FACADE SYSTEMS

Hunter Douglas Commercial Facade Systems are specifically engineered to enable you to create a unique look, but also to withstand environmental conditions. We do this by using technology originally developed for the aircraft industry. The end result is that our Facade Systems provide the perfect combination of smooth, flat, and stylish aesthetics, with superior performance.

All our fully customisable Facade Systems provide the flexibility of an almost limitless variety of design options and finishes.

COIL – COATED COLOUR RANGE

HIGHLIGHT				
				
BEEF RED*	CASCADE BLUE*	CLARET*	GLOSS RED*	FLAME RED*

HC COLOUR-COTE® POLYESTER PLUS (PE₃)

HD COLOUR-COTE PE₃ is formulated as controlled colour concentrates thus enabling colour dispensing through the new Hunter Douglas on-site state of the art, computer colour matching and dispensing system.

This system is capable of reading colour samples, writing suitable colour formulae, and dispersing virtually any colour and gloss level in batches up to 200 litres of HD COLOUR-COTE PE₃ ready for the coating process, thus providing architects and specifiers with project specific color access compatible with virtually any size project.

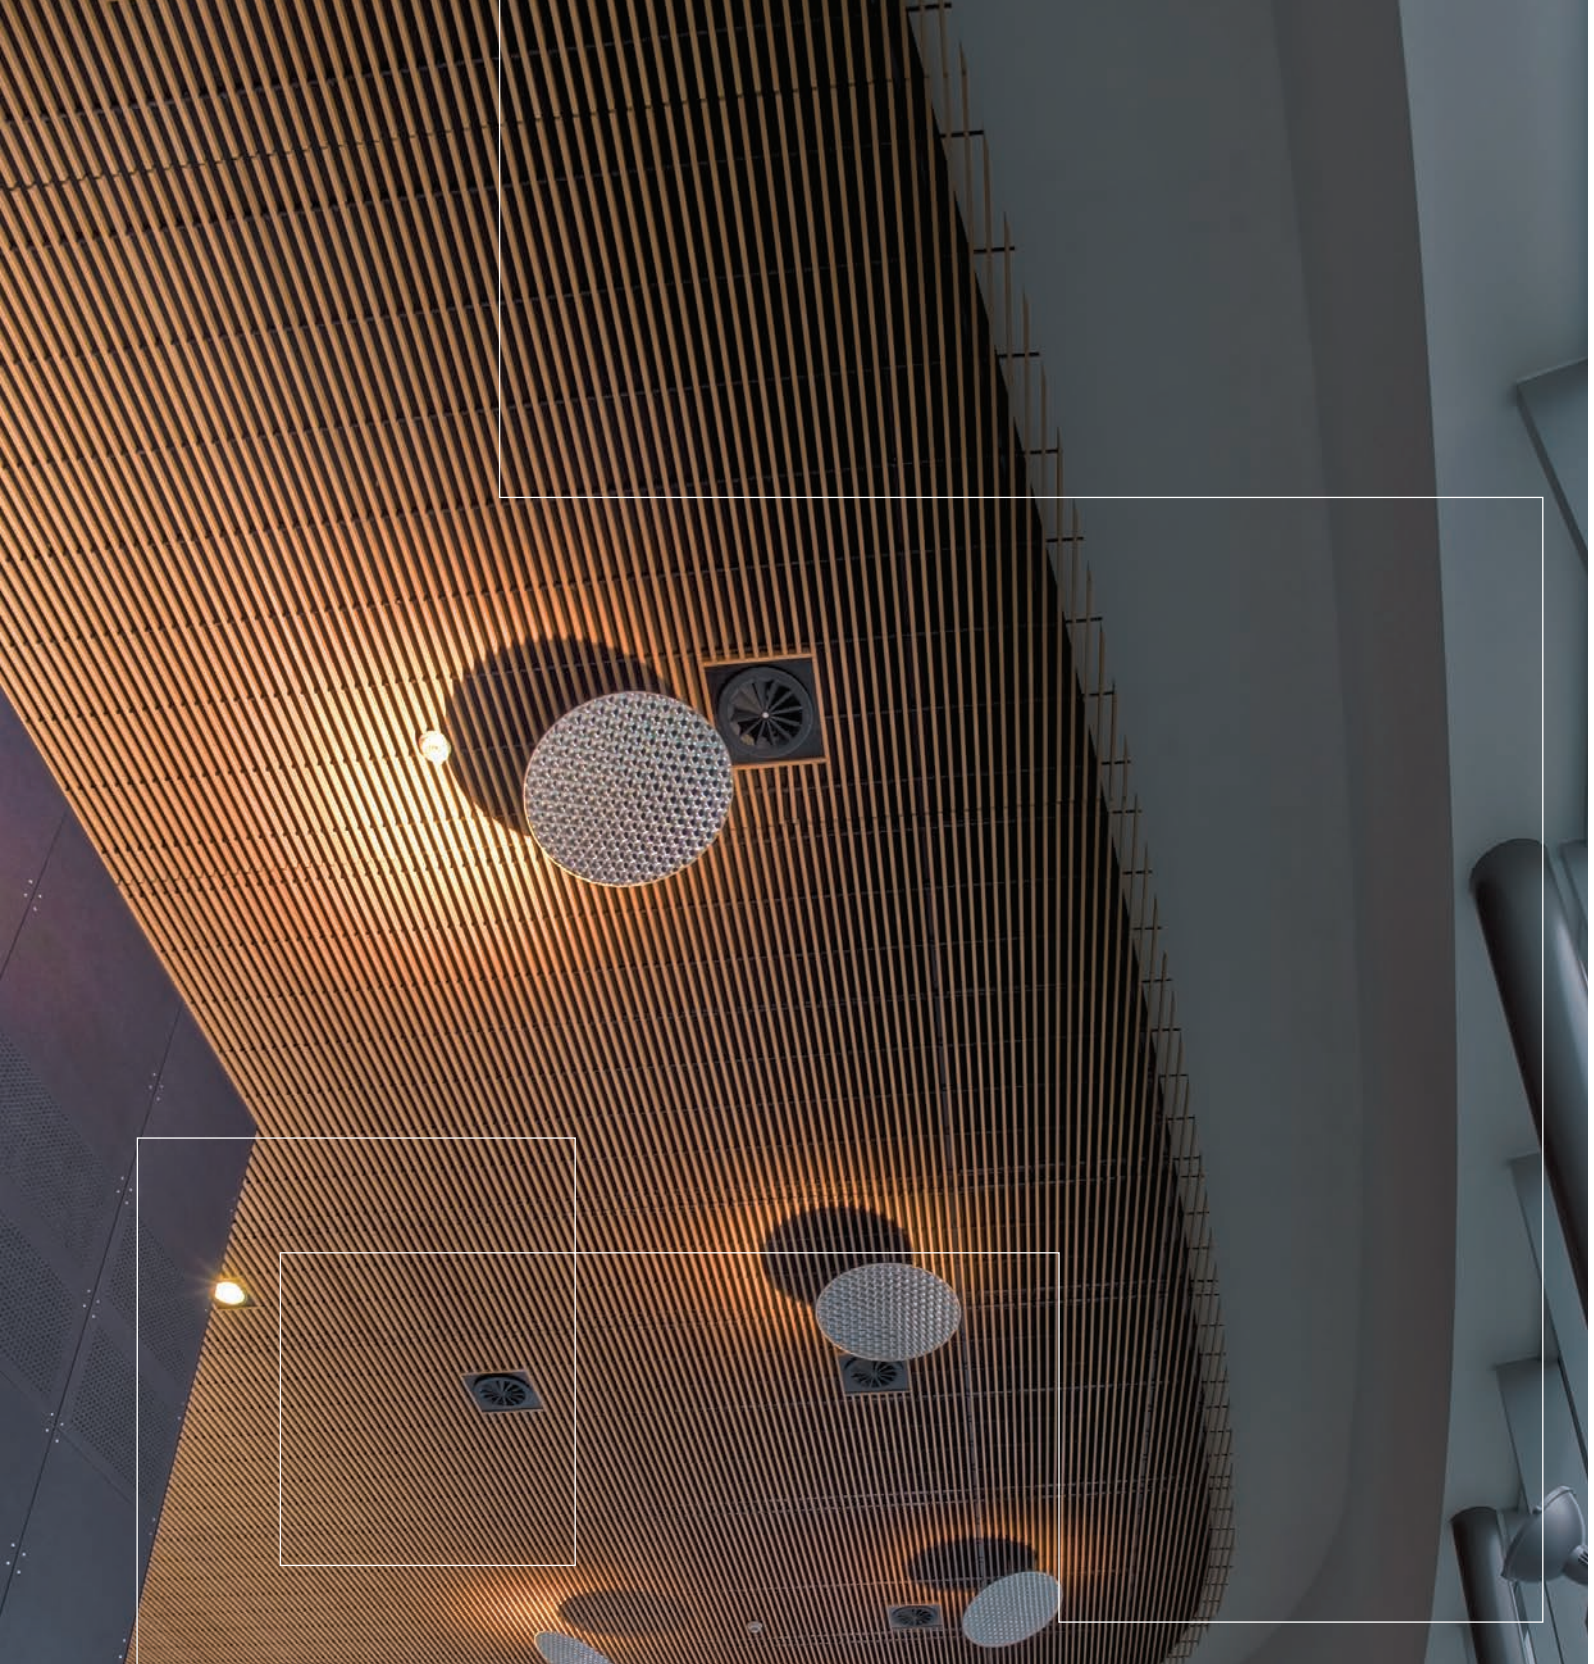

HD COLOUR-COTE PE₃ architectural finish is suitable for use in most urban, rural, and industrial environments throughout Australia, including most coastal and tropical areas. PE₃ produces a fine smooth surface as a result of it being baked onto the coil stock. It thereby inhibits dirt retention. Rain or a regular hose down provides a good cleaning action.

HD COLOUR-COTE products all match and exceed all appropriate standards of performance detailed in Australian Standards Association AS2728 - 2013 thus setting the benchmark for pre-coated, common use architectural and building products.

*Colours available in Exterior Finish. Exterior paint has a 'higher gloss rating' to an approximate gloss level of 25%.

HUNTER DOUGLAS COMMERCIAL LUXALON® COLOUR CHART

The colours shown in this colour chart have been carefully matched, however minor deviations from the actual colours may occur. Coil coated samples of individual colours are available upon request.

Interior coil coat colours unless specified are painted to an approximate gloss level of 10 to 12%.

Exterior coil coat colours unless specified are painted to an approximate gloss level of 25%.

Unless otherwise specified Ceilings will be coated to Interior paint gloss level and Facades to an Exterior gloss level respectively.

WOOD EFFECTS - POWDER COAT APPLICATION
FOR LUXALON® EXTRUDED ALUMINIUM PRODUCTS.

Powder coated colour finishes for our LUXALON® extruded products are available for selection on a POA basis from recognised industry powder coat colour chart providers and applied in accordance to their specific production process.
