

### Extreme durability

Successful for many years AQUA Glaslack measures up to the toughest German quality standards and international conformance tests.

### Tested Quality

DIN 68 861-4 DIN EN ISO 2409

### UV / IR stable

The Rhenocoll Radiation-Protect-System ensures the highest resistance against UV light and IR radiation within the varnish.

### Interior and exterior applications

High quality and durability allows any application: for interior applications such as kitchen splash-backs, bathrooms, lifts, reception areas, curtain walls, etc. For exterior applications in façades spandrel glass, etc.

### Multitude of colours

Opaque colours and metallic tones as well as special effects from Australian and international colour charts. Over 10.000 colour formulas at your disposal.

### Eco-friendly

Water based. No solvents, no harmful emissions or waste, no fire hazard, no unpleasant odours.

### Easy processing

No hardener, one-component product, with Tec-Bond-Promotor for the first coat to improve adhesion.

**Our research and development department has been awarded multiple times for various innovative systems.**

- Innovation award by the minister for economic affairs 2005 and 2009.
- Award by the Federal president of Germany in 2007.
