Enhanced security features to further protect against intrusion, burglary and vandalism.

### Revolutionary Security

ASSA ABLOY Entrance Systems believes that everyone should benefit from safe, convenient, elegant and secure entrances.

Automatic sliding doors have been appreciated by our customers for years, and we are now taking security to the next level by equipping our sliding doors with a multilevel intrusion protection system. This system is suitable for entrances with high security demands.

### Security features

The Intrusion protection system provides options for securing at multiple points, whether it be top, middle or bottom. For maximum security we highly recommend all levels of protection.

**The top of the door** can be further enhanced with our strengthened electromechanical locking system contained within the sliding door mechanism.

**The middle edges of the door** is enhanced by interlocking profiles on the leading edges, bandit proof glass and door locating pins to prevent the doors from being pushed in or levered apart.

**The bottom of the door** is bolstered by a bottom tracking system with door frame inserts to prevent / deter forced entry of a lateral force.

### Safety features

An integrated activation and presence detection system enhances safety for users by detecting people or objects in the doorway, preventing the door from closing until it is safe to do so.

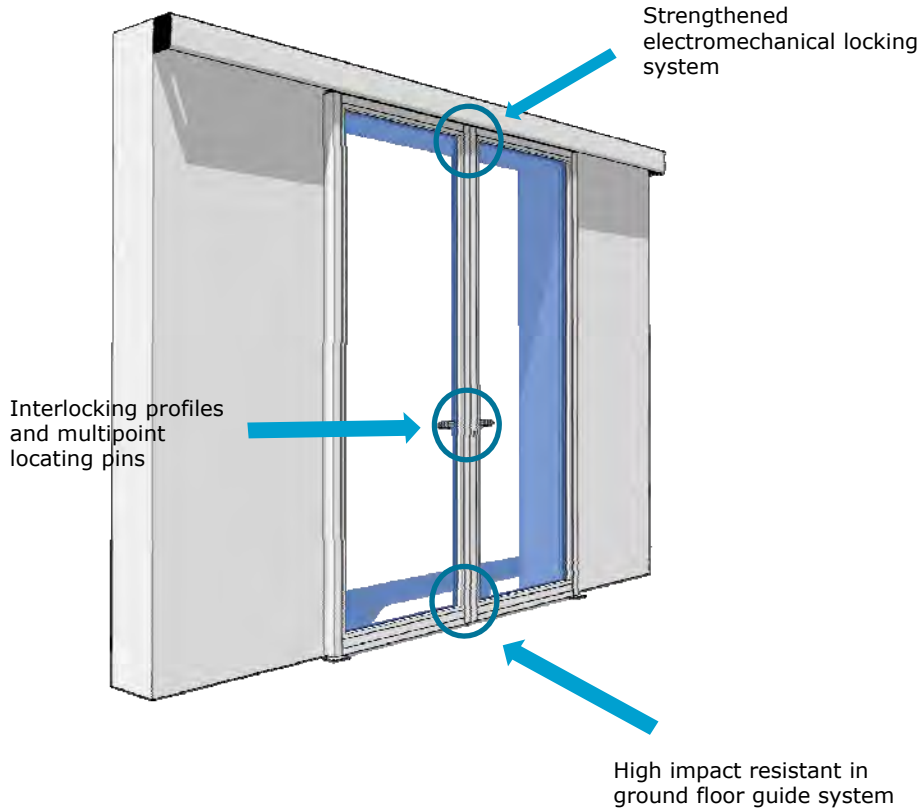

This same system can be used to detect after hours intruders and activate visual deterrents or monitored alarm systems.

### Sustainability

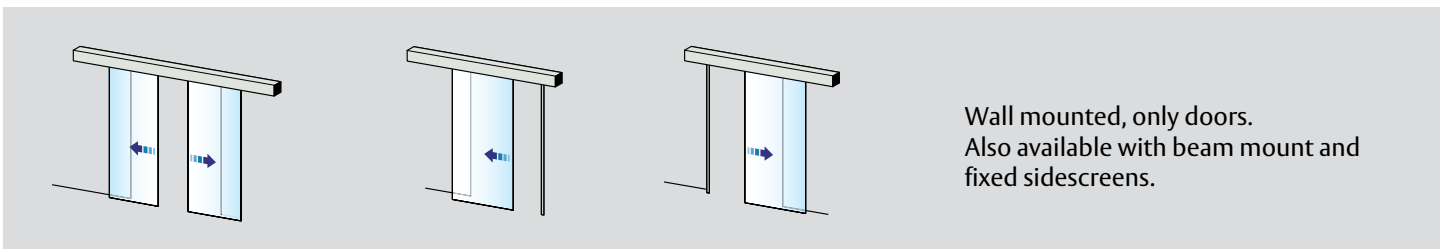

ASSA ABLOY's automatic door systems can reduce the amount of energy needed to heat or cool a building, resulting in lower costs and a smaller carbon footprint for customers.

The ASSA ABLOY Intrusion Protection Systems is equipped with additional sensors for fine-tuning opening and closing times, further enhancing its energy-saving capabilities. Regular maintenance helps ensure top performance and extends the life of the equipment, reducing its impact on the environment.

## Key Features

The ASSA ABLOY Entrance System Intrusion Protection System is the cost efficient upgrade to any new automatic sliding door whether it be a shopping centre, service station, bank or any building requiring further security protection for your business and your staff

Wall mounted, only doors.  
Also available with beam mount and fixed sidescreens.

This equipment should be installed, regularly inspected, maintained and serviced by trained and authorized personnel. Preventive maintenance plans are highly recommended for a proper and safe operation. Talk to your ASSA ABLOY Entrance Systems representative to learn more about our service offering!
