Australian Made	✓
Weight (kg)	150
Warranty	10 years

Approximately up to 6 performers per level X4 approx. 24 performers- plus another row of performers on ground level if required

Building on the proven design strength of our DIVA Fold & Roll, the MELBA Fold & Roll is simply wheeled along on its easy glide castor wheels. Once in place, the wheels are locked and the riser podiums are lowered into the horizontal position.

Our unique in-house design eliminates dangerous pinch points and the need for heavy lifting, which makes the MELBA Fold & Roll Choir Riser extremely user friendly and able to be operated by one person.

The main body of the risers and framework are constructed into one complete unit. The only removable components are the safety handrails which are quickly and easily affixed finger tight to the main choir riser body using our T bolt. The detachable handrails are then stored on the rear of the MELBA Fold & Roll when not in use.
