EGGER Flammex

Schools, hospitals, hotels, shops and other public institutions have higher building code requirements for fire protection. Flammex panels achieve Group 1 Fire Rating and are highly functional without limiting design flexibility. Maximise design with limited joining thanks to the EGGER sheet size of **2800 x 2070 x 18mm**.

These panels are designed so they do not create droplets while burning and have low smoke emission. The emission behavior is the same as with natural wood. Perfectly match other EGGER joinery or create a contrasting element with Flammex, the perfect Group 1 Fire Rating solution for commercial projects.

Decors
- Black U999 ST19
- Grey Sherman Oak H1345 ST32
- Mainau Birch H1733 ST9
- Natural Halifax Oak H1180 ST37
- Premium White W1000 ST9
