Protecting People & Property

WORMALD

We do more than fight fires. We help prevent them.

A major fire, with its devastating effects, could be the end of your business. Lives can be placed at risk, property can be destroyed and often a business may not fully recover.

While insurance may cover property damage, the best protection against fire is to be prepared. This is where Wormald can help. For more than 120 years, Wormald has been helping protect people and property with our comprehensive range of total fire protection solutions.

Our business is to help protect your business

Our customers' needs are as diverse as their businesses, and Wormald is an expert at tailoring fire protection solutions to address a wide range of requirements. Whether your company is large or small; in the industrial, private or public sector, you can count on us to help protect your business.

With our knowledge and expertise, Wormald can manage all phases of a fire protection project from concept to completion; covering risk

assessment, design, manufacture, installation and service. We back all this up with a full range of support services, including specialist engineering advice and fire safety training for your employees.

World-wide expertise

Wormald is part of Tyco International, the world's largest fire and safety systems organisation operating in over 80 countries. This gives us unique access to a remarkable depth and breadth of physical and intellectual resources, providing global strength to reinforce our local know-how.

Wormald supplies specialist fire protection services to a wide range of industries, including mining, marine, industrial, commercial and retail. Many leading companies and government bodies also rely on our specialist expertise.

Australasia's leader in fire protection

We are proud of our reputation as a leader in fire protection and of the vital role we play in saving lives and preventing or minimising fire damage. At Wormald, our priority is your protection.

*Fact: Twenty-five percent of businesses that suffer a serious fire will go out of business as a result.**

Fire system installation. Fighting fire before it starts.

Fact: Wormald offers dedicated teams to provide design, installation, maintenance and technical support services.

Wormald can engineer fire protection solutions to meet your needs. Before installing a new fire protection system, we will survey your facility and analyse your building's design and purpose. Once your exact requirements have been determined, our engineers will plan and deliver a fire protection solution tailor made for you.

Fire protection specialists

Wormald's installation engineers are leaders in their field. Our Contract Specific Quality Plan is designed for your peace of mind. This plan incorporates our commitment to customer satisfaction and is based on our corporate quality principles, the requirements of international manufacturing standards and client specifications.

The latest fire protection systems and equipment

We offer an extensive range of the latest systems, equipment and technology to suit our customers need. Whether it is a Fire Sprinkler or Alarm System, or perhaps an upgrade to your existing Gas Suppression System, Wormald's installations team can help you put it in place.

Cutting edge fire detection technology

Our MX Technology™ provides worldwide cutting edge technology, in a comprehensive range of fire detection systems. Our advanced MX Technology™ detectors and fire panels provide cost effective solutions from small fire detection systems through to large industrial and multi-building sites.

Protecting you and the environment

Safety and environmental protection are key concerns for all businesses today. As a leading manufacturer and supplier of clean agent systems, Wormald is proud to help protect you and the environment with our Inergen® and SAPPHIRE™ fire suppression systems.

As a result of the Apollo space tragedy, NASA developed the Inergen®. Inergen® comprises of gases naturally found in our atmosphere and poses no harm to the environment.

Most chemical agents remain in the earth's atmosphere for over 30 years, but SAPPHIRE™ has an atmospheric lifetime of just 5 days. Unlike water, our patented chemical agents will leave your valuable assets unharmed, with no messy residue to clean up.

Fire system servicing. Your peace of mind is priceless.

As the risk of fire is always there, it is essential fire detection and suppression systems are regularly serviced to ensure they are ready to perform when you need them most. This is why our skilled service teams are as important as the fire protection systems themselves.

We are there for you

Wormald has one of the largest service networks in the industry, so when the heat is on, you can count on us to be there for you. In addition to our regular scheduled equipment testing, Wormald service technicians are on 24-hour standby – ready to undertake emergency repairs to your fire protection systems and products. Our dedicated national call centre will ensure a skilled technician is allocated to you as soon as possible.

Our technical field teams are equipped with self-contained vehicles, which enable them to deal with most service problems on the spot in response to your first call. We do our utmost to ensure our customers are allocated the same service people each time and pride ourselves on our long-standing customer relationships.

Testing for peace of mind

Wormald works to stringent quality standards. We are as serious about servicing your fire system as we are about supplying it. Our operations are regularly audited to provide the best possible fire systems and services to you. Our auditors are all focused on ever improving our level of service. All our service technicians are highly skilled specialists in the testing, maintenance and repair of your system. At the same time aiming to comply with Australian and New Zealand industry standards and government regulations.

Wormald offers customer maintenance contracts to help you keep your fire systems up-to-date. We can test and make all the necessary repairs and provide an auditing service to help ensure your fire systems comply with all regional regulatory requirements.

System upgrades

Wormald has access to an extensive range of fire protection products, using the latest technology from around the world and provide you with the upgrades and enhancements for your existing systems.

Fact: AS 1851 - 2005 prescribes detailed maintenance activities and frequencies required for most fire systems and equipment.

Portable fire equipment. Your first line of defence.

FACT: It is essential fire extinguishers are regularly serviced and easily accessible at all times, so they can be called upon when required.

A serviced, functional fire extinguisher on hand during a fire can mean the difference between a minor incident and a devastating full scale fire.

'First-aid' for fire

A vital part of Wormald's business is 'first-aid' fire-fighting equipment, such as; portable fire extinguishers, hose reels and fire blankets. Typically, a large proportion of fires can be extinguished quickly when the right portable fire equipment is at hand.

Obligation free assessment

Wormald has dedicated portable fire equipment technicians in Australasia who are highly skilled in installing and servicing all portable fire apparatus for your business. From initial site assessment to hands-on training, we can assist in the protection of a wide variety of industrial, commercial or multi-occupancy residential properties.

You are just a phone call away from an obligation free survey of your business, or a comprehensive audit of your site. All our audit reports include recommendations regarding compliance to Australian and New Zealand Standards and Occupational, Health & Safety (OH&S) requirements.

Emergency training needs

Wormald provides real solutions to organisations and their staff confronted with emergency situations. One of our most important services is in emergency response training; because the impact of a crisis can be substantially reduced when people are trained to respond appropriately to it. Wormald's suite of educational programs include; warden and fire extinguisher training, evacuation procedures, breathing apparatus and confined space training.

Specialist fire solutions. Offering a little more in a big way.

As an industry leader in large scale systems integration and services, Wormald has the expertise to offer a little bit more. Our specialist systems and equipment utilise the latest in advanced fire protection technology, to provide specialist fire protection solutions.

Major Projects

As a leading fire engineering and contracting service provider, our specialist Major Projects team help reduce capital investment, when required, through customised solutions to meet and exceed industrial risk management requirements in key markets like power generation, oil and gas, petrochemical and mining. We can provide state of the art asset and employee safety protection to essential services, where business interruption is simply not an option.

Special Hazards

Wormald's Special Hazards team can help provide protection for high risk, production intensive assets – as well as the vital safety needs of your personnel. Our Special Hazards solutions include; pre-action systems, deluge systems, water spray and mist systems and gas and foam suppression systems. After surveying your facility, our team of experts will recommend the right specialist fire protection solution for you.

Fire protection for your vehicles

Vehicle fires can be extremely dangerous and intense. Fires can start easily in the enclosed space of an engine and may quickly destroy a vehicle or endanger a life. Wormald foam water spray fire suppression system and the Ansul chemical powder fire suppression system are compliant with AS 5062 and are ActivFire™ listed.

Life Safety & Rescue

Wormald is one of the leading suppliers of emergency breathing apparatus to fire-fighters, law enforcement personnel, military, oil and gas facilities, mining and utilities. As Scott® Health & Safety's (a Tyco owned business) exclusive emergency services and defence distributor in Australia and New Zealand, our Life Safety & Rescue products include; breathing apparatus, emergency air systems, gas and respiratory masks, communication devices, air compressors, gas detection units and thermal imaging cameras. Over a million fire-fighters worldwide trust in Scott® as the world leader in respiratory protection equipment.

Fire Resisting Safes and Cabinets

In the event of a fire, it is critical your assets of a business are saved. Wormald's range of certified products protect your business files, original documents, digital media, cash or valuables from fire or burglary. Products available include fire resisting safes, fire rated filing cabinets and commercial security and media safes.

Our people. There to look after you.

Systems can be sophisticated and products outstanding, but ultimately their effectiveness relies on the expertise of the people behind them. This is why a dedicated workforce is integral to a company offering something as vital as fire protection. When you invest in Wormald systems or equipment, you are buying into a wealth of expertise, service and commitment.

Advice and support – we are here to help

Our staff are highly skilled, with many serving with us for over 25 years. This vast combined experience is on-hand to help you with risk assessments, compliance issues and cost-benefit analyses of the various methods of fire protection, in addition to fire safety audits and reports.

Wormald remains at the forefront of industry developments through our extensive representation on legislative and industry boards, including technical standards and advisory committees. This gives us an extraordinary pool of industry knowledge and expertise to draw from and allows us to keep our customers up-to-date with legislative changes and how this may affect their businesses.

Environmental Health and Safety (EHS)

The safety of our employees, contractors, customers and the preservation of the environment are vital to the way Wormald

undertake its business activities. Wormald has a comprehensive Environmental, Health and Safety Management System, which aims to exceed legislative requirements.

Your partner in fire prevention

As a leader in our field, we value our staff and appreciate the contribution of each individual. We are committed to enhancing our collective capability through ongoing accredited staff training, regular internal audits and careful monitoring of the latest equipment and technology.

We believe in teamwork and have dedicated teams to manage each phase of a project, from risk assessment to installation, service and training. We foster communication between our teams to provide clients with a totally integrated service.

With more than 2,000 employees throughout Australasia, Wormald has the talent and expertise to provide you with the best total fire protection solutions. Most importantly, we can provide you with peace of mind.

We like to think of ourselves as your partner in fire prevention.

Wormald. Protecting people and property.
