

SMARTFRAME

The SmartFrame Design Centre
provides comprehensive integrated design solutions.

On receipt of comprehensible plans and instructions, the client will be provided with:

- A dedicated estimator to work with the client during the developmental and design stages to help develop the most economic/practical design solution.
- Clear documentation for a PRELIMINARY design solution of the requested work in a timely manner, this documentation to include a clear description of items included/not included in the design solution.
- An "Acceptance of SmartFrame design solution" which is to be signed by the builder to indicate that he/she has checked the preliminary design and desires to proceed with the order.

On receipt of signed "Acceptance of SmartFrame design solution" and purchase order from a Timber Merchant, a FINAL colour A3 (up to A1 on request) SmartFrame design solution document will be provided accompanying each order.

The SmartFrame "Plain English" Design Commitment

Problems caused by reasonably foreseen errors and omissions by SmartFrame estimating staff will be corrected by providing the necessary estimating and engineering time to correct the error or omission on the SmartFrame design solution documentation and the supply of the omitted/additional material at no cost.

This design commitment however will NOT apply to:

- SmartFrame design solutions prepared from client plans and or sketches that do not display proper dimensions (design solution based upon scaled plans)
- SmartFrame design solutions that still carry the "Preliminary Watermark"
- Any SmartFrame design solutions based upon verbal instructions only.

Call 1300 668 650 or www.smartdata.com.au for more information
