POLYMER SPRAY STONE FLOORING

Florentina Spray Stone Flooring System

Ideal for commercial and residential applications

Florentina Spray Stone, the latest innovation from Concrete Colour Systems will change the way you approach stone flooring design. Retain the appearance and durability of granite without the expense and design challenges.

A versatile finish, Florentina Spray Stone is perfect for use in difficult to access areas that would not necessarily be suitable for real stone. Flexible, hard-wearing and attractive, it is a non-porous spray overlay suitable for both interior and exterior concrete flooring surfaces.

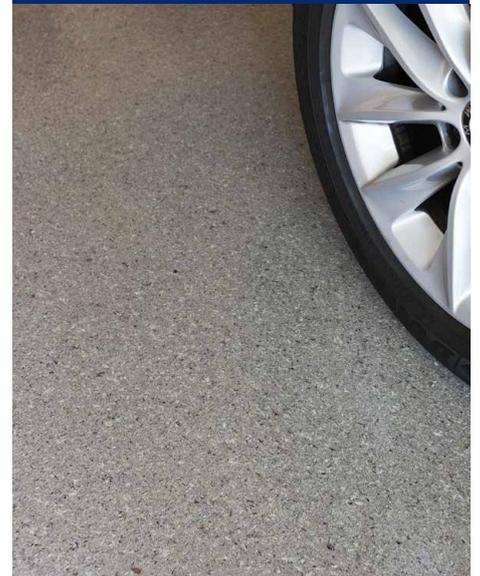

Resistant to dirt, mould, grime and other contaminants, Florentina Spray Stone will transform your concrete floor into an attractive focal point that will endure regular use for years to come. An ideal finish for both new projects and renovations, it is environmentally friendly, safe to apply in confined areas and extremely cost effective.

Choose from six superb finishes and experiment with various combinations to delineate space. The application of Florentina Spray Stone is a rapid process and our fully trained applicators will ensure your project's success at all stages of the process.

Features and Benefits

- Granite appearance
- Spray on application
- Choice of six colours
- Cost effective
- Durable
- Flexible and rapid placement
- Hygienic and seamless finish
- Convenient
- Suitable for interior and exterior
- Applied by trained applicators

Concrete Colour Systems Decorative Flooring

CCS Coloured Epoxy

CCS Coloured Epoxies can be used singularly or in combination with other epoxy products to create an extremely tough floor surface that is resistant to water, tyre marking, stains and general wear and tear. Suitable for use in back of house commercial and industrial situations such as those being utilised by forklift traffic in addition to retail and commercial showrooms.

CCS Stylepave Overlays

Ideal to revitalise and renovate tired grey concrete. Available in a range of 30 colours, designs and textures, CCS Stylepave Overlay Concrete Resurfacing System is a cost effective way to renovate any concrete surface. Create custom designs using adhesive fibre tape or use pre-cut stencils to energise and resurface concrete.

CCS Galaxy Flake Flooring

An extremely hard wearing, low VOC decorative flooring solution available in a large range of colours. Ideal for a wide range of interior environments that experience harsh treatment.

Consisting of pre-coloured acrylic flakes with an epoxy resin overlay, Galaxy is a flexible and effective flooring solution.

CCS Galaxy Metallic Pigment

Exotic swirled and pearl enhanced patterns can be created with a CCS trained specialist applicator using metallic pigments and epoxies.

A unique antique, multi-tone look is achieved using a variety of techniques which will add sparkle to any interior floor.

CCS High Performance Sealers

Concrete Colour Systems provide a comprehensive range of sealers designed to protect decorative concrete surfaces. Our sealers add longevity to each project, ensuring resistance from contaminants such as dirt, grime, salt, oils and general marking. A CCS sealer makes cleaning and maintenance easier while inhibiting the growth of mould and algae.

CCS sealers are formulated with high quality resins designed to withstand the harshest of weather conditions. Low VOC, environmentally friendly and complying with ISO 9001, our sealers have a proven track record for durability and reliability over the past 20 years. Our reputation for quality and consistency is second to none and we offer comprehensive support and advice at every step of your concrete project.
