A welcome addition to any workplace

Take phone and video calls without disturbing co-workers.

Versatile to meet your company's changing needs

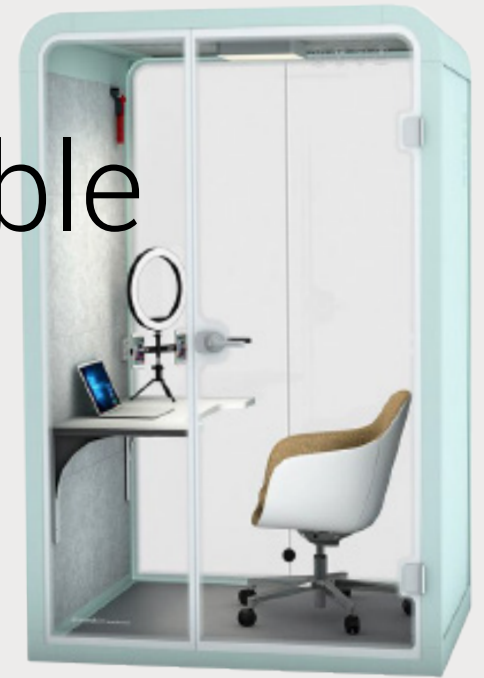

| Four size options
from a single person
phone booth up to a
six person meeting
room.

Durable & customisable

Nine standard colour combinations and endless custom branding options, all featuring an external protective skin that is highly resistant to friction, pollution, ultraviolet light, flame and moisture.

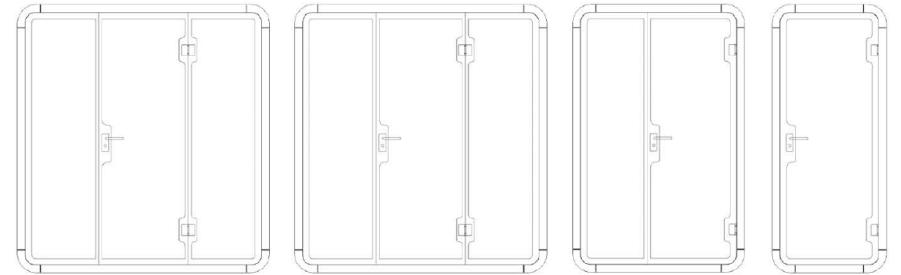

Furnished & Configured

Standard or custom layouts and furniture options available to suit any application including commercial and creative workplace, podcasting and broadcasting, or even sound and music production etc.

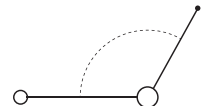

About Bureau Booths

Bureau was borne out of years of frustration in the commercial workplace seeking a last-minute meeting room, searching for an office to take a confidential call, or simply looking for a quiet zone to focus on that important presentation.

This lead a group of business consultants, architects

and industrial designers to join forces with one of the world's leading acoustics manufacturers with the objective to create stylish, architecturally engineered spaces for the modern workplace that were versatile, ergonomic and soundproof.

Environmentally Conscious

Our booths are highly functional and competitively priced however it is equally important to us that we minimise our environmental impact during their production.

We have set a minimum requirement of 50% recyclable materials in each booth and we are on target to have 100% recyclability by 2025. This on top of meeting leading environmental production standards and certifications.

The result is a product that truly doesn't cost the Earth.
