# KINGWOOD INTERIOR CLADDING

KINGWOOD Interior Cladding offers a tremendous range of architectural decorative features and functions. Their performance characteristics include: consistency, durability, low maintenance requirements. Each panel is equipped with air pockets which offer an additional insulation layer, thus adding a great thermal and acoustic blanket to your building. With no two panels being alike, KINGWOOD Interior Wall Cladding creates a true timber feel and appearance.

## ENVIRONMENTALLY FRIENDLY

KINGWOOD products are composite material, which integrate a small amount of polymeric material and a great amount of recycled timber powder by the use of the patented technology. It is a recycling for timber, which greatly improves the comprehensive utilization of timber. KINGWOOD products are non-polluting, recyclable, biodegradable, and non-toxic; With a low VOC and formaldehyde emission, it is ideal for the environmentally conscious consumer. During the whole production process, no industrial waste gas, waste water or noise pollution is caused, which makes KINGWOOD products truly a green material.
