Engineered Design

The Sunblades can be packaged up with other products in our range such as battens, balcony shutters and grating to minimise costs and reduce the number of subcontractors for one project.

Our team are happy to discuss your project requirements at the design stage and advise of products that suit the needs and budget of the project. Our powder coating colour range is extensive and coated by registered aluminium applicators.

Project Management

Shutterflex's in-house engineering expertise allows us to solve installation issues as they arise during construction. We can provide quality installation by qualified and experienced installation teams through Australia and the Pacific Region.

With many years of experience in commercial projects, Shutterflex knows the importance of meeting deadlines on projects schedules.

Setting the standard in shutters, louvres and screens.

Sunblades

Shutterflex provides custom engineered and manufactured products which can diffuse, control and moderate the heat and glare.

Shutterflex Sunblades are a smart engineering design that improves the sustainability of a building by offering the perfect solution to passive solar building design.

Choose from Box Fin or Ellipse Sunblades to improve the energy and Green performance of any building while achieving an innovative and aesthetic façade design. Already installed on buildings around the

country, Sunblades have proved to be effective in reducing the consumption of energy used in air conditioning cooling and lighting.

Filtering natural sunlight without spoiling views, they are made from lightweight, low maintenance, high strength aluminium. Fitted either horizontally or vertically they make a striking visual statement, invariably just the look you are seeking.

The combination of aesthetic appeal, cost effectiveness and sustainable performance as a façade for buildings make Shutterflex Sunblades a world-class feature.

Ellipse Sunblades

Trilligy - Cypress Ave, Surfers Paradise, Gold Coast

Sunblade Ellipse/Bullet - 75 Series

The 75 series Ellipse/Bullet Sunblades can be joined together to create a range of different options from 300mm through to 1200mm. The size of the ellipse/bullet blade can be increased in increments 200mm.
