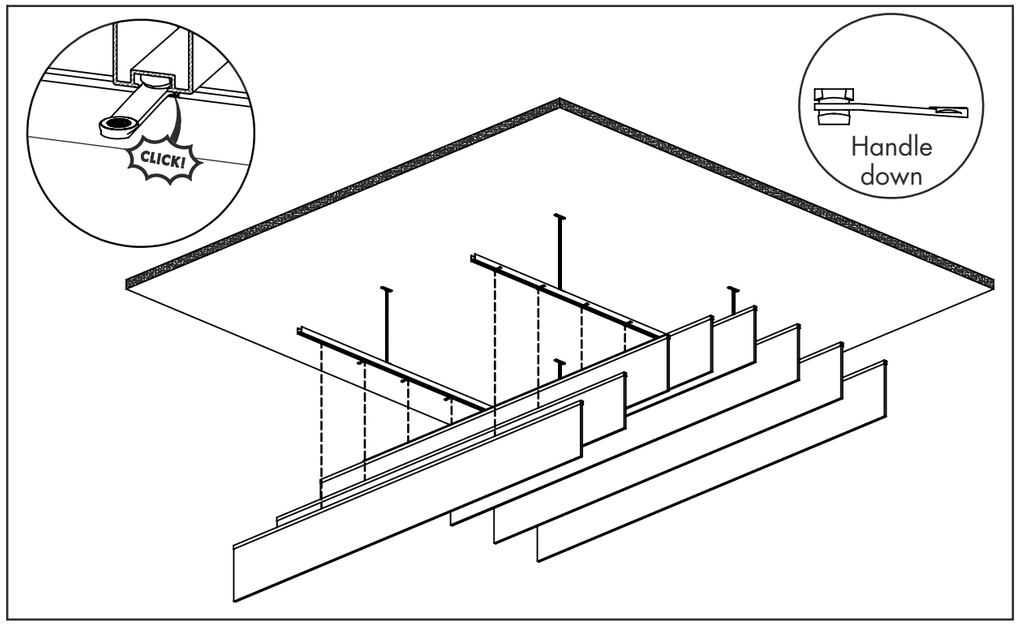
1.



NOTE: For certain sizes, seismic bracing may be required. See page 29 for more info.

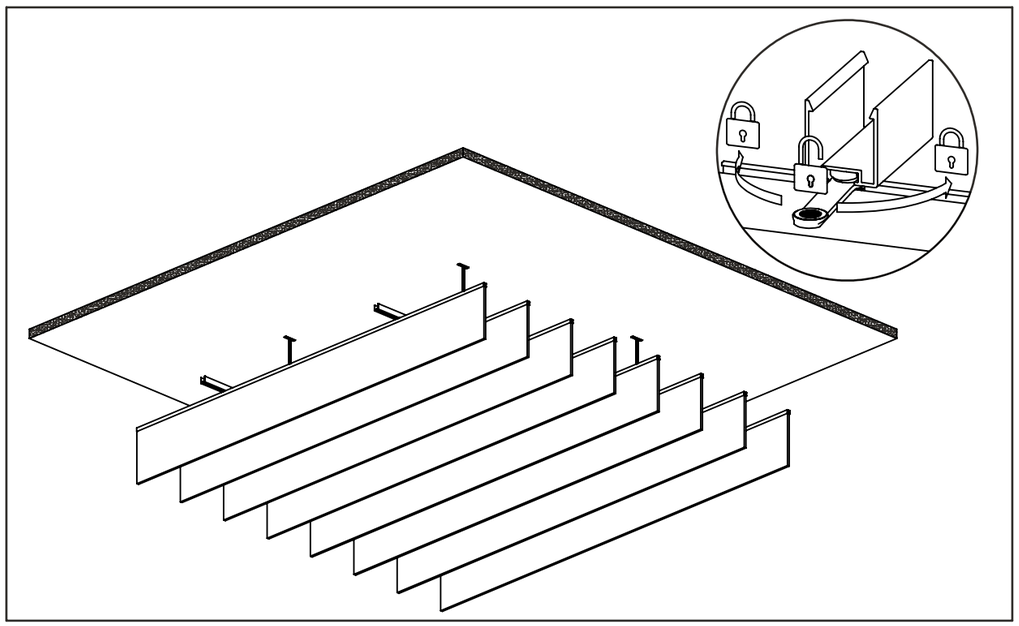
Mark out the ceiling and screw in 4x backing plates suitable for M6 threaded rod in a 1200 mm x 1200 mm square using screws suitable for the substrate (not supplied). Fin spacing can be marked on the cross rails prior to being clipped onto the Removable W-Clips. **(Refer to table on page 5 for details).**

2.



Insert the Autex Mounting Clips at the desired fin spacing on the cross rails with the handle tilted towards the floor. Lift the assembled Fins/Rafts into place and click them onto the Autex Mounting Clips. Turn the clips 45 Deg to temporarily hold the Fin/Raft in place while allowing adjustment along the length.

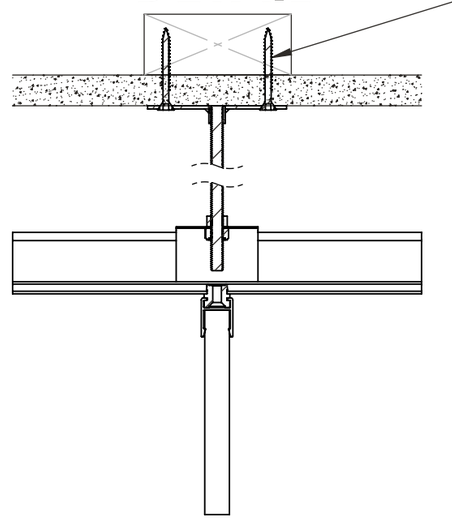
3.



When you are satisfied with the alignment of the Fins/Rafts turn the clips 90° so they clip into the channel and lock in place.

NOTE: In sprinklered buildings please check with local fire engineer for sprinkler layouts and hanging requirements.

DETAIL



PLEASE NOTE, the threaded rod and backing plate suspension method is the default option for large installations. As these parts are supplied by a third party, please see your account manager for preferred supplier in your territory. For smaller installations, adjustable cable hangers are available from Autex.

FRONTIER™ FRONTIER BOX PACKAGE CONTENTS

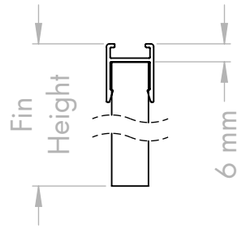
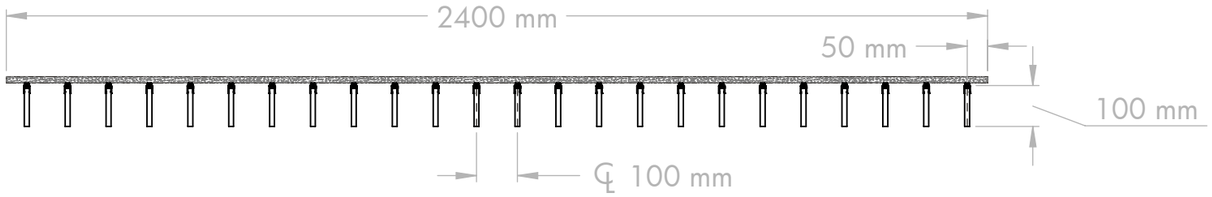
NOTES

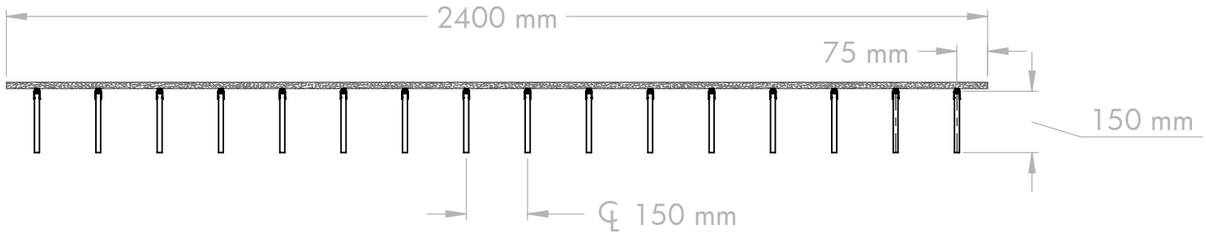
- Recommended guide for listed ceiling coverage is for the fin spacing to be equal to the fin height.

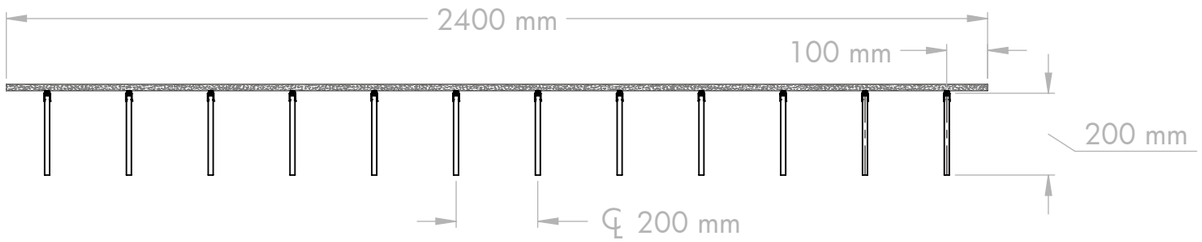
- Fin height is inclusive of the Autex Frontier Extrusion

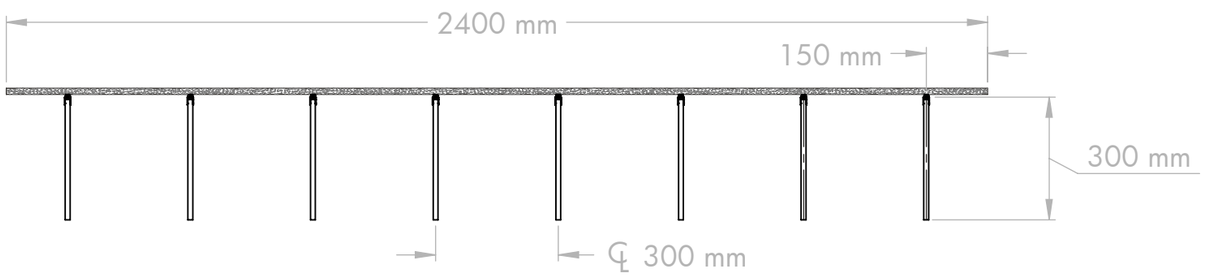


FIN SPACING = FIN HEIGHT

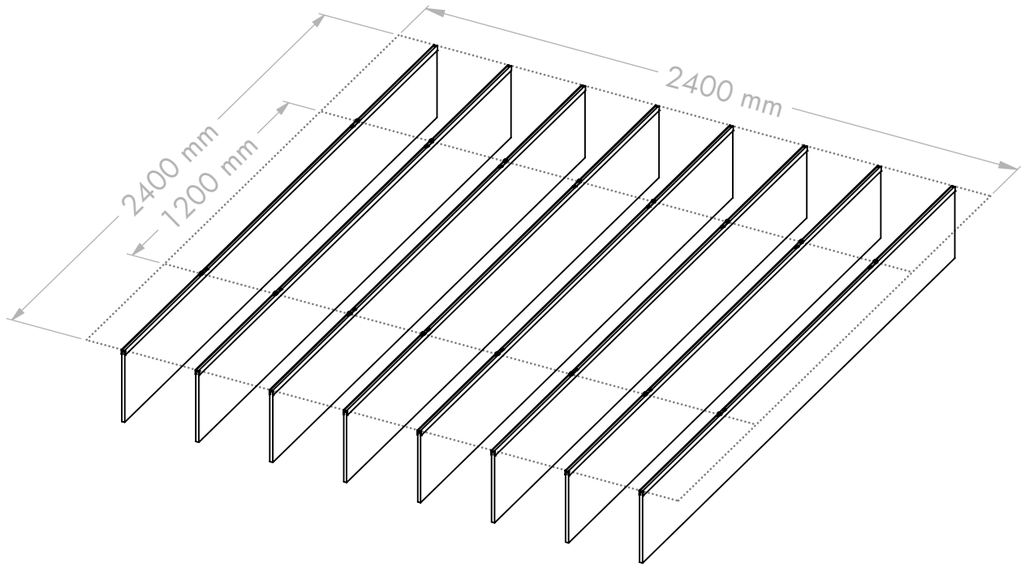




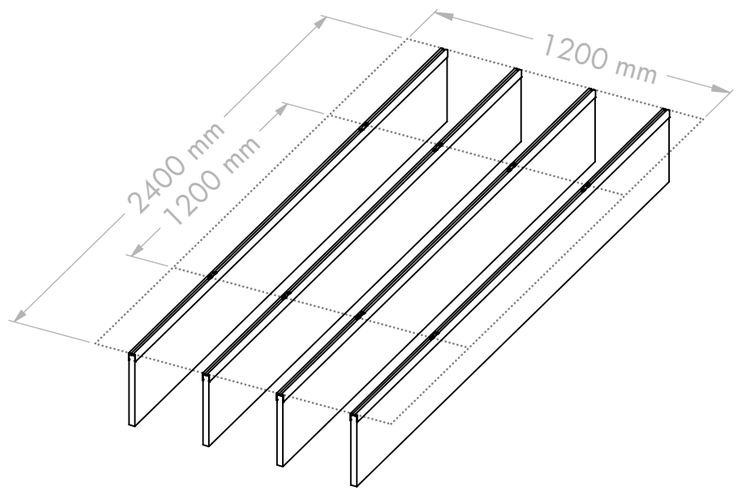




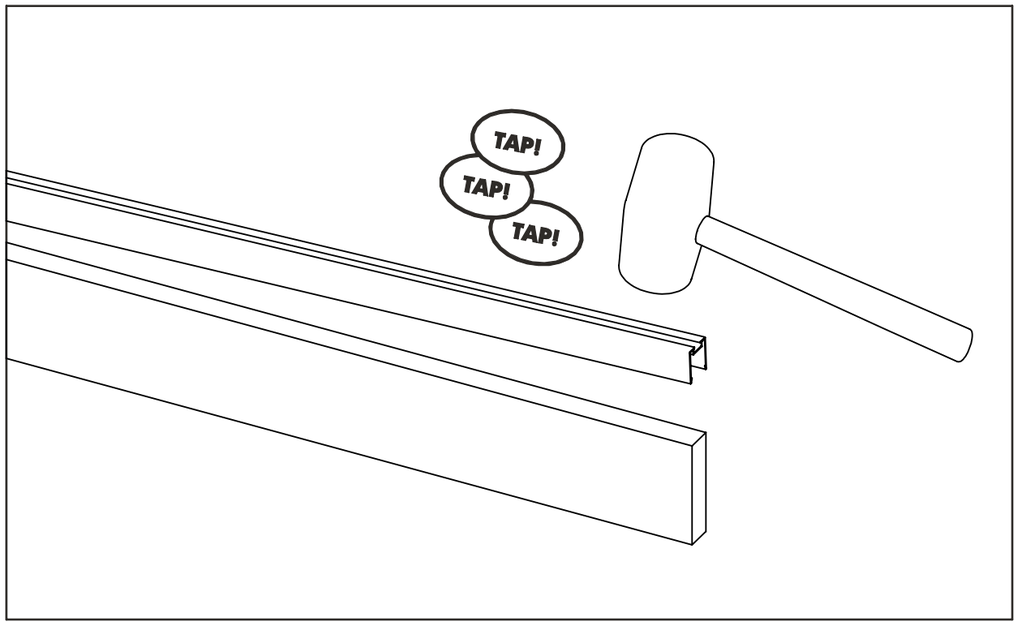
1x Pack of 12 mm Fins = 5.76 m²



1x Pack of 24 mm Fins = 2.88 m²

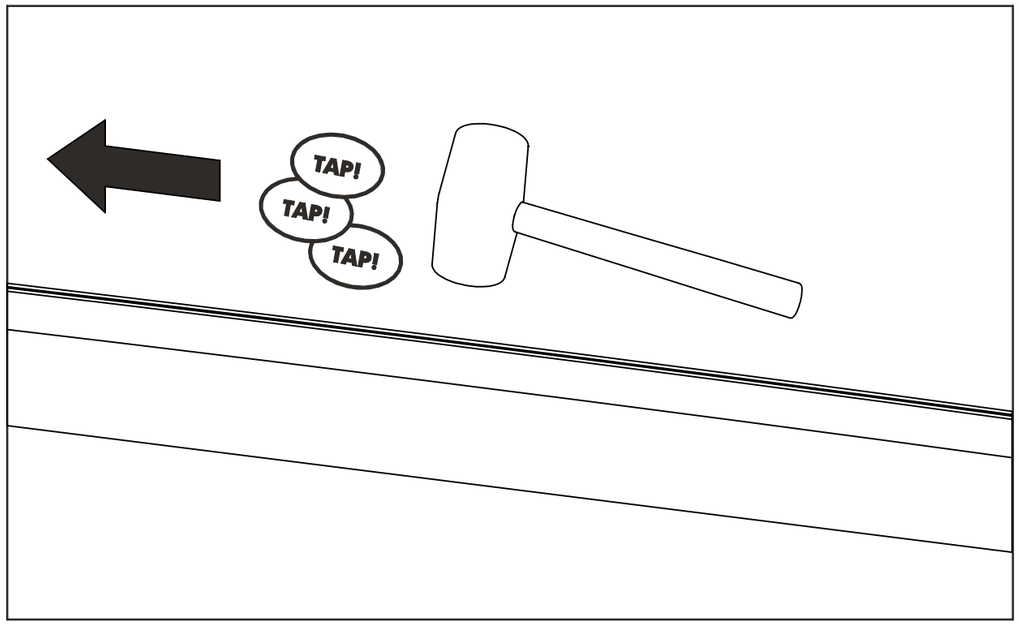


1.



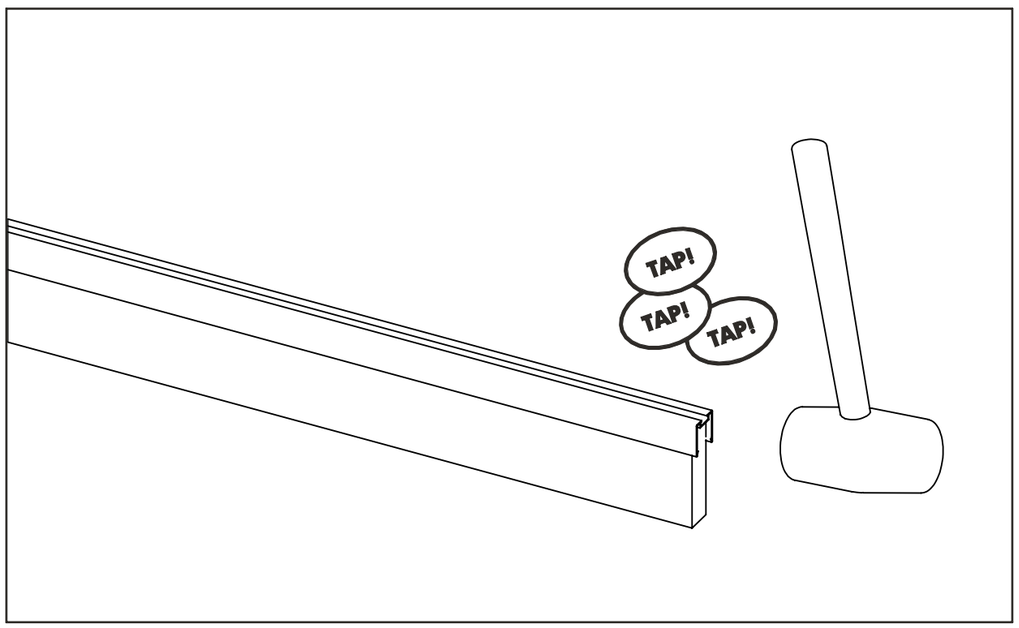
Using a rubber mallet, seat the channel onto the fin.

2.



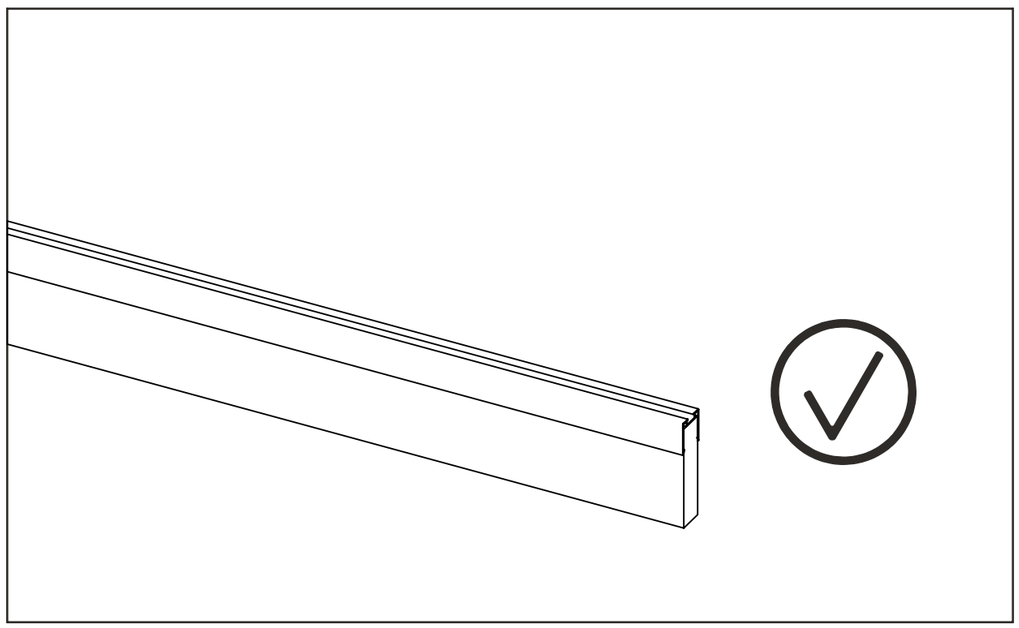
Starting at one end and using the mallet, tap along the length of the channel to ensure there is no bowing in the centre and the channel is seated correctly.

3.



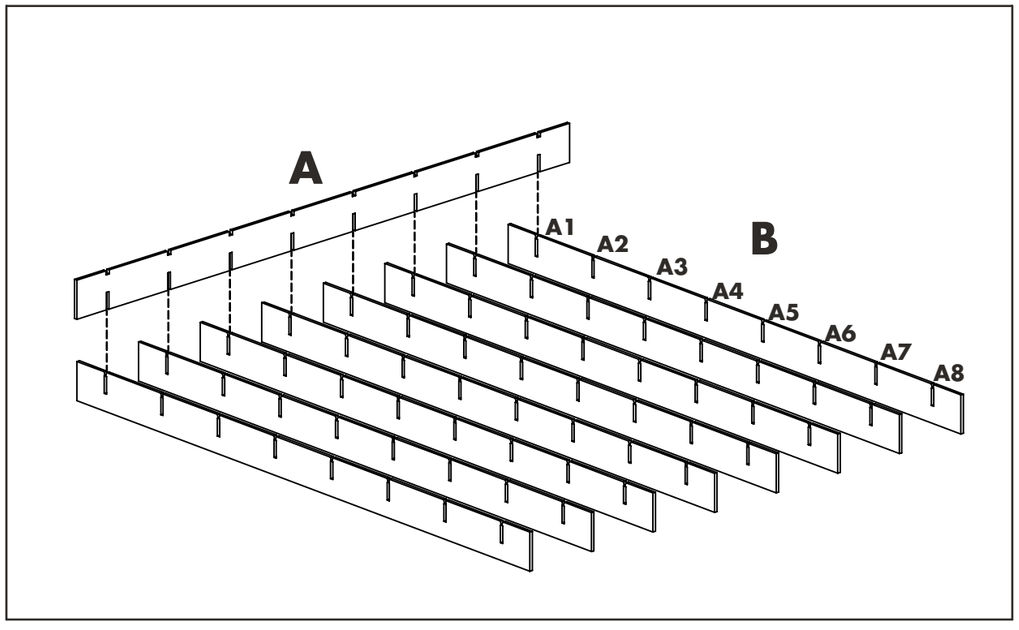
Ensure the end of the channel is aligned with the Frontier Fin by tapping the overhanging end of the extrusion.

4.



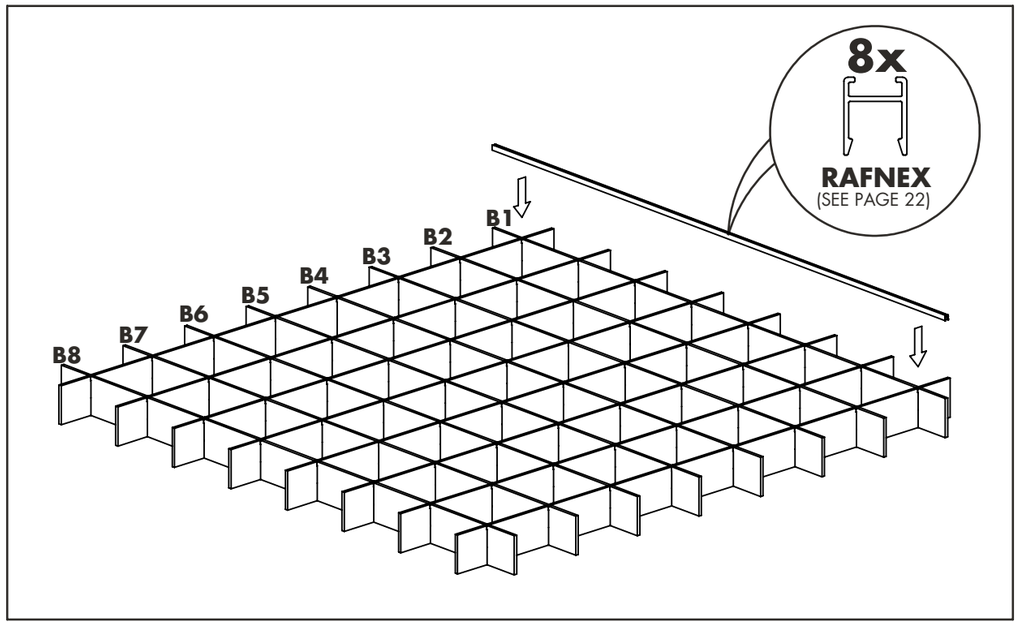
The Frontier Fin is now ready for installation to the ceiling.

1.



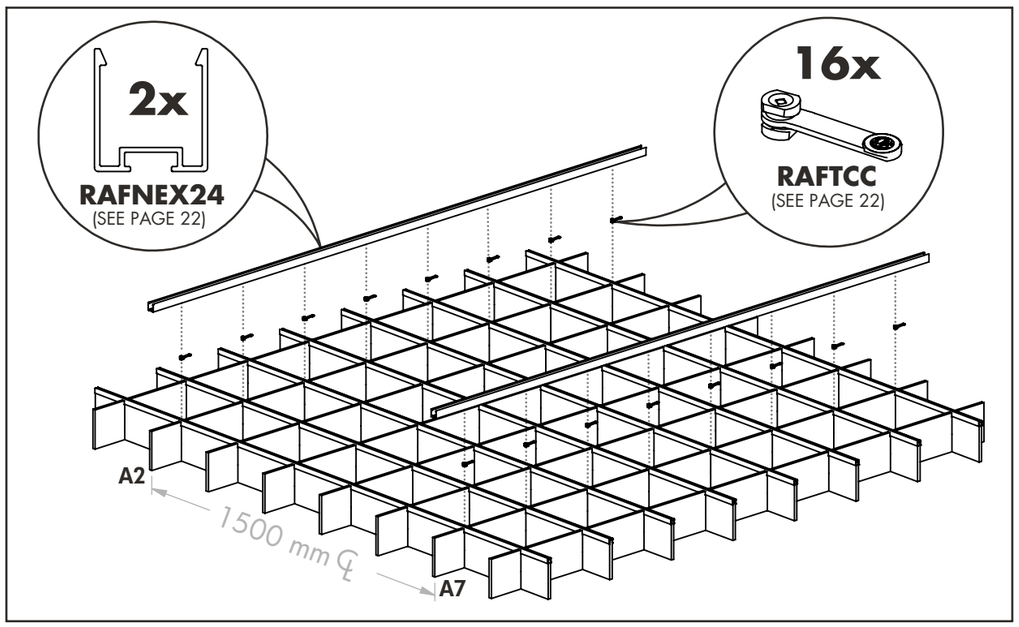
In the Frontier Axis pack there are two types of Fin (A & B). Part A has two notches and the small notch should be facing up when inserted into Part B.

2.



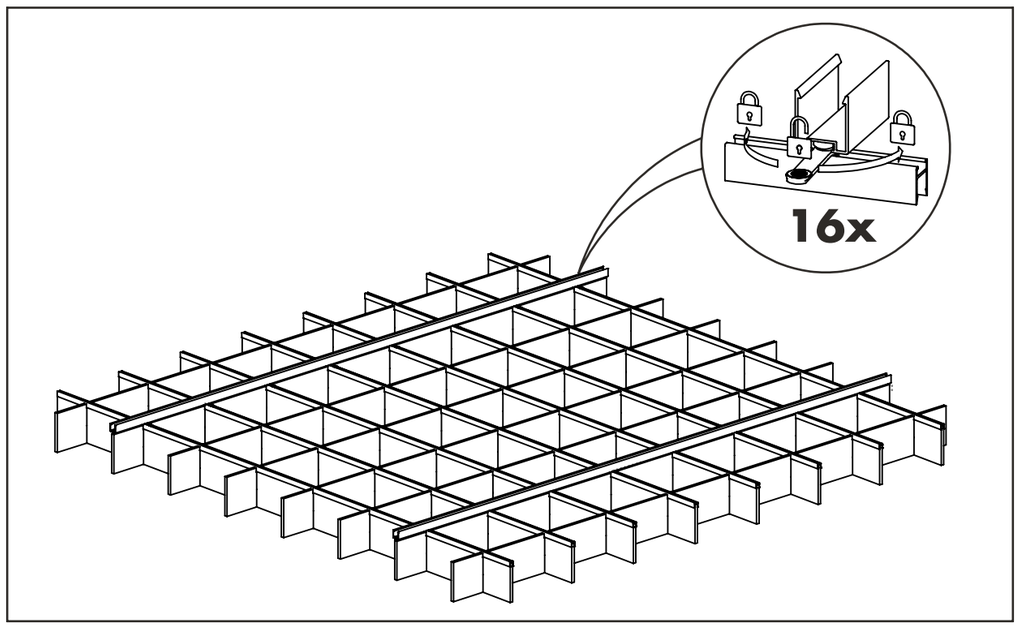
Using a rubber mallet, attach the 8x Rafnex channels along the lengths of the 'B' fins to lock the Axis Fins together in a grid.

3.



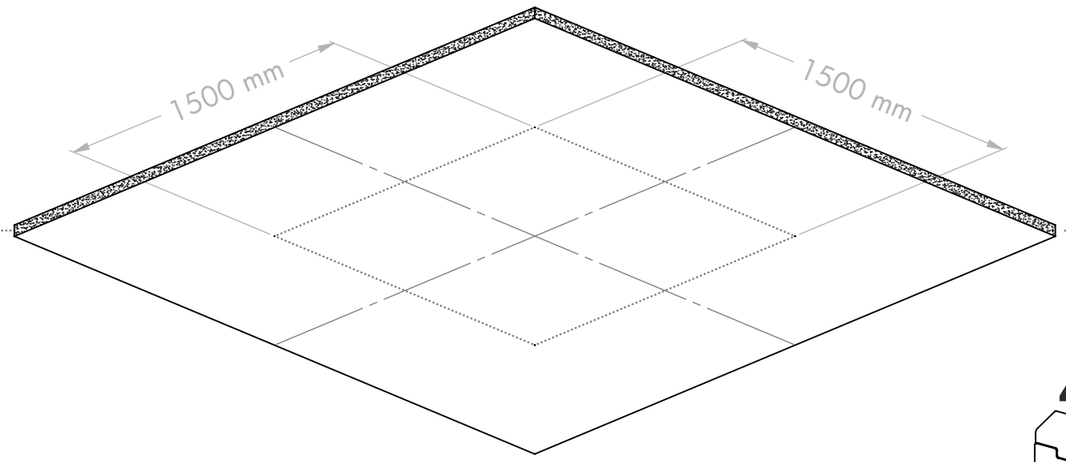
To attach the included 2x RAFNEX24 cross rails, first clip the 16x Autex Mounting Clips at the intersection points along the A2 & A7 Rails. Press the Crossrail onto the clips so they click into place.

4.



Twist the Autex Mounting Clips 90deg to lock them off. The Frontier Axis Grid is now ready for installation to the ceiling.

CEILING SETOUT



4x

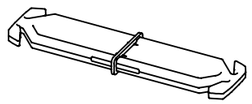
FRONTIER™ INSTALLATION TIPS
EXTRUSION JOINER DETAIL

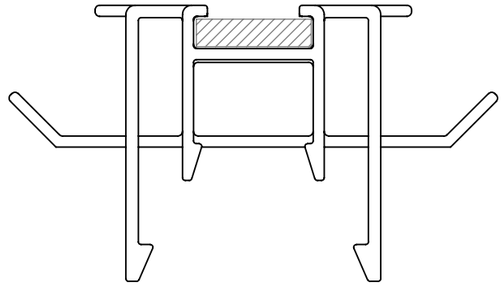
AUTEX

RAFCCT

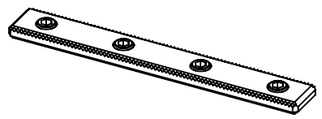


Light duty plastic connector used to join direct fixed rails.

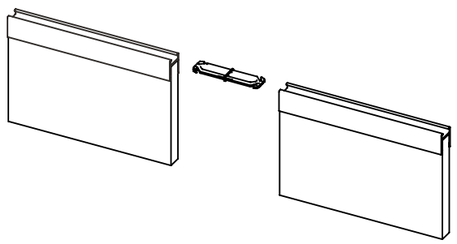
Both joiners are compatible with all extrusion sizes

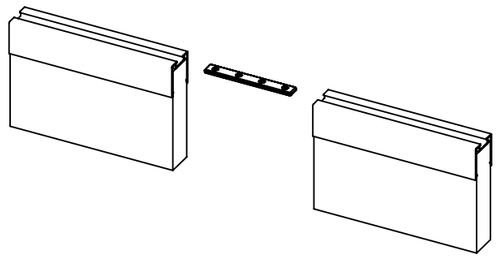


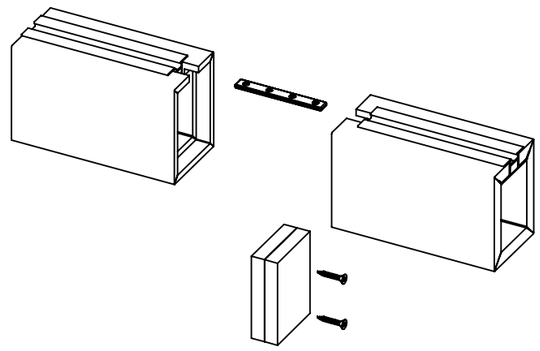
RAFHDCC



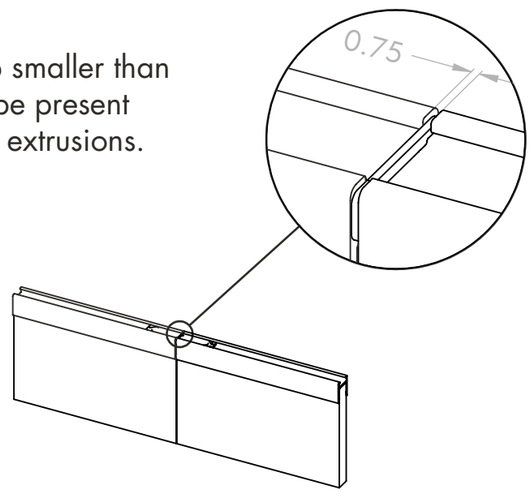
Heavy duty diecast connector with 4x grub screws used to join cross rails and/or suspended rails.



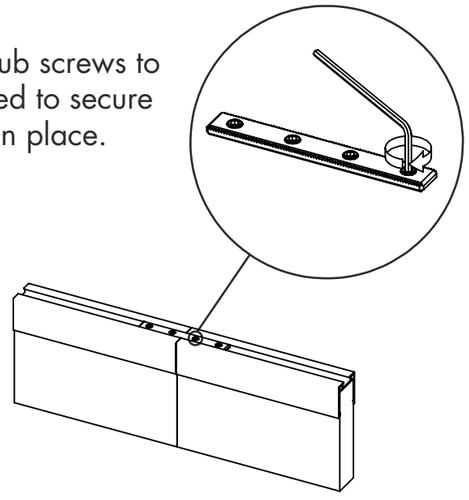




NOTE: A gap smaller than 1 mm will be present between the extrusions.



NOTE: Grub screws to be tightened to secure joiner in place.



NOTE: In addition to joiner, screw the end caps together to create a cleaner join
