

Make the most of your outdoor spaces

Vergola is the original, energy-efficient, open close roof system that adds versatility and functionality to your home, creating a comfortable space to enjoy all year round.

Opens and closes

Vergola roofs open and close – giving you complete control over your outdoor areas. You can let the sun in, or keep the sun or rain out. No matter what the weather conditions are, you can be comfortable enjoying your outdoor area all year round. PLUS it has a rain sensor – to close the louvres at the first sign of rain.

Ultimate comfort

No other roof system compares to a Vergola. The adjustable louvres allow the right balance of light, shade and ventilation. Vergola's unique aero-foil wing shape provides maximum insulation – keeping you cooler in summer and warmer in winter. It blocks wind and rain and can be used as a privacy screen or for noise control.

Vergola's unique louvre design functionality is what makes a Vergola so impressive.

Unique Wing Shape

The aero-foil wing shape, combined with the use of Colorbond steel, creates a cavity air space which delivers greater insulation and strength than any other traditional roofing option.

Angled Louvres

For warming winter sun the louvres are angled to allow direct sunlight to penetrate creating a wonderfully warm and protected area.

Ventilation and Light

During summer the louvres are angled in the opposite direction to reflect the sunlight providing a totally shaded, well ventilated and naturally lit atmosphere.

Protective Cover

In rainy conditions the Vergola louvres close and overlap each other creating a protective cover allowing you to enjoy your outdoor area undisturbed.

Water Clearance

The louvres are installed with water clearance in mind and will direct water to the Vergola gutter which lines the inside of the system's frame work.

Guttering

The gutters will disperse water to the closest point of clearance which is generally a down-pipe into your home's storm water system.

Design Options

Vergola's open close roof system comes in a variety of design options, with each one custom-made to suit your individual property and requirements. Whatever your architectural design requirements are, a Vergola can be designed to fit.

Flat

Frame is flat and the louvres have a one degree fall to control water.

Skillion

A sloping roof design.

Box Frame

Designed to suit houses made from rendered brick.

A Frame

Two similarly sized beams, arranged in a 45-degree or greater angle, attached at the top.

Curved Beam

Customised to suit any curved design.

Screens

Vergola louvres installed vertically to provide a privacy screen.

Tapered

Customised to suit angles, triangular sections and other design features.

Insert

Vergola inserted into any existing frame.

Colour Options

Vergolas are available in 8 standard colours and custom colours are also available.

The use of standard colours allows a quicker turnaround time from design to installation.

Design Considerations

The design and direction of your house, along with the location of your outdoor area and what you are wanting to achieve, need to be taken into consideration when planning for your new Vergola. Our 3D drawing tool will bring your Vergola to life, illustrating the placement of the sun's rays at different times of the year so you can easily visualise the difference your Vergola will make to your home and lifestyle.

Why Vergola?

Add Value to Your Home

A stylish Vergola can create an extra room outdoors – just perfect for outdoor entertaining – and a major attraction for home buyers.

Real Estate Agents agree:

“A Vergola is an asset for any home owner. It adds style and value.” Stephen Doyle, Director, Doyle Spillane Real Estate

“Vergola is without doubt a strong sales feature when selling a property,” Alicia Ross – Ryan, Director, Ray White Real Estate

Original and Best

Vergola is the original and best open close roof system on the market.

Vergola has been at the forefront of the operable louvre roof industry since 1988.

Nothing compares to the original Vergola.

Superior Design and Quality

Vergola’s Design Consultants work with you to achieve the best design option for your home. They will take into consideration the existing design elements of your home, the positioning of the sun and any other building considerations.

Vergola’s quality control is second to none and Vergola’s frame and beam cappings offer a seamless attachment to dwellings.

Australian Owned and Manufactured

Created and designed in South Australia in 1984 by leading Engineer Mr Tony Rossiter the Vergola System was awarded the Australian Design Award and Prince Phillip Design Award in 1984, and again in 1987. All NSW Vergolas are made at our Terrey Hills factory located on the beautiful Northern Beaches of Sydney.

As Seen on THE BLOCK

Vergola was chosen to supply its innovative opening louvre roof system to the houses featured in The Nine Network's television program The Block Bondi.

The outdoor area of each house was significantly enhanced by the installation of a stylish and functional Vergola Roof.

The choice of colour for the louvres and steel posts was Woodland Grey.
