

GRIPSET C-1R

**WATERPROOF
CEMENTITIOUS SLURRY**

**Suitable for
underground and
immersed area**

**Highly durable
finish**

**Compatible surface
for renders, textures
and paints**

Gripset C-1R is a hydraulic setting sealing slurry with outstanding sulphate resistant properties for waterproofing surfaces in subterranean areas and substrates exposed to ground moisture. Designed for use as a sealing slurry membrane on vertical and horizontal surfaces made of concrete, masonry or porous cementitious plaster.

**The most
economical slab
edge protection
system**

FEATURES & BENEFITS

- Highly resistant to sulphates in underground environments
- Solvent free, non-toxic and non-flammable
- Waterproof, withstanding continuously wet environments
- Resistant to frost and de-icing salts
- Can be applied over damp or "green" concrete
