High quality Grade 316 stainless steel frame with electro-polish finish. Ideal for any seaside or architecturally sensitive locations.

Installation Guide

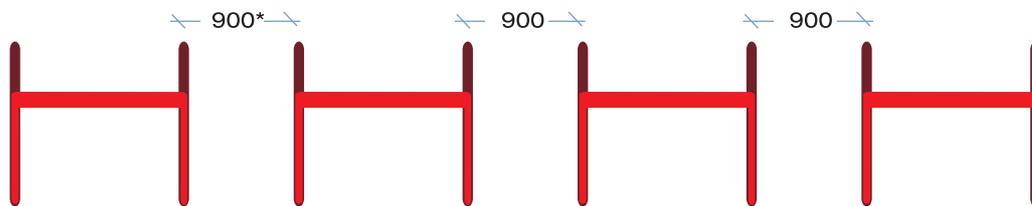

Example of EXPO 2704

In-Line Cluster

Parallel Cluster

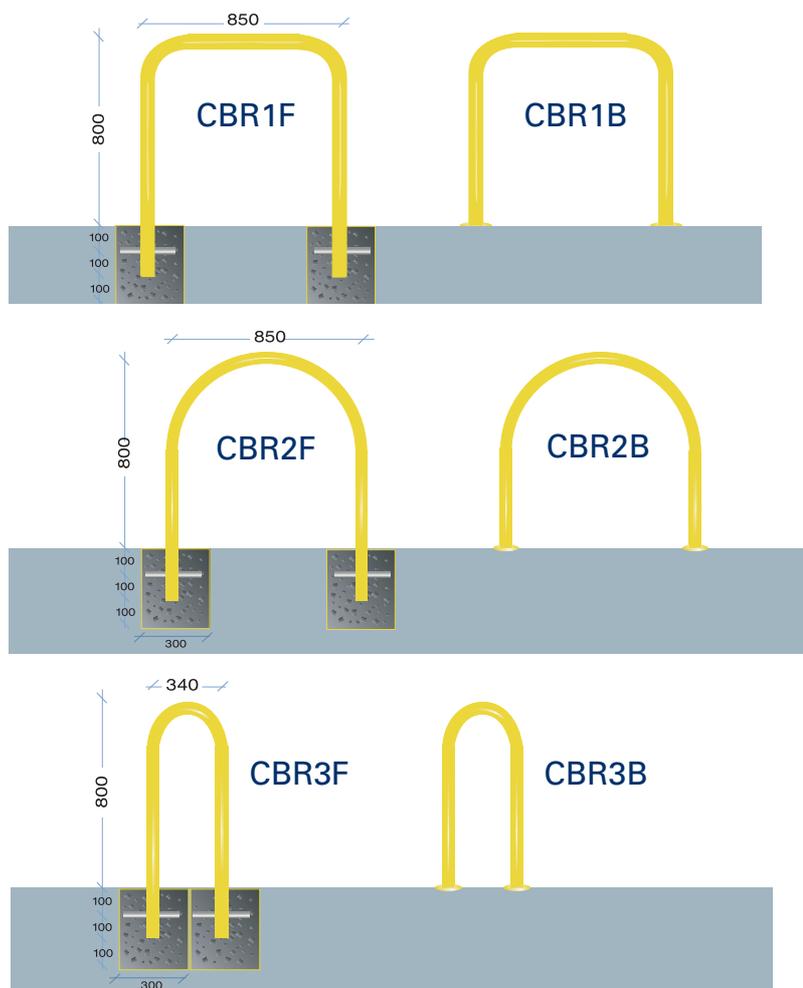

* Racks may be placed closer together with a reduction in capacity.

Cora Bicycle Parking Rails

Cora Bicycle Parking Rails are an effective solution for narrow footpaths and challenging areas. They can be installed as a single unit or in clusters to fit available space. Cora Bicycle Parking Rails support the entire bike frame and can accommodate up to 2 bicycles, one on each side.

Capacity

1 or 2 bikes per rail.

Fixing Details

Concrete Fix: In situ.

Base Plate fix: 6 x 12mm x 75mm Stainless Steel masonry anchors and acorn nuts supplied by Cora Bike Rack.

Construction

40NB(48.3) Pipe.

Finishes

Pre-Galvanised

Pre-galvanised pipe offers the most economical option. For use in undercover areas only.

Galvanised

Hot dipped galvanised post-production and hand polished to ensure smooth finish.

Colour

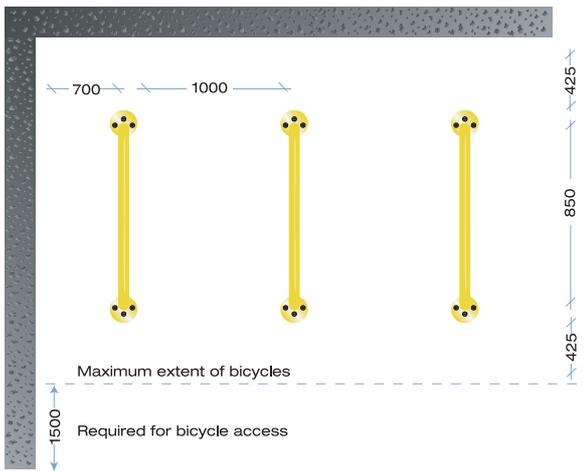

Colour powder coating on zinc electroplated frame for better colour adhesion. Specify any Dulux powder coat colour. Not recommended for use within 2km of salt water.

Stainless Steel

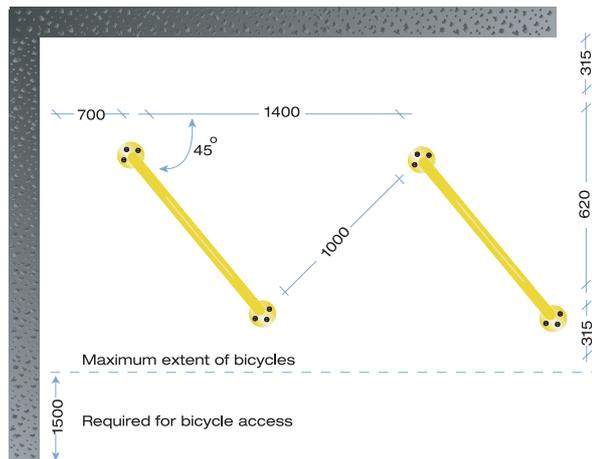

Specify high quality Sch10 Grade 304 or 316 stainless steel with a #4 finish. Ideal for any seaside or architecturally sensitive area.

Installation Guide
