

NAIL STRIP PANELS

Uses:

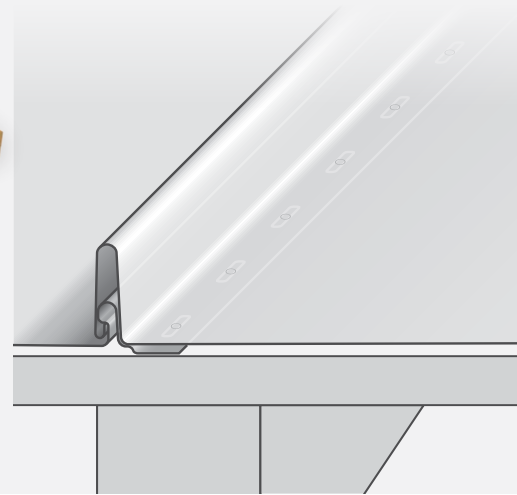

Roofing

Wall cladding

Soffit cladding

Nail Strip panel profile and installation shown on 17mm ply board over supports.

Benefits:

- Simple system to install.
- Same appearance as snap lock panels.
- Fast installation as no clips required, therefore good choice for standard roofing and wall cladding applications using conventional materials such as colorbond steel.
- Ability to adapt to lower pitched roofs, with a 38mm seam height accepting pitch down to 1.5 degrees.
- Economical due to minimum wastage of materials.

NAIL STRIP PANELS

Available in

Material	Coated steel (colorbond or similar)	Corten [†]
Thickness	Min. 0.55mm	Min. 0.55mm
