ARCHITECTURAL
Building better choice

Whisper quiet, durable and stylish cladding solutions.

Urbanline's acoustic cladding solutions offer an unbeatable combination of style, durability, low-maintenance and excellent R_W ratings.

Our versatile range has been independently tested to meet noise certification requirements.

A quiet overachiever, our acoustic cladding solutions dampen vibrations and absorb, deflect and insulate sound, while enhancing environmental performance and adding a distinctive architectural profile to any building.

Our solutions are perfect for high traffic areas, transport corridors, airports, childcare centres, schools, public facilities, industrial areas, coastal areas, and high-density residential living.

With a mix of timber and composite options, and a variety of colour profiles, our acoustic cladding collection will give a new dimension to your next project while providing peace and quiet and peace-of-mind.

Independently tested and certified. Peace and quiet.

Laboratory acoustic testing was completed by Consulting Engineers for relevant standards including:

- ✓ AS1191.2002 - Acoustics - Method for laboratory measurement of airborne sound transmission insulation of building elements
- ✓ AS/NZS ISO 717.1:2004 - Acoustics - Rating of sound insulation in buildings and of building elements Part 1: Airborne sound insulations
- ✓ AS ISO 354-2006 Acoustics - Measurement of sound absorption in a reverberation room

Six versatile choices for acoustic cladding? Sounds good.

Our top performers include:

- Duro Clad Composite
- Euro Clad Composite
- Newport Hardwood Cladding
- Newport Hector Cladding
- Millboard Cladding
- Latitudes Clad Composite

This mix of architectural profiles will integrate seamlessly into any project. And, each profile has been engineered for strength, durability and environmental performance.

Enhance your environmental credentials with the eco- friendly PEFC accredited Euro Clad Composite or the FSC certified and thermally modified Newport Hector Cladding. PEFC and Australian Forestry Standard certification is also available on request when Australian hardwood species such as Spotted Gum, Ironbark and Blackbutt are used in Newport Hardwood Cladding application.

Whether you choose real timber, or our natural looking composites, you'll experience easy installation, stylish design and a product that's been built to withstand even the harshest environment.

Duro Clad Composite

Euro Clad Composite

Newport Hardwood Cladding

Newport Hector Cladding

Millboard Cladding

Latitudes Clad Composite

and quiet. Peace of mind.

The following results were achieved:

Cladding Product	Specification Code	Highest R _w result achieved
Euro Clad Composite	EC155x18^	49*
Newport Hardwood Cladding	NC120x19BG^	50*
Newport Hector Cladding	NC125x20H^	48**
Duro Clad Composite	DC112x22^	53*
Latitudes Clad Composite	LC124x32^	52*
Millboard Cladding	MBEGC176x32^ MBWC200x32^	51*

* With a configuration of construction – information available on request

** Acoustic Opinion

^ Add colour choice or timber species to product code

Acoustic cladding solutions – quietly delivering freedom of choice, stunning results and incredible performance.

Urbanline's acoustic cladding is ideal for:

Any building or wall structure that requires a rate of sound insulation to comply with Australian Standards

Wall systems facing transport corridors that require sound reduction

External feature facade or appealing architectural finish for residential and commercial applications

High density, multi residential dwellings

Projects that require high environmental accreditation
