Spillway a complete variable length drainage system

- Simply measure, cut and assemble the spillway to suit any length over 350mm, fitting the outlet spigots as needed.
- Cut selected tiles to fill the spillway tile tray using packers if required, as described in the installation guide.
- A removable 20mm riser along the collection channel gives enhanced waterproofing for against wall applications.
- The collection tray is 23mm deep with a 20mm wide flange to enable effective application of waterproof membranes.
- Spillways spacer system offers a way of matching the top of the tile tray with the top of the floor tiles.
