

## SOLUTIONS TO SAFE LEAD PAINT REMOVAL

### Description:

PEEL AWAY is a unique paint removal system suitable for the removal of multiple layers of all types of old paints. Peel Away provides the solutions for the following;

- **The safe removal of multiple layers of old flaking paint**
- **Containment and safe disposal**
- **The reduction of contamination into the water system**
- **Reduced health risks to the Public and Industry**

### Product:

The safe poultice method of chemical stripping is recommended and referred to in the EPA "Lead Alert" guide. The product is a thick paste that is applied to the surface and then covered with a laminated cover. This allows the product to emulsify up to 30 layers of paint in one application. The laminated sheet is then peeled away taking with it the paint and the paste.
