Press Release

3 June 2013

Formula proudly announces the receipt of a Design Award in the Architecture and Interiors Category as part of the Australian International Design Awards.

It is fantastic that the merits of this system have been recognised by the design community and a highly respected judging panel.

Shift is a unique partition system as it is truly fully demountable and reconfigurable. It is designed and produced in Australia which means shorter lead times and excellent serviceability.

Shift also carries a long list of environmental credentials:

- Can be reconfigured many times with no waste or spare parts
- Designed for Disassembly - easy to recycle at life end
- Designed for Modularity - easy to reuse and reconfigure
- Australian made with locally sourced materials
- GECA certified
- VOC tested
- 5 year warranty

This is the first system from Formula as part of the expansion of the business to include Architectural interior systems.

Formula has been building **commercial fitouts in Sydney, Melbourne and Brisbane** for over 50 years so they understand what makes a good wall system- not only does it need to perform but it needs to be easy to build and accommodate site conditions.

Our Melbourne office has been supplying and installing **partitions in Melbourne**, previously as Everyready Partitions- the depth of knowledge and experience is vast.

As your **office fitout professionals**, we can offer a complete range of fitout services and a vast range of partition systems to allow for flexibility of your floorplate.

For further information, call 1300 034 034 or email at contact@formulainteriors.com.au or visit our website at www.formulainteriors.com.au
