FLOORSAFE[®]
ANTI-SLIP SYSTEM

SLIPPERY TILES MADE SAFE

Many thousands of Australians are injured every year from slip & fall accidents on wet slippery floors.

So the answer to reducing the risk of a slip/fall accident is to call your local Floorsafe technician.

The Floorsafe anti-slip system treatment will provide outstanding underfoot safety on all slippery surfaces such as: ceramic, quarry & mosaic tiles, granite, porcelain, terrazzo and concrete surfaces.

Kitchens, Bathrooms, Showers, Laundries, Pools, Patios, Steps... in fact anywhere where a floor surface is a slip hazard especially when wet – inside or outside - domestic or commercial.

Floorsafe is not new, its been making slippery surfaces anti-slip safe since 1987. Floorsafe's unique three & 4-step anti-slip system is currently being installed for many state and local Government Departments, Disability Services, Community Housing, Health & Aged Care organisations, Hospitals, Nursing Homes, Hostels, Retirement Homes and many other industries throughout Australia.

How does Floorsafe make a slippery ceramic or quarry tile anti-slip safe?

A passive change to a tile surface is chemically created by one of the three Floorsafe liquid products used in a unique 3 stage "Spray-on"- "wash-off" anti-slip system process.

The change created within the surface of the tile is invisible to the eye. Nothing is left on the surface at all. Floorsafe is not a sealer or a coating, in fact, after the Floorsafe application is completed, the surface actually looks unchanged which means that on going cleaning can be continued in the normal way. All three products are simultaneously applied one product on top of the other. The first product starts a cleaning process whilst at the very same time the second product creates the grip effect (the change).

The third product acts as a rinsing aid when all three products are thoroughly rinsed from the surface with fresh water.

Although you cannot see it - you will definitely feel the difference.

FLOORSAFE®

EFFECTIVENESS PROVEN

Floorsafe International has been manufacturing its quality and proven anti-slip product for over 20 years. Australian Standard slip test results are available on request.

BEST PRODUCT AWARD

Presented to Floorsafe International at The Melbourne Health & Aged Care Exhibition, September 2001.

Floorsafe maintenance cleaners keep up the good work.

The Floorsafe Commercial Maintenance Cleaner (CMC) contains a balanced blend of quality surfactants & additives which allows it to do two operations at the very same time.

Specially formulated to be used in areas subjected to grease, fats & oils this very effective concentrated deep cleansing product also reconditions the anti-slip profile. Regular use will therefore ensure hygiene is maintained to a high standard and the effectiveness of the anti-slip is kept in premium condition.

The Floorsafe Domestic Maintenance Cleaner (DMC) contains special blended surfactants to remove soaps, bodyfats & oils found in bathrooms, shower bases and bathtubs. With its long lasting 'Heavenly' fragrance this all-purpose concentrated disinfectant cleaner is a delight to use in the workplace and around the home.

Bath & Shower Safe provides added safety in the bathtub or shower for the young, the old and those with limited mobility.

Floorsafe Bath & Shower Safe product will provide a totally invisible grip effect to the complete base of a bath or shower.

Simple to apply with no dry time, long lasting "Bath & Shower Safe" is more hygienic than a bathmat or stick-on-tapes.

10 good reasons for choosing FLOORSAFE

- 1. Quality made and proven Australian product for over 20 years.**
- 2. Anti-slip when wet.**
Floorsafe creates a unique anti-slip that's even more so effective when the surface is exposed to wetness.
- 3. Cost effective prevention.**
With increasing demands for safety, Floorsafe does the job quickly & efficiently at a reasonable cost.
- 4. Fully guaranteed.**
The Floorsafe anti-slip system is guaranteed for 2 years but could last for 5-10 years with correct maintenance procedures.
- 5. No disruptions.**
With the Floorsafe anti-slip system procedure there is no mess, no noise and no smells.
- 6. Appearance - Little or no change.**
Floorsafe does not visually alter the appearance.
- 7. No dry time.**
Surface can be walked upon immediately the Floorsafe application is completed.
- 8. On-going cleaning.**
Continued in the normal way.
- 9. The Floorsafe anti-slip system.**
Applied by a trained Floorsafe technician or do-it-yourself packs available.
- 10. No preparation required.**
The Floorsafe anti-slip system thoroughly cleans the surface and leaves the floor hygienically clean.

FLOORSAFE® ADD-A-GRIP VINYL/TIMBER

ADD-A-GRIP Vinyl/Timber is developed and manufactured by Floorsafe International. ADD-A-GRIP Vinyl/Timber is a unique anti-slip liquid that you simply dilute with water or add to your cleaning bucket. After mopping the floor and allowing it to dry, a clear invisible slip resistant film remains - making floors safer to walk on.

Re-applying the product will depend on surface type and the amount of traffic and wear. We recommend re-applying every 7-10 cleans.

Product sizes: 2 litre, 5 litre and 20 litre containers

Coverage rate: 1 litre of mixed product will do approximately 200-250 square metres of flooring.

FLOORSAFE®

ANTI-SLIP SOLUTIONS

ADD-A-GRIP

MOP-ON
ANTI-SLIP SOLUTION
FOR VINYL & TIMBER FLOORS

RUBBER STAIR TREADS & TILES

Manufactured from recycled tyres, these soft attractive safety products are ideal for:

- Stairways
 - Walkways
 - Patios
 - Gymnasiums
 - Change Rooms
 - Pool Areas
 - Play Areas
- ✓ Stops noise
 - ✓ Underfoot safety
 - ✓ Reduces Fatigue
 - ✓ Reduces accidents
 - ✓ Anti-slip
- ✓ Attractive appearance
 - ✓ Indoor & outdoor

**MADE TO MEASURE
NO WASTE - EASY TO INSTALL**

TACTILE INDICATORS

High grade 316 stainless steel plate measuring 300mm x 600mm with 72 permanently fixed studs

Reducing the installation time & cost of stainless steel surface indicators

People with disabilities have the right to dignified, safe and independent access to buildings, public facilities and services.

As Australia's population continues to age, it is estimated that the percentage of people with a degree of visual impairment will also grow significantly.

The responsibility to cater for this segment of our population rests on those who design and build structures to ensure safe, easy access to public facilities.

Easy to fit - Saves time - Save money

Tactiles designed to meet Australian standards (AS/NZS: 1428) & Building Codes of Australia and should be used to warn threatening hazards for the vision impaired under the Disability Discrimination Act (DDA).

• **External public access areas - bus stops, railways and ferry platforms**

• **Steps, landings, escalators & ramps**

Polypad Hazard Indicator

Large raised stud pattern

One sensible size sheet - 600mm x 900mm in yellow, black, grey or ivory.

Individual Studs

Coloured plastic - stainless steel and carborundum in-filled

Tactiles are R-12 rated for anti-slip safety.

Provides a permanent solution for tactile guidance.

Products are UV stable and meet all the required standards.

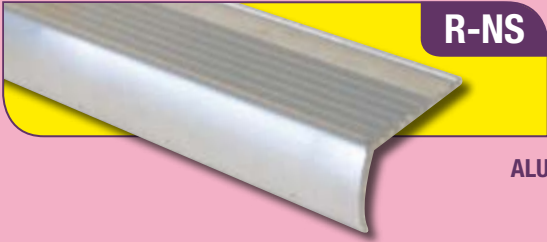

FLOORSAFE®

ANTI-SLIP STAIR NOSINGS

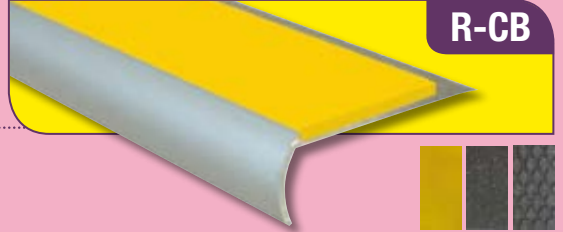

REDUCE THE RISK OF INJURY!

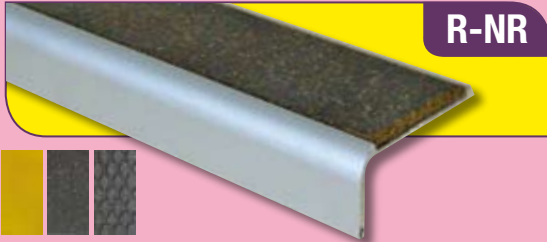

R-NS
