

SERIES 2^{lite}

Surface Mounted Platform System - Lightweight, cost-effective, height adjustable, designed for flat surfaces.

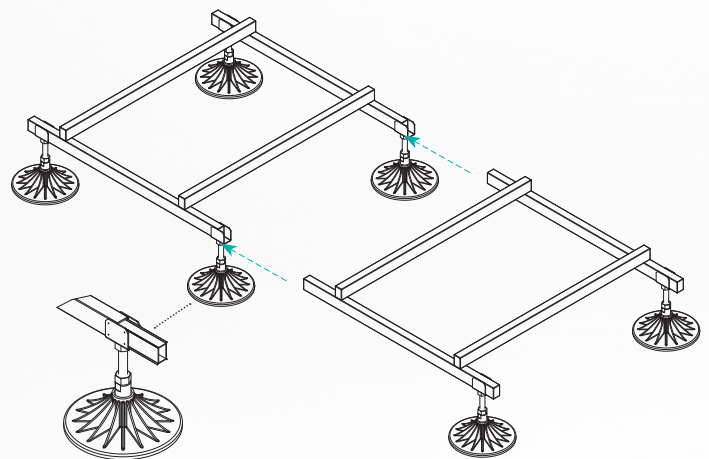

Affordable Flexibility

- Cost effective lightweight aluminium platform system
- Modular framework offers versatile expansion possibilities, including height adjustable base supports
- Made from aluminium, backed by a 20-year warranty
- The free standing system eliminates penetrations protecting your roof membrane
- Provides excellent load distribution and supports 500kgs per bay (1200mm x 1200mm)
- An obvious replacement for traditional concrete plinths, which cause leaks as a result of pooling and waterproofing issues

Versatile

- Series 2 Lite is available in modular 1200mm increment sizes to suit your needs
- Aluminium design makes for easy assembly and reduces the need for additional structural requirements
- System remains flexible during and after project design allowing for changes late into the construction stage
